The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, January 9, 1922 at 4:30 p.m.

There were present: Dean Kerr in the chair, Messrs. Alexander, Broadus, MacEachran, Lehmann, Shwldon, Allan, Gaetz, MacGibbon, Gordon, Burt, Miss Misener, Campbell, Smith, Rowan, Long, Pelluet, Walker, McDonald and Miss Patrick.

1. The minutes of the previous meeting were read and approved.

2. The results of the following final examinations in the Faculty of Arts and Sciences were presented to the Council and ratified for publication: Bacteriology 1 and 2; Geology 33; Household Economics 2; Physics 3a; Zoology 1 for students in Household Economics discontinuing the course at Christmas; and Toxicology 1.

The results of special examinations in Latin 32, Pharmacy 52 and Toxicology 1 were also approved.

3. The Dean presented the following schedule of results with respect to the Senior Tests. The subjects not included in the list were in most cases those in which essays or repotts were required.

Subject	No. of Students	Failures
Biochem 61	6	0
Chem 51	16	4
Chem 52	22	6
Chem 54	8	0
Chem 58	5	1
Class Phil 51	39	6
Ed 51	7	1
Ed 52	15	5
Fr 54	34	4
Fr 53	16	3
Geol 51	24	0
Geol 53	2	0
Geol 55	6	0
Geol 62	6	0
Grk 55	1	0
Heb 51	3	0
Heb 53	1	0
Hist 56	21	6

Hist 57	31	12
H Ec 51	24	5
H Ec 52	7	0
H Ec 55	5	0

Physiol 61	8	1
Pol Ec 64	33	0
Pol Ec 65	34	0
Psych 51	18	0
Psych 54	10	0

4. Other business.

(a) At the request of the Department of Physics, the Faculty Co agreed that the laboratory period attached to Physics 1 be reduced from three to two hours duration.

(b) The matter of a more severe attendance rule before and afte holidays was brought up by Dr. Broadus, but because of its general interest it was decided that the question should be brought up at th General Faculty Council.

The Council adjourned at 5 p.m.

W. A. H. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, February 6, 1922 at 4 p.m. There were present, Dean Kerr in the Chair; Messrs. Alexander, Lehmann, Sheldon, Lewis, Coar, Gaetz, MacGibbon, Killam, Gordon, Burt, Sonet, Miss Misener, Campbell, Smith, Long, Pelluet, Walker, Macdonald, and Eddy.

1. The minutes of the last meeting were read and approved.

2. The results of a special examination in English 1 involving two

failures were ratified for publication.

3. Recommendations from the Department of Modern Languages:

(1) That the number of hours per week in A courses in French and German be increased.

After some discussion, the Council agreed on the motion of Messrs. Sheldon and Lewis, and on the ground that the A courses really represented sub-collegiate work and as such needed more supervision, that the number of hours be increased to not more than five hours per week. At the request of the Department of Classics this decision was made to include Latin.

Dr. MacGibbon asked that his vote in opposition to this scheme be recorded as he was not in favour of a change of this nature being passed without notice of motion.

(2) That instead of separate marks being given in French 1-3, 5-4, German 1-3 and 2-4, one final consolidated mark be assigne

This second recommendation also met with the approval of the Faculty Council.

The Council adjourned at 4:35.

Addendum.

SCHEDULE OF FIRST TEST RESULTS

2nd, 3rd and Fourth Years.

Second Year. 135 students.

NO. of failures	No. of students	% of class
0	42	31.11
1	46	37.77
2	24	17.77
3	13	9.62
4	5	3.70
5	3	2.22
0 record	2	1.48

Third Year.	107 students.	
No. of failures	No. of students	%
0	54	50.46
1	35	32.71
2	11	10.28
3	5	4.67
0 record	2	1.85

Fourth Year.	82 students	
0	67	81.70
1	10	12.19
2	3	3.65
0 record	2	2.44

W. H. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, March 6, 19 at 4 p.m.

There were present: Dr. Tory, Dean Kerr in the chair, Messrs. Alexander, Broadus, MacEachran, Sheldon, Lewis, Coar, Gaetz, MacGibbon, Dow Killam, Gordon, Burt, Campbell, Smith, Long, Pelluet, Macdonald, Eddy, and Race.

1. Minutes of the last meeting were read and approved.
2. The following changes and additions affecting the degree course in Pharmacy were agreed to by the Council:
   (a) Latin 36 shall be added to the Fourth Year of the degree course Pharmacy and be known as Latin 66.
   (b) Toxicology 1 shall be known as Toxicology 61 in the Third Year.

(c) Bacteriology 1 shall be known as Bacteriology 61 in the Fourth Year.

3. The request of the Zoology department that the hours of Zoology 1 be changed from 2 hours lectures and 4 hours laboratory to 3 hours lectures and 3 hours laboratory met with the Council's approval.

4. The Dean read the results of the February tests of the Second Year as scheduled below:

Second Year. 135 students.

No. of failures	No. of students	%
0	48	35.55
1	35	25.18
2	21	15.55
3	15	11.11
4	5	3.70
5	3	2.22
No record	8	5.92

5. New Courses.

Professor Alexander proposed that the present Classical Philolo 51 be hereafter discontinued and be replaced by two courses (1) a course in Ancient History to be tentatively outlined as follows: A study of the Greek and Roman idea of the state in the light of historical developments out of which these conceptions arose, with some reference to their subsequent effect on the theory of governmen in the Western world. This course will be placed under Division B. As, however, other departments were concerned in the offering of this course, Dr. Alexander proposed that the matter should meantime lie on the table. (2) the Classics in English, a course dealing with Greek and Roman Literature in English translation, to be placed in Division A. On the motion of Messrs. Alexander and Broadus

this course was recommended to the University Senate.

On behalf of the Department of Modern Languages, Professor Coar moved and Professor Alexander seconded the adoption of a new course in French to be known as French 55 and described as follows:

French 55. French Canadian Literature 3 hours.

Origins and development. Selected works of de Gaspé, Gérin-Lajoie, Crémazie, Frechette, Chauveau, Marmette, Le May, Chapman, Choquette, Laure Conan, Lozeau, Routhier.

After some discussion the motion carried, Professor Broadus asking that his vote be recorded in the negative.

The proposals from the Department of Philosophy involving certain possible new courses and new designations for certain old courses were laid on the table till the next meeting.

6. The following recommendation from the Department of History, moved by Messrs. Burt and MacGibbon was concurred in by the Council: that the regulations governing the third year of work in the Honours Course in the Department of History (Calendar page 66) be amended by striking out the words "any one of the following: History 53, History 54, and History 56" and the substitution therefor of the words "Political Economy 63".

7. The matter of the proof reading of final examination papers came up for discussion and it was agreed on the proposal of the Chair to appoint a committee consisting of Messrs. Race, MacGibbon and Killam to look into this question as well as the proof reading of departmental Calendar material and report to the next meeting of the General Faculty Council.

8. Earle MacRae re Mathematics 7.

A letter was read from Mr. Earl McRae, principal of a city school at present enrolled in the teachers' course in Mathematics 55, asking that he be allowed to write the examination in Mathematics 7 without attendance. Mr. McRae secured credit for the first part of Mathemati

the
7 at Summer School in 1921 but lacks Part 2 for complete credit for the course. On the ground that it would be almost impossible for a student to be successful in Mathematics 55 without having an adequate knowledge of Mathematics 7 the Department of Mathematics was inclined to favor Mr. McRae's request. As the granting of this request, however, involved a matter of principle, especially if a course in question should have a laboratory in connection, it was decided to have the whole matter thoroughly canvassed by a representative committee. As the problemm involves possible concessions in attendance, the committee is to report to the General Faculty Council. To this committee was also referred for report the matter of how far students in attendance at the Summer School should be permitted to take both parts of a given subject concurrently, and, if permitted, what restrictions should be made as to the total number of courses to be taken.

The Council adjourned at 5:50.

W. A. M. Kerr

Addendum.

The following committee was subsequently appointed by the Dean: President Tory, and Messrs. Kerr, Sheldon and Lewis.

A special meeting of the Faculty of Arts and Sciences was held in the Senate Chamber on Friday morning, March 24, 1922 at 12 noon to ballot on the nominations received for representatives on the University Senate.

Those present were: Dr. Tory, Dean Kerr in the chair, Messrs. Broadus, Sheldon, Lewis, MacGibbon, Killam, Gordon and Race.

The following were unanimously declared elected as representatives of the Council on the University Senate for the two year period beginning, March 8, 1922: Professor H. H. Gaetz, Professor D. A. MacGibbon and Professor S.D.Killam.

W. A. M. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on April 3, 1922 at 4 p.m.

There were present: Dean Kerr in the chair and Messrs. Alexander, MacEachran, Lehmann, Sheldon, Coar, MacGibbon, Killam, Gordon, Burt, Campbell, Smith, Long, Pelluet, Walker and Macdonald.

1. On the motion of Dr. Alexander the Minutes were approved as read.
2. Business arising out of Minutes.

Change in Courses: (a) Department of Classics.

On the motion of Professors Alexander and MacGibbon, the Council ratified the change in the Department of Classics whereby Classical Philology 51 is replaced by two new courses (1) The Classics in English 51 (2) History of the Ancient World 51, the former to be placed in Division A and the latter in Division B with a cross-reference to the Department of History. The description of these courses is as follows:

The Classics in English 51 3 hours.

A study of the culture and influence of the Hellenic race based on Greek literature from Homer to the Alexandrian Age. No knowledge of Greek is required as the work will be taken up through translations.

Required in the second year of students looking forward to Honours in English or in Classics; open to all students of the third and fourth years as an option in Group A.

History of the Ancient World 51 3 hours.

A study of the historical development of Athens as the representative of the idea of the city-state and of Rome as the representative of the idea of imperial expansion.

Open to all students of the third and fourth years as an option in Group B.

(b) Department of Philosophy.

The following changes in the Department of Philosophy were agreed to by the Faculty Council:

(a) New courses:

Psychology 55, "Educational Psychology"

Psychology 56, "Legal Psychology" for students in the combined course in Arts and Law and also an option in the third and fourth years under Division B.

(b) The following new courses to be incluede in the Calendar but not to be given in the session 1922-23:

Philosophy 108, "History of Philosophical and Scientific Thought" Advanced course.

Education 53, "Modern Educational Systems and Problems".

(c) In the following courses the designations to be changed:

Philosophy 2, from "Social Psychology " to "Introduction to General and Social Psychology".

Psychology 51, from "Advanced General Psychology" to "General and Experimental Psychology".

Psychology 52 from "Social and Racial Psychology " to "Social Psychology and Social Anthropology."

Psychology 54, from "Applied Psychology" to "Industrial Psycholog

Psychology 104, from "Experimental Psychology" to "Advanced General and Experimental Psychology."

Psychology 105, from "Educational Psychology" to "Advanced Educational Psychology."

Education 52, from "Experimental Education" to "Philosophy of Education.

3. A letter of thanks was read from Dr. MacGibbon conveying his appreciation of the honour done him by the Council in electing him one of their representatives on the University Senate for the two year period beginning March 8, 1922.

4. Special Cases.

F. J. Barnecut, who through ill-health was forced to give up his year, asked permission to re-enter the University at the New Year 1923 and that his attendance and test marks up to December 1921 be allowed to stand to his credit. This request was granted.

E. H. Cayford, a Second Year Medical student, petitioned the Council for permission to come up as a candidate for the degree of B.Sc. in 1923 on the completion of his Third Year Medicine, on the basis of 12½ courses to his credit in the Faculty of Arts and Sciences from the University of Saskatchewan. As however the University of Alberta requires 15 courses in the Faculty of Arts plus second year medicine to fulfil the requirements of the Arts degree, and as Mr. Cayford's time does not permit of his making up these deficiencies in the regular way, the Council declined the request. Further the Council was adverse to the principle of granting a degree for less than a year's work done in this institution.

Miss Mertle Morrow who on account of eye trouble has been forced to leave the University for this year petitioned the Council for permission to write off the three junior subjects, for which she is registered, by supplemental examination in September. As this proposal involved serious attendance concessions, the Council did not see its way clear to grant the request, but the suggestion was made that Miss Morrow be allowed to re-enter the University at the New Year and that her attendance and test marks in the autumn of 1921 be counted forward for the session 1922-23. The Council concurred in this suggestion.

Mr. R. H. Sheridan's request to write supplemental examinations in History 58, English 59 and Political Economy 59 was declined.

5. Other business.

The Head of the Department of Classics reported the result of the Jane Alexander Memorial Prize in Latin for 1922 and the Council recommended to the University Senate that the following award be adopted: First: Miss Barbara Villy; Proxime; K. D. McArthur.

Complaint was made that the bells in the Arts and Medical buildings were not exactly synchronizing and the Dean was asked to communicate with the Resident Engineer with respect to this. It was also declared that in certain cases the bells were being stuffed with paper, the sound thus being seriously dimmed. This matter was also to be looked into.

The Council adjourned at 4:45.

W. A. R. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 10 a.m., Monday, May 1. 1922.

There were present: Dean Kerr in the chair and Messrs. Alexander, MacEachran, Lehmann, Sheldon, MacGibbon, Downes, Smith, Gordon, Walker, MacDonald, and Eddy.

The Minutes of the previous meeting were read, approved and signed.

1. The consideration of the Combined Courses in Arts and Engineering and Arts and Architecture was referred on the motion of Messrs. Alexander and Lehmann to the Committee appointed to

report to the General Faculty Council.

2. Letters of thanks from Professors S.D. Killam and H.R.Gaetz were read with respect to their recent election as representatives of the Council on the University Senate. These were gratefully received.

3. Special Cases.

A letter was read from Dean Boyle suggesting in the case of Fetter and Jones, who are students in the Combined Course in Arts and Engineering intending to graduate this year, that on account of the final examinations in Arts being on at the time of the Survey School that the requirements of the Faculty of Arts and Sciences in this case be regarded as complete without a record in the Survey School. This suggestion was concurred in by the Council.

Mr. Harry Fisher who through illness was unable to write the final examinations in Physics 6 and Chemistry 58 asked the Council for aegrotat standing in these two subjects. The Council preferred, however, to grant Mr. Fisher deferred examinations in these subjects in September.

A similar request was received from Mr. W. B. Herbert with respect to History 3 and Political Economy 65 which received the same decision.

Mr. Homer Lebourveau petitioned the Council for permission to carry next year an abnormally large programme of studies in the Faculty of Arts and Sciences with a view to the ultimate fulfilment of the requirements for the Combined Course in Arts and Engineering. Mr. Lebourveau is changing over to the Combined Course from Electrical Engineering owing to the fact that the Fourth Year in Electrical Engineering will not be given in the

session 1922-23. In view of the circumstances the Council was agreeable to Mr. Lebourveau making the attempt on the understanding that he did so entirely on his own responsibility.

Mr. Robert Page asked permission to register next year for seven senior courses thereby cutting his work at the University from four to three years. In view of the excellent record Mr. Page has made up to the present at the University and also in consideration of long service overseas, the Council agreed to this request on the understanding that the University assumed no responsibility for Mr. Page's success in his undertaking.

Mr. Wilfred Wees, who on account of a nervous breakdown was unable to write on any of his final papers, asked for aegrotat standing in his subjects. The Council was of the opinion that in all probability Mr. Wees had undertaken more outside activities than his strength justified and also felt that it would not be possible for him to continue as an Honours student without the evidence afforded by final papers. It was therefore agreed that Mr. Wees be required to write deferred examinations in all his subjects in September.

The Council adjourned at 11:10.

W. L. M. Kerr

A special meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, May 8, 1922 at 10 a.m. to pass on the results of the final examinations.

There were present: Dean Kerr in the chair and Messrs. Alexander, Broadus, MacEachran, Lehmann, Sheldon, Burgess, Gaetz, MacGibbon, Killam, Sonet, Rowan, Campbell, Smith, Walker, McDonald, Eddy, and Race.

The revision committee, consisting of Messrs. Kerr, MacGibbon, Killam and Burt, made the following report with respect to the examinations in the Second, Third and Fourth Years:

Of the graduating class of 89, 83 pass clear, 6 have 1 or 2 supplemental examinations and no aegrotats. The 2nd and 3rd years show no striking failures.

A verbal report from the Freshman Committee showed a failure of 60% in Physics 1, 30% in French and Latin 3, 42% in English 1 as representing the heaviest tolls.

Following this report the following graduands were recommended by the Faculty of Arts and Sciences to the University Senate for their respective degrees:

Bachelor of Arts.

Archibald, Margaret C (with First Rank Honours in Modern Languages)
Bakewell, Edna G.
Beveridge, Belle,
Black, Lois Young,
Bryan, Helen A.,
Butchart, Thelma V (with First Rank Honours in Mathematics)
Cowan, Kate S.,
Diller, Dorothy (with First Class General Standing)
Garrison, Daphne (with First Rank Honours in Philosophy),
Giffen, Blanche,
Kask, Mary Kathleen,
Keith, Helena Dawson,
Kerr, Helena Nesbitt,
Koenig, Daphne L.
LaFleche, Helene M.,
McMillan, Jean Elma,
McQueen, Christina C.,
McQueen, Jean
Miller, Aileen R.
Moore, Hazel Hilda M.,
Nicoll, Jean Kathleen,
Pentland, Lucile G.,
Roscoe, Helen Margaret,
Stafford, Dorothy D.,
Steele, Ivy May,
Suitor, Minnie Hood,
Villy, Margaret Harman (with First Rank Honours in English)
Wershof, Minnie Jennie,
Williams, Cathrine, Lucille,
Wilson, Ivy Snow,
Wilson, Margaret Jane,
Wood, Alethea A.,

Adam, James Don,
Allwork, Charles T. (with First Rank Honours in History)
Broadus, Kemper Hammond,
Chadsey, Louis Colvin,
Charlesworth, Gerald Stuart,
Cousins, Frank Clifford,
Davis, Edward Newton,
Edworthy, Silvanus,
Evans, Russell Wadleigh,
Fetter, Roy Eugene,
Ford, Francis Armour,
Frame, William Edward,
Francis, Arthur Chesley,
Gordon, Clarke Lorin,
Hustler, George Francis,
Jones, Islwyn,
Jones, John Thomas (with Second Rank Honours in English),
Le Page, George F.,
McBrine, Arthur R.,
McCabe, James Osborne,
Macaulay, Archibald Francis,
Miskew, Peter A.,

Morgan, Arthur Robinson,
Nicoll, James McLaren,
Nielson, Sigvald,
Ogston, Alexander Whyte
Pegrum, Dudley Frank (with First Rank Honours in History)
Philp, Donald Francis,
Snider, Edward Cecil,
Stuart, Oliver Leslie,
Stutchbury, Ewart William,
Villett, George Harrison,
Webster, Daniel Alec. Calder,
Wrinch, Leonard Breckon.

Bachelor of Science in Arts.

Cain, Ardis Ruth,
Cain, Pauline Ulva,
Fergusson, Lola May,
McKitrick, Eva Annie,
McLennan, Susan Isabel,
Robson, Helen MacGregor,
Simpson, Maimie Shaw,
Gardiner, Elmslie William (with First Rank Honours in Chemistry)
Good, Lorne (with First Rank Honours in Chemistry)
Hart, Thomas,
McGuire, John,
Manzer, Howard Lee,
Sanderson, James O. G.,
Scroggie, Arthur Galbraith (with First Rank Honours in Chemistry).

Bachelor of Science in Pharmacy.

Swanson, Alice,
Whiteman, Dorothy Frances,
Copeland, Earl Royal Palmer.

PRIZES AND SCHOLARSHIPS.

The Dean read a letter from the secretary of the Lavérendrye Club regarding a Gold Medal in French which the Club proposed to offer to the University of Alberta annually and to be awarded " to the student who receives the highest standing in the general courses in French of the Third and Fourth Year, provided that his record is considered satisfactory by the Council of the Faculty of Arts and Sciences." The Council recommended the acceptance of the Medal to the University Senate.

The award of the following prizes and scholarships was received by the Faculty Council from the Departments concerned and sent forward for ratification to the University Senate:

The Jane Alexander Memorial Prizes:

In Latin: Barbara Lloyd Villy,

In Geology: Reginald Herbert Pegrum.

The Gordon Stanley Fife Memorial Prize.

In History: Dudley Frank Pegrum.

The Samuel Richard Hosford Memorial Prize.

In English: John Thomas Jones.

The Harold Waldo Huestis Memorial Prize.

In English: Barbara Lloyd Villy.

The Vallée French Prize: Louis Adolphe de Savoye.

The French Prize of the Société du Parler Français:

Jack James Saucier.

The French Prize of the Comité Permanent de la Langue Française:

Sister Josephine Herbreteau.

The Alexander Cameron Rutherford Gold Medal in English.

Margaret Harman Villy.

The Club Laverendrye Gold Medal in French:

Margaret Courteen Archibald.

The James Ramsey Gold Medal in Mathematics.

Thelma Victoria Butchart.

Other prizes and scholarships in the Faculty of Arts and Sciences were referred to the Examinations Committee with power for award.

The Council adjourned at 11: 05 a.m.

Addendum.

The report of the Examinations Committee re Prizes was as follows :

Scholarship of the Alberta Pharmaceutical Association.

Degree course, Third Year: Amy Eleanor Garbutt.

The Women's University Club Gold Medal.

For Proficiency in the Faculty of Arts and Sciences,

Dorothy Diller.

The Alberta Pharmaceutical Association Gold Medal in Pharmacy.

Degree course, (Not awarded).

First Class General Standing, Faculty of Arts and Sciences.

Fourth Year: Dorothy Diller.

Second Year: John MacIntyre Cassels, George Salt.

W. A. M. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 10:00 a.m., Saturday, July 29, 1922.

There were present: Dean Kerr in the chair, and Messrs. MacEaachran, Lehmann, Sheldon, Killam, Burt, Sonet, Walker, Pelluet, Macdonald and Teviotdale.

1. The minutes of the previous meeting were read, approved and signed.

2. The reports on the appeals for the re-reading of papers in English 1 and 2 were considered and approved as follows:

R.R.Mitchell: granted a pass mark
J.A.Swanson: mark remains the same
Thomas Clarke: mark reduced from 42 to 32.

3. Requests arising out of the registrations for Summer School were considered:

G.W.O'Meara: who had taken lectures in History 2, parts 1 and 2, in the summer of 1921 and failed. He asked permission to devote the summer of 1922 to the study of History 2 alone. Granted.

N.G. Bowles asked permission to devote the summer to History 2, parts 1 and 2 with a view to having extra time to spend on languages during the session of 1922-23. Granted.

4. The Dean invited a discussion of the marking and inter-relations of the

final examinations for the Summer Session half courses. After a general discussion it was moved by Dr. Lehmann, seconded by Dr. Walker and agreed that the first half of a course studied be considered as equivalent to a test, regardless of the order in which parts 1 or 2 are taken. The test is to count 30% and a three hour paper covering both halves counting 70% is to be written to secure credit for the course in full. (See Addendum Page 19)

It was also agreed to recommend to the General Council that the one-eighth absence rule be not applicable to the Summer Session.

Special Cases.

C. A. Edwards requested an early examination in Latin 1 and 3, 1st half, in order that he might return to his school on time, having only five weeks holidays. This request was refused, but it was pointed out that Mr. Edwards could write a supplemental. It was moved by Dr. Sheldon, seconded by Professor Burt that Mr. Edwards be required to write a special examination on appearing at the Summer School next year, if he had not made arrangements for an examination in the meantime. Agreed.

A.M.Revellrequested permission to take Latin 1 and 3, second half, and French 1 and 2, second half, to cover his first year language requirements. Request was refused with the suggestion that he take both halves of Latin 1 and 3.

Sister Barry requested permission to write the examination in French 5 and 4; part 1, without attendance. This request was refused.

Owing to the fact that Miss Hyndman was unable to write the final examination in French 1 and 3 at the end of the session of 1921-22, she was granted a supplemental at the end of the summer session in lieu of a regular examination. In this connection it was moved by Dr. Lehmann, seconded by Dr. Walker, that this be nor established as a precedent. Agreed.

Mrs. Scott, who is registered only in the Second Half of French 1 and 3, requested to be allowed to take the examinations in both halves of the course. Reques was refused.

Nahum Hardin requested that Hebrew 51 be allowed instead of English 2 as credit on his University course. This request was refused.

Arrangements for the closing of the Summer Session were then discussed. Professor Burt moved that Saturday afternoon be named as the last day. This was seconded by Dr. Sheldon. Motion was lost. Dr. Killam, seconded by Dr. MacEachran, moved that the examinations close at noon Saturday. Motion carried.

On this basis the Examinations Committee was instructed to draw up an examination time-table, every effort to be made to save the Thursday afternoon for lectures for departments desiring this time.

The meeting adjourned at 11:25.

W. S. M. Kerr

Addendum. (See page 18)

It was subsequently agreed that when both halves of a given course are taken concurrently by a student, each half course should be marked on an equal basis.

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Tuesday, August 15, 1922, at 10 a.m.

There were present: Dean Kerr in the chair and Messrs. Alexander, Lehmann, Killam, Burt and Teviotdale.

The minutes of the last meeting were read, approved and signed.

1. Summer Session Examinations.

The results of the Summer School Examinations were approved

in the following subjects:

Chemistry: Parts 1 & 2.

Education 53, complete half-course.

French 1 Parts 1 & 2.

3 " 1 & 2

4 " 1 & 2

5 " 1 & 2

History 2 Parts 1 & 2

Math 1 Parts 1 & 2

Math 7 " 1 & 2

Math 62 " 1 & 2

Physics 1 " 1 & 2

Psychol. 55 Part 1

Psychol. 51 " 1

In the case of History 2 the marks of Mr. O'Meara and Mr. Bowles were referred back to the Dep't of History and with its consent were raised from 45 to 51 and 44 to 50 respectively.

2. The results in Latin were not ready for approval but were referred by the Council to a committee composed of Dr.Kerr, Dr. Alex and Mr. Teviotdale for action.

3. Special Cases.

Miss Nora Drader, who had registered in both parts of Latin 1 and 3 at the Summer Session and on account of the death of her mother was forced to give up her course, asked permission to write a special examination in the work under the supervision of the University of B. C. This request, on Dr. Alexander's recommendation, was granted.

Mr. Jack McClung, who has credit for Political Economy 1 over and above the requirements of the second year, asked permission to have it count as a senior course. As Mr. McClung obtained

85% in this subject and in view of the fact that the subject matter of the course was identical with that of Political Economy 59 at the time of enrolment, the Council granted this request.

Mr. S. L. Galbraith, who lacks Latin 2 and 4 and wishing two of the requisites for the degree of B. A. at the University of Alberta, asked that he be allowed to do equivalent work at the University of Chicago and obtain his degree for Alberta. The Council decided that if Mr. Galbraith intended to study at Chicago a transcript of his work here should be forwarded to that institution and the degree taken from Chicago University.

4. The following resolutions adopted by the General Faculty Council at its last meeting were read and approved:

(a) "That when a special supplemental is required by any Faculty Council, the Secretary of the Council shall notify the Committee on Examinations to set a date in accordance with the requirement. The Committee shall then notify the student of the date, and if the student fails to appear for the examination, this Committee shall report the student as having failed, and the Faculty Council shall discipline the student accordingly."

(b) "That the quorum for each Faculty Council be 40% of the persons eligible to attend, with the proviso that, in the summer, the members of the Faculty who are available have power to deal with matters that arise."

The meeting adjourned at 10:50.

W. A. R. Kerr

22

A special meeting of the Council of Arts and Sciences was held in the Senate Chamber on Saturday, September 23, 1922 at 10 o'clock.

There were present: Dean Kerr in the chair, President Tory, Messrs. MacEachran, Lehmann, Sheldon, Lewis, Gaetz, Killam, Burt, Sonet, Campbell, Smith, Rowan, Long, Pelluet, Walker, MacDonald, McGoun, Miss Patrick, Mr. Race.

1. The minutes of the previous meeting were read and approved.

2. A discussion occurred over the phrase used in section 4a of the minutes: "The Faculty Council shall discipline the student accordingly The sense of the word "discipline" seeming obscure, the phrase was referred back to the General Council for interpretation.

3. The Council concurred in the proposal that Entomology 51 at present as course in the Faculty of Agriculture, should be listed hereafter as a senior option in the Faculty of Arts, with the proviso that in order to co-ordinate the course with courses in the other Scientific Departments, it should be raised in time from two hours to admit of three hours lectures and three hours laboratory. It was further agreed that for the current session, registration should be restricted to the group of teachers who had asked that the work be given.

Special Cases.

Sister Hickey asked if the Council would re-consider the case of Sister Barry with a view to letting her take a supplemental at this time in French 5 and 4. During the summer school session she took French 5 and 4 part 1 and was permitted to attend French 5 and 4 part2. A temporary committee had accepted her registration, with the understanding that an examination to verify her claim to having covered the work should be given. This was omitted for some unexplained reason and Sister Barry continued to attend the course. It was

moved by Prof. Gaetz and seconded by Prof. Sonet, that in view of this fact and because of her ability to go on with the work in French, the Council permit her to write the supplemental. Carried.

Harry Fisher. due to illness in the spring, had deferred examinations in Physics 6 and Chemistry 58. He was writing Physics, but owing to heavy school duties in the summer, he had been unable to prepare the Chemistry. He requested permission to come in after Xmas and take up the Chemistry at that time. It was moved by Dr. Lehmann, seconded by Dr. Walker that the request be granted.- Carried.

Sister Herbreteau and Sister Hayes requested a renewal of the privilege accorded to them for the past two years, namely that of substitution for each other one lecture per week in the following courses: English 57, History 58 and French 51. As both are teachers and students with excellent records, it was moved by Mr. Burt, seconded by Dr. Walker that the petition be granted, subject to concurrence of the departments concerned. Carried.

Mr. E. Butchart failed to take History 57 in the year in which it was offered, for the Arts and Law course, and now wishes to make a substitution other than History 58, which he must take for his Arts degree. As he had himself taken liberties with the prescribed course, it was moved by Mr. Burt, seconded by Mr. Long that the petition be refused. - Carried.

4. The question of gowns was again brought up, as students were making inquiries. After a discussion it was moved that the General Faculty be asked to rescind the motion requiring the wearing of gowns in the third and fourth years, unless the fourth year desired to wear them.

The meeting adjourned at 10.55.

W. T. A. Kerr

The regular meeting of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, October 2, 1922 at 4.30.

There were present: Dean Kerr in the chair, Messrs. MacEachran, Lehmann, Sheldon, Boyle, Gaetz, McGibbon, Killam, Gordon, Campbell, Smith, Rowan, Long, Pelluet, Walker, MacDonald, Eddy, McGoun, Miss Patrick.

1. The minutes of the last meeting were read and as slightly amended were approved and signed.

2. Special Cases.

Wilfred Wees requested that as Zoology 1 is one of the subjects he was recommended to take in his Honors Psychology, it be considered a senior course. Further he desired exemption from one hour of the laboratory course, as it clashed with Philosophy 52. These questions were referred to the Honors Committee.

C. G. Edwards, a student in the combined course of Arts and Architecture, asks that German be accepted in lieu of French, with the addition of either Physics 6 or 8 or 12. Secondly, on the grounds that Ancient History overlaps Classical Philology, he asks permission to substitute Mathmatics 55. As this petition was concurred in by Professor Burgess, it was moved by Messrs. Sheldon and Lehmann that it be granted. - Carried.

Kenneth Cundal asked permission to take Geology 32 and one lecture per week in Geology 51, plus the laboratory in the latter course, in lieu of Geology 51 as an entire course. As this had the approval of Dr. Allan, it was moved by Messrs. Boyle and MxGibbon that the petition be granted, with the understanding that he write the examination in Geology 51.

3. It being impossible to give Botany 51 this year, due to the inability to secure necessary addition to the staff inthe

Department of Botany, it was moved by Messrs. Gaetz and Lehmann that for this session, students should take the ~~laboratory~~ lectures in Chemistry 51 and both laboratory work and lectures in Chemistry 58. -Carried.

4. The Council agreed that the marks of the supplemental examinations should be made permanent and published on the authority of the heads of the departments concerned.

The meeting adjourned at 5.10 p.m.

W. L. M. Kerr

A special meeting of the Faculty of Arts and Sciences was held in the Senate Chamber, on Wednesday, October 11, 1922 at 4.30.

There were present: President Tory, Dean Kerr in the chair, Messrs. MacEachran, Lehmann, Sheldon, Coar, Gaetz, MacGibbon, Downs, Killam, Gordon, Burt, Sonet, Miss Misener, Campbell, Smith, Rowan, Long, Pelluet, Walker, MacDonald, McGoun, Miss Patrick, Mr. Race.

1. The minutes of the last meeting were read and approved.

2. The following students, having completed the requirements laid down in the calendar, were recommended to the Senate for their respective degrees.

R. B. Hall, who had passed a supplemental in English 55, with 52%, for the degree of Bachelor of Arts.

A. C. Varnum having passed Chemistry 1, for the degree of Bachelor of Arts.

W. V. Drake, who had passed Mathematics 55, for the degree of Bachelo of Science in Arts. It was subsequently moved by Messrs. Lehmann and Walker, in view of the fact that the course failed in was in a subordinate subject, that the be granted second rank honors in

Chemistry. This was carried, with the understanding that the action was not to become a precedent in respect to Honors students who fail in any one course.

Special Cases:

A. M. Simpson was reported clear for his degree except for Latin 3. He had passed Latin 31 and Latin A. In his third year he tried Grade XII Latin and passed the authors with 61% but failed in the Composition with 31%. He requested that he be granted a pass in this subject. The Council refused this request.

J. K. English had outstanding deficiencies in English 52, Architecture 62, Chemistry 52 and History 57. He passed supplementals in all these courses except History 57, in which he made only 43%. He petitioned the Council to reconsider the mark. As his marks in the other supplementals were all low, the Council decided to let the mark in History stand. As Mr. English had not known the decision in time to make application for a special examination, it was agreed that a special examination might be set for him, the time to be decided by the Examinations Committee in consultation with the Department of History and Mr. English.

Miss Helen Porter was a student last year and had a good record, but prior to the examinations she fell ill. On account of a protracted recovery, she was not allowed to study during the summer and so was not ina position to write the supplementals. She asked the Council, therefore, to grant her some of her subjects of her second year. A letter of recommendation was read from Mr. C.O. Hicks, the Principal of the Victoria High School. The Council agreed to allow her to proceed with sequent courses in three of the subjects she studied last year and if satisfactory marks were made this session, credit would be given for these subjects in her second year. On this basis it was left in the hands of the Dean

to arrange her course in consultation with Miss Porter.

George Wilson needed two subjects to graduate. He enrolled in Biochemistry 61 and Chemistry 51, but would prefer, in place of the Biochemistry, Zoology 1, weighted to count as a senior course, as he intends to teach Science in the High Schools. There being at present no senior courses in Zoology and the Department concerned being agreeable, the Council granted the request.

Miss Goldie Simenstin asks to be allowed to take English 57 on Tuesday evening at 7.30 and Saturday morning, in place of Monday evening at 7.30, when it clashes with Psychology 55. This involves a slight loss of attendance, but as she had formerly attended all the lectures in this course, and as the Department was agreeable, her request was granted.

J. S. Madill petitioned that, on account of time-table difficulties, he might fulfil the requirements of attendance in Mathematics 1, by taking the lectures in Math. 2 at 10.30 on Friday morning and in Math. 1 at 2.30 Friday afternoon. The Department concurring, the petition was granted, with the understanding that he should turn in promptly all work required by the instructor in Mathematics 1.

4. Dr. Lehmann reported for the Honors Committee. The recommendations of the Committee were endorsed by the Council as follows:

William P. Campbell. Fourth Year. Courses approved for the current session: Chemistry 102, Chemistry 54, Physics 54, Mathematics 57 - for Honors in Chemistry.

James B. Mair. Fourth Year, Honors Chemistry. Mair was a demonstrator last year and took part of his final honors last year. Only one subject remains for this year - Physics 12. He desires, however, to take Chemistry 103 and Mathematics 57 in addition to this. Courses approved: Physics 54 (as Physics 12 is not being

given this year) Chemistry 103 and Math. 57.

Miss Helen Geddes. Fourth year; Honors in Classics. Owing to a deficiency in Greek, she was permitted to take Greek 2 and 4 as an extra last year and to exchange Greek 51 of the third year with Latin 53 of the Fourth year. Courses approved for the current session: Latin 104, 111, and 113. Greek 51 and 52. Philosophy 53.

Earnest L. Churchill. Fourth Year; Honors in Mathematics. Courses approved: Mathematics 101, 103, 106 and 110; Math. 53 and 58; Physics 54.

M. E. Jean-Richard. Fourth Year; Honors in Modern languages. Owing to a deficiency in German, he had to take German 2 and 4 in the third year, German 3 of the first year to be covered by German 4 of the second year and German52 of the third year to be taken as an extra in the fourth year. Courses approved for the current session: German 51, French 101 and 102. French 51 and 55; Philosophy 53.

Miss Dorothy Richards had a registration exactly similar to that of Mr. Jean-Richards but for some unexplained reason it had had not come before the Committee. This registration, to wit: German 51, French 101 and 102, French 51 and 55; History 54.

Wilfred R. Wees. Fourth Year. Honors in Philosophy. As Professor MacEachran desired this candidate to take Zoology, Professor Rowan declared his readiness to give extra laboratory work to make this course equivalent to a senior course. Professor MacEachran also requested the Faculty Council to grant him permission to give Mr. Wees extra work in Philosophy 53, to make up for an hour's non-attendance per week, due to a time-table clash. This was granted and his course was approved as follows: Psychology 104, and 55; Philosophy 53; Zoology 1, weighted to count as a senior course.

Geoffrey B. Taylor. Fourth Year; honors in Physics. Courses approved: Physics 54 and 57; Mathematics 58, Philosophy 53.

George Salt. Third Year; Honors in Botany. Owing to the Department of Botany being undermanned this session, the following program, though not technically in accord with the strict requirements of the calendar, was sanctioned: Third Year: Botany 51, Chemistry 54, 52; Geology 51. Fourth Year: Botany 101, 102, 52. Biochemistry 61.

Walter M. Kutz. Third Year. Honors in Chemistry. Courses for the current year: Chemistry 101, 51 and 58; Mathematics 55.

Miss Dorothy MacLean. Third Year. Honors English. Miss MacLean took her first two years at the University of Manitoba and brought letters from the Department of English there, recommending her as a candidated for honors. The Registrar sent a statement of her marks, showing a clear record for her first two years; courses approved: English 106, 60 and 53; History 54.

Miss Barbara Villy. Third Year; Honors in English. In view of her record and the fact that she is asking for another course in the subject in which she is taking honors, the Council permitted her to take English 60 as an extra. Courses approved: English 106, 53 and 60; French 51; Psychology 52.

Miss Hilda Hobbs. Third Year. Honors History. Courses approved: History 101 and 58; Political Economy 63; English 57.

K. D. McArthur. Third Year; Honors in History. Courses approved: History 101, 58; Political Economy 63; English 53.

Miss Kathleen M. Macnab. Third Year. Honors History . Miss Macnab had failed in French 1, in Grade XII, so it would be contrary to rules to permit her to register as an honors student in her third year. But in view of the fact that it is impossible for her to secure a Specialist's Certificate without having taken honors,

and as the Department of History was willing to accept her as an honors student, her registration was accepted and the following courses approved: History 101, 58; Political Economy 63; French 1 and 3; English 53.

Miss Muriel M. Gratz. Third Year. Honors in Mathematics. Courses approved: Mathematics 101, 103, 106 and 110, 61 and 57. Physics 54.

Miss Marjorie Bradford. Third Year; Honors in Mathematics. Miss Bradford applied for honors last year, but dropped the major part of her honors course. The Department of Mathematics recommends her for honors this year. Courses approved; Mathematics 101, 103. 106, 110 and 62; Geology 51 and Chemistry 1, to enable her to take Physics 54 next year.

Miss Muriel Heathcote. Third Year; Honors in Modern Languages. Miss Heathcote entered deficient in German. Courses approved for this session: French 51 and 55; English 57; German 2 and 4.

John Cassels. Third Year. Honors in Political Economy. In view of his standing in his second year, the Council permits him to take History 56 as an extra, with the proviso that if his work falls off, the subject is to be dropped. Courses approved for this session: Political Economy 102, Political Economy 63 and 55; English 53; History 56.

5. A discussion arose in regard to the relation of Specialist's Certificates and Honors Courses. The Chairman was given power to appoint a committee to study the subject.

The meeting adjourned at 6.30 p.m.

W. T. A. Kerr

The regular monthly meeting of the Council was held in Room 235 Arts at 4:30 p.m. November 7, 1922.

There were present: Dean Kerr in the chair, Professor MacEachran, Dean Boyle, Professor Allan, Professor Coar, Professor Gaetz, Prof. MacGibbon, Prof. Gordon, Prof. Burt, Prof. Campbell, Assoc. Prof. Smith, Assoc. Prof. Rowan, Sst. Prof. Eddy, Asst. Prof McGoun, Miss Patrick, Mr. Race.

The minutes of the previous meeting were read, approved and signed.

The following agenda was then proceeded with:

1. Business arising out of minutes:

The Dean reported that the following committee had been named to deal with the question of the relation between honors courses and the Specialists' Certificates: Dean Kerr chairman, President Tory, Professor Lehmann, Professor Killam, Professor Burt, Owing to the absence of President Tory from the city, the committee had not yet met, but would be called together as soon as President Tory returned from the East.

2. A communication from the Department of Physics was read, informing the Council that by authority already granted by the Council, the following system of tests had been put in operation for Physics 1: five monthly tests, to be held during the session, and each of these tests to be assigned 10% of the credit of the course, the remaining 50% to be assigned to the final examination.

3. On behalf of the Department of Modern Languages, Professor Coar reminded the Council that permission was given last year to have as many as 5 hours per week in the A language classes. It had proved impossible to utilize this permission owing to the crowded condition of the time-table. The Department asked however

for leave to require weak students in the A classes to present attendance for an additional period per week for drill and review work, it being understood that there would be no increase in the content of the course itself. The Council agreed to this request.

4. The report of University Departments on Special Supplemental Examinations held in English 55, Historyl, History 57, Math.1 and Math. 22, were received and confirmed.

5. Special Cases:

W. J. Clements petitioned that he be given a pass in the lab part of Physics 1. Following a statement by Dean Boyle the petition was refused.

A. F. Dunn, a student at Alberta College South carrying five subjects to complete his matriculation, preparatory to taking the combined course in Arts and Medicine, asked permission to enroll for German A. As Alberta College is not teaching German, and as the petition was supported by Mr. Laycock, the request was granted. The condition was made that as Mr. Dunn would enter the course a month late, he would do so at his own risk.

Miss May MacEachran had a clash between English 53 and Physiology 61 lab. and asked permission to leave the lab period for one hour and complete the laboratory work later. As Professor Downs of the Department of Physiology wrote expressing agreement to this proposal the Council granted the request.

Miss Lola Scott asked permission to take Latin 36 without attendance. As Miss Scott had now transferred from the degree to the licensing course in Pharmacy, the request was referred to the School of Pharmacy. It was noted however, if Miss Scott returns, as she says she intends to resume work for the degree course, this action involves no permission of exemption from attendance at a later date in Latin 66 for this course in the Faculty of Arts corresponds

to Latin 36 in the School of Pharmacy.

W. S. Thompson applied for a re-reading of his final spring paper in English 1. A report signed by Professors Broadus and Gordon confirmed the original mark and the Council approved.

The Council adjourned at 5:10 p.m.

W. A. M. Kerr

The regular monthly meeting of the Council was held in the Senate Chamber at 4:30 p.m., Monday, December 4, 1922.

There were present: Dean Kerr in the chair, Professors Alexande Lehmann, Sheldon, Coar, Gaetz, MacGibbon, Burt; Associate Professors Misener, Campbell, Rowan; Assistant-Professors Long, Walker, McGoun, and Miss Patrick and Mr. Race.

The minutes of the previous meeting having been read, approved and signed, the following agenda was proceeded with.

1. A communication from the Department of Chemistry .

On the grounds that Chemistry 59 was a purely laboratory course of 6 hours, the Department of Chemistry asked permission, with respect to this course, to give no test examination, but to evaluate the standing of students on the basis of 50% for the final examination and 50% for the laboratory work. The Council concurred in this request.

2. Special Cases:

B. J. Mair who has only one subject to complete for his degree in Honors Chemistry, asked that Mathematics 57 be carried in lieu of Physics 54. As the Committee on Honors had already approved of the substitution, the Council granted the petition.

Shirley Macdonald who failed in three subjects last spring, to wit English 2, Political Economy 1, Physics 1, session 1921-22, and who had taken no supplemental examinations, petitioned that he be allowed to re-enter the University at the New Year, 1923 and proceed with the above-named courses. In view of the circumstances detailed in Mr. Macdonald's letter, the Council granted his request. It is understood, however, that Mr. Macdonald's registration is to be strictly limited to the three subjects mentioned.

Homer Lebourveau. In view of the fact that Mr. Lebourveau was short and hour and a half in his program looking to the completion of the requirements of the degree of B.A., in the combined course of Arts and Sciences, the Council agreed to grant him late attendance into Architecture 61, as from November 17. Dean Boyle, Professor Burgess had already agreed to this arrangement.

Clifford Underwood. In order to graduate, Mr. Underwood petitioned for late entrance into Geology 51, as from November 27 and to be allowed also to count this subject as a second year science. The Council granted Mr. Underwood's request.

H. R. C. Boyd decided to prepare for Honors Modern Languages and asked for late entrance into German A, as from November 24, and also for permission to transfer from Political Economy 1, to History 2, his attendance in the former subject to be credited to the latter. The Council granted the request.

Jean H. Williamson, deciding to prepare for Honors in Modern Languages, requested late entrance into German A, as from November 24. The Committee concurred in the request.

Helen Carswell, wishing to transfer from Household Economics to Honors Moderns, asked for late entrance into German A. As her record in other subjects was only fair, and as the question of a transfer from Political Economy1 to History 2 was also involved, the arrangement of her course was left in the hands of the Dean.

Addendum. On the Dean's again going over with Miss Carswell the question of the proposed transfer from Household Economics to Honors Moderns, it was agreed that it would be wiser for her to complete her present year in Household Economics and make a clean start, if she is still in the same mind, in Honors Moderns, next session. She hopes to get up matriculation German next summer and write it off at the September matriculation examinations.

R. A. Cameron petitioned for a special examination in History 57, which he failed in April, 1922. Owing to illness, it was impossible for him to take the regular supplemental in September, and unreadiness to take a special supplemental at the time set by the Examinations Committee, Mr. Cameron petitioned for an examination subsequent to the Christmas vacation. Although Mr. Cameron's scholastic record has materially improved this session, general disapproval was expressed of his attitude towards History 57. The Council, however, agreed that he should be granted a special supplemental, but that this should take place at the time of the regular examinations in the spring of 1923.

The Council adjourned at 5:15 p.m.

W. S. H. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 10 a.m. on Wednesday, January 3, 1923.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Lehmann, Boyle, MacGibbon, Killam, Gordon, Burt, Strickland; Associate Professors: Sonet, Misener, Campbell, Smith, Rowan; Assistant-Professors Long, Walker, Eddy, McGoun and Mr. Race.

The minutes of the previous meeting were read and approved.

After the confirmation of the minutes, the Dean referred to the death of Professor H. H. Gaetz, which had occurred since the last meeting of the Council. The members present joined in the expressio of regret at the premature loss of a valued and respected colleague and friend. Professor Gordon and the Dean were appointed as a committee to draw up a resolution of sympathy with Professor Gaetz' family.

2C/4
1922
a.c.o.

The following agenda was then proceeded with:

1. A communication from the Department of Household Economics requested permission, in accordance with the practice followed in many sister institutions, to have each fourth year student in this Department prepare and serve meals for four consecutive days. In order to make this requirement possible, the Department asked that the meal work count for attendance at Household Economics laboratory and lecture periods during the week in which the work is done. The Council concurred in the request.

2. F. E. Read, a first year student desirous of reading for honors in Classics, had not enrolled in Latin 1&3. In order to overtake this deficiency he had registered with the Correspondence Department

His request for transfer from the Correspondence Department to the regular classes in Latin 1&3, endorsed by the Department of Classics, was granted by the Council.

3. Christmas examination results in the following subjects: Geology 33, Geology 55, Household Economics 2, Household Economics 58, Mathematics 106, and Physics 3, were approved and authorized for publication.

4. Report of the Committee re Honours Courses and Specialists' Certificates. The following report was submitted by the Dean as Chairman of the Committee appointed to review the relations of Honours Courses to Specialists' Certificates:

Honours Courses, when revised after the war, were planned with a view chiefly to meet the wants of students looking forward to taking graduate work and involved therefore, a fairly high degree of specialization and somewhat rigid entrance requirements.

Last year the Department of Education agreed to grant a Specialists' Certificate, similar to that issued in Ontario, to our students who graduate with honours in a given department and carry also certain associated courses. This fact seems to necessitate a review of the requirements for honours, as present regulations tend to shut out from honors courses - and hence from the possibility of securing a Specialists' Certificate - a number of students who, while perhaps unfitted to go forward to advanced graduate work, are excellent material for High School teachers. Apart from the injustice done our students, it is obviously in the interest of this University that the High Schools of the Province should be manned as fully as possible by our own graduates.

Your committee commends, therefore, the following points to the consideration of the Faculty Council:

1. A review by the departments of the present requirements for Honours Courses with a view to the permissive broadening of the scope of these courses in the interests of prospective High School specialists, it being understood that the present intensive arrangement should also be retained.

2. The possibility of entering Honours as of right, on second class standing or with deficiencies or conditions - compare Miss Kathleen Macnab. It is proposed that certain powers at least of recommendation, be given to the Honours Committee as to the waiving of conditions in individual cases.

3. The desirability of inducing prospective candidates for Honours to consult the Head of the Department concerned and the Honours

Committee at the beginning, if possible of the second year, or at as early a date as feasible thereafter.

In the agreement with respect to Specialists' Certificates come to between the Department of Education and the University (see Vol. II page 227), the following groupings were adopted:

1. Science (Biology, Chemistry, and Physics.)
2. Classics and History.
3. Mathematics and Physics.
4. Moderns and History.
5. English and History.
6. English and Moderns.

A general discussion was indulged in on the basis of this report, during which the following points, amongst others, came to the surface: the possibility of requiring Grade XII or its equivalent as entrance to Honors Courses. Professor Alexander stated that this procedure, he believed was likely to be put into practice in Manitoba. It was pointed out by Professor MacGibbon if students were to be admitted normally from second class standing to Honors Courses, they should have at least a good second class standing. It was further the general opinion of those present that such a student should also possess a good general record in all subjects.

It was thought also, if there were greater flexibility in respect to entrance, the number of students taking honors would be appreciably increased. From the point of view of economy of teaching this was thought to be a distinct gain as the present position of the University - the giving of advanced work by senior men to classes consisting sometimes of one student, is perhaps difficult to defend.

As Economics is to become, in the revised High School curriculum, a subject of study in Grades XI and XII, Professor MacGibbon suggested that a new group, consisting of History and Economics be added to the list for Specialists Certificates.

Professor MacGibbon was asked to act as chairman of the meeting of the Departments of Political Economy and History, with a view to drawing up a possible course for Specialists' Certificates in these two subjects.

Mr. Race also suggested that a Specialist Certificate in Commercial work be also introduced, and on behalf of Miss Patrick, who was absent, suggested further that an effort be made to secure also the establishment of a Specialist Certificate in Household Economics. These three proposals were referred to the Committee composed of the members of the Council who were also members of the Joint Examinations Board, with the request that this be taken up with the Department of Education.

Approving of the general plan, in the report, the Council, on the suggestion of President Tory, ordered that sub-committees of the Departments concerned in each of the Specialist groups, should be convened and report back as to what changes might be made with a view to bringing their requirements into harmony with the principle of the report. The first Department named in any group was to act as the convening department. It was further agreed that the general report should now be referred back to the committee submitting it, with the request that in the light of the discussion, definite recommendations should be brought back for the next meeting of the Council.

The Council adjourned at 12 p.m. W. A. A. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 4:30 p.m. Monday, February 5, 1923.

There were present: Dean Kerr in the chair, Professors Alexander, Broadus, Lehmann, Sheldon, Boyle, Coar, MacGibbon, Killam, Burt; Associate Professors Misener, Campbell, Smith; Assistant Professors Long, Walker, Macdonald, Eddy, McGoun and Miss Patrick.

The minutes of the previous meeting having been read and approved, the following agenda was proceeded with:

Business arising from the minutes:

1. A letter of condolence to Mrs. Gaetz, drafted by the committee appointed at the previous meeting together with a reply from Mrs. Gaetz was read. This correspondence was ordered by the Council to be inserted in the minutes and follows herewith:

Resolved that the members of the Faculty of Arts and Sciences record their feeling that by the death of Halley Hamilton Gaetz, first Professor of Pharmacy in the University, they have lost a colleague whose wide intellectual attainments, sound judgment and genial gifts of character were highly valued and will be greatly missed. The members of this Council wish also to express their deep sympathy with Mrs. Gaetz and the members of their family in their bereavement.

It is further resolved that a copy of the foregoing resolution be sent to Mrs. Gaetz.

Dear Dr. Kerr:-

Will you kindly convey to the members of the Faculty of Arts and Sciences my very warm thanks for their kind resolution, and sympathy, which I received from you a few days ago?

Sincerely,

(Signed) C. E. Gaetz.

2. The Committee re Honors Courses and Specialists' Certificates reported progress.

3. Reports from the Departmental sub-committees re groups for Specialists' Certificates were submitted on behalf of the following groups: Mathematics and Physics, Moderns and History, English and History, English and Moderns, Economics and History. As the revised report of the General Committee was not yet ready and as certain departmental groups had not been able to submit their reports, the whole matter was left until the next meeting of the Council, it being understood that in the meantime such group reports as were ready should be mimeographed and issued to the members of the Council.

4. Proposed B.Com. with Honors in Political Economy.

The Dean stated that the question had arisen as to the possibility of granting honors in Political Economy in connection with the Bachelor of Commerce course. In order to expedite consideration of this question, he had asked Professor MacGibbon to work with him in preparing the facts in the matter for the Council. He then asked Professor MacGibbon to lay the data before the meeting. Professor MacGibbon explained that a comparative examination of the Bachelor of Commerce course and honors in the Department of Political Economy showed that it would be possible, by adding Psychology 2 in the second year and an additional senior option, to meet the prescriptions of both courses. There was one further consideration, to wit: the recognition of Mathematics 61 - Theory of Finance, and Mathematics 62 - Statistics, as possible senior options in the Department of Political Economy. This however would not raise any difficulty as the Department of Political Economy intended to propose, in any case, that these two courses should be so recognized.

After some discussion it was moved by Professor Mac-Gibbon and seconded by Professor Sheldon that the course for B. Com. with honors in Political Economy as outlined above should receive the approval of the Council. Carried.

4. Confirmation of the action of the Dean in authorizing the publication of the Christmas examination results in Hygiene 51 and Bacteriology 61 was given by the Council.

5. Only one nomination to fill the unexpired term on the Senate of the late Professor Gaetz having been received - that of Professor Downs, Professor Downs was declared elected by acclamation.

6. Special Cases.

Miss Edythe Broadfoot had been obliged, through ill health to drop out at the close of the autumn term, 1922. She asked permission from the Council to re-enter the University at the new year, 1924. This permission, on the motion of Professor Alexander and Assistant Professor Long, was granted.

Cedric Edwards a student in the combined course in Arts and Architecture asked permission from the Council, in October last, to substitute Physics 6 or 8 or 12 for French 1 and 3. Not being able, through time-table difficulties to enter Physics 6 or 8, and Physics 12 not being given, Mr. Edwards, without securing authority, enrolled in English 59. As a card was issued for English 59 from the office, Mr. Edwards apparently thought his courses had received sanction. After some discussion, and it being clear that the Department of Architecture was agreeable, the Council consented to the substitution, in Mr. Edward's case, of English 59 for the required course in Physics.

H. A. Connor, who had been obliged to drop his course in Arts for Engineering, asked to be allowed late entrance at the new year, 1923. As Mr. Connor proposed only to enroll in French A, Physics 1 and Mathematics 2 - the only subjects necessary to clear up his entrance into Applied Science - and as it was understood that he would repeat the laboratory in Physics 1 and would secure tutorial assistance in first year French, the Council concurred in the request.

7. Statistics showing the results of the Christmas tests in the third and fourth years were already issued to the members of the Council and were now discussed. It was stated that further statistics of the results in each course had been prepared and were ready for distribution.

8. Professor Broadus requested permission, on behalf of the Department of English to make certain transfers of courses. The Department proposes to discontinue English 55, a History of Literary Criticism, as an ordinary senior option and to transfer it to the honors group and also to replace it as a senior option with a course in Chaucer, the latter to be transferred from the honors group. English 106 would be styled as a conference course, the topics to be arranged with the instructor. The principle of these requests was approved by the Council. Detailed adjustments were left in the hands of the Department of English and the Dean, the results to be reported at the next meeting.

Professor Broadus also asked, on behalf of the Department of English, that for prerequisites for honors in English, in group A, Latin and French be specified in place of the present foreign language and a free option, and in group B, that Latin and French be specified in place of Latin or French and a free option.

Professor Coar objected that the proposal involved discrimination against German. After some discussion, the matter, at the suggestion of the Chairman, was left for consideration and report to a committee consisting of Professor Broadus, Professor Alexander and Professor Coar.

The meeting adjourned at 5:40 p.m.

Addendum

Standing of Third Year Students - December tests 1922.

Number of students failing in one subject - 35

Number of students failing in two subjects - 17

Number of students failing in more than two subjects - 2.

W. A. H. Kerr

The regular monthly meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday March 5, 1923.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Broadus, MacEachran, Lehmann, Sheldon, Lewis, Boyle, Allan, Coar, MacGibbon, Killam, Burt; Associate Professors Sonet, Campbell, Smith, Rowan, Long, Walker, MacDonald, Eddy; Assistant-Professors McGoun, Owen, MacPhee; Miss Patrick, Mr. Race.

1. The reports of the previous meeting were read and approved.

Before proceeding with the agenda, the Dean introduced Assistant-Professor Francis Owen and Assistant-Professor E. D. MacPhee, who owing to a recent promotion had become new members of the Faculty Council. These two gentlemen were warmly welcomed.

Business arising out of the minutes:

1. Professor Broadus reported that the Department of English and the Dean had arranged the details of the transfer of certain courses in the Department of English, a formal report to be turned in at the next meeting of the Council.

2. Professor Broadus reported on behalf of the Committee appointed to consider the question of certain prerequisites in Honours English, that Professor Coar's objections as made at the last meeting of the Council had been found reasonable and that matters, therefore, had been left as they were before.

3. At this point the Chairman proposed, as the discussion on the matter of the Specialist Teachers' Certificates might be prolonged, in order that certain minor, urgent matters might be dealt with, the question of the certificates be temporarily laid aside and consideration given to the smaller questions. This being concurred in, the Council took up the question of "Advanced Sections" as put forward by the Freshmen Committee.

Professor Sheldon, who introduced this, stated that it was desirable to induce students to take four years at the University. They would be more apt to do this in the Freshmen Committee if apecial provision were made by the various departments containing Freshmen courses, for advanced sections. This would prevent students having to repeat work with which they were already more or less familiar. Professor Sheldon pointed out that this practice was already in vogye in the Departments of Mathematics, Physics and Classics. President Tory cautioned against any steps being taken which might involve further teaching power. After some discussion it was agreed that the matter should be referred to the departments concerned for consideration and report at the next meeting of the Council.

4. The Department of Mathematics requested the privilege of two three-hour examination periods for the spring examinations, the combined papers to count for 100 per cent. The plea put forward

by Professors Sheldon and Killam was that more time was necessary for computation than one period permitted and that owing to this fact students who were slow at computation were actually handicapped and that it would be in the interests of the students themselves to be given more time; that the extra period should be looked upon in the light of a laboratory examination held by the scientific departments. After some discussion the motion carried.

5. The following letter from Mrs. Annie J. Wells was read:

Feb. 20, 1923.

My Dear Dean Kerr:-

Sometime ago from a conversation with you about French prizes, to be given at the close of this University year, to the students, I inferred that an additional prize would be very acceptable.

After some consideration I have decided to give a cash prize of $50.00 to be awarded to such student in French, as the Committee for the distribution of prizes, decides most merits it. I sincerely wish it were in my power to give something more worth while.

Yours very sincerely,

(Signed) Annie J. Wells.

The following terms of award were agreed upon: that the prize of $50.00 be given to the graduating student making the best record in a special examination to be written in French and based upon a prescribed text - in 1923: Victor Hugo's "Ruy Blas".

6. As the Department of Philosophy desired Professor MacPhee, who could remain no longer, to make a statement regarding the Specialists' Certificates, the Council resumed consideration of this question. The report from the General Committee was submitted as follows:

1. It was agreed that admission to courses for the Specialists' Certificates should be based on satisfactory second class standing.

2. It was further agreed that an exact statement of what would constitute satisfactory second class standing should be referred to the Honours Committee with the request that this committee should submit, at the next meeting of the Faculty Council, a working scheme, which if confirmed by the Council, should form a basis of action for the Committee in the future.

3. It was agreed that a clause should be inserted in the calendar urging students to settle the question of Honours courses as early as possible.

7. It was agreed to consider the first two sections of this report together. Professor Killam, as Secretary of the Honours Committee presented their report as follows:

The Committee on Honours recommends to the Faculty of Arts and Sciences:

1. that in exceptionsl cases they be given the power to recommend for admission to honours, students who have not fulfilled all the requirements of the calendar.

2. that an applicant who has not high second class standing in the subject in which he wishes to read for honors may be recommended for admission to honours if his general standing is sufficiently good.

3. that the Registrar's office be instructed to receive all applications for honours, to append thereto the standing of the candidate and forward the document to the Secretary of the Committee on Honours within twenty-four hours.

This report involved essentially a widening of the doors into Honours Courses and the giving of more discretionary powers to the Honours Committee. It was fully discussed and finally adopted in principle. The Honours Committee was further asked to make consistent the phrases of the calendar and their present recommendation and report at the next meeting. They were also asked to consider and report upon ~~any~~ the possibility or desirability of differentiating between the requirements intended for the entrance of a student taking honors in a subject without regard for the Specialists' Certificate and those for a student seeking the certificate.

8. Professor MacPhee stated that the Department of Philosophy deprecated the filling up of the two final years with courses relating only to the specialist subjects and leaving no opportunity for the student to study anything about the learning process. It was later stated by Professor MacEachran that the Normal Schools were not giving the intending teacher any real grasp of psychological operations as related to teaching. Professor MacDonald pointed out that the University of Edinborough gave a whole year subsequent to the Bachelor's degree to teacher-training problems. President Tory agreed that a similar extra year in Alberta would be the ideal solution but owing to the attitude of the Department of Education, such a solution did not seem within the bounds of possibility.

In opposition Professor Broadus stressed the fact that the present equipment of our students in the subject matter of their specialist course was meagre enough. His feeling was that if a teacher really knew his subject their would be no difficulty in his being able to impart it. Professors MacGibbon and Burt emphasized the difficulty of crowding into the present available time, the courses that were necessary for a minimum knowledge of the subject matter required. The Dean pointed out that there were at present only 19 students reading for honors and that this number showed signs rather of contracting than expanding. He deprecated the taking of any step which would make it more difficult for our students to meet competition from candidates for positions from Eastern Canada. Finally as it was getting late it was agreed to adjourn the discussion until the next meeting. The Council then took up the agenda at the point where it had been dropped.

8. The Dean read the following letter from Madame J. Coté:

Dear Doctor Kerr,

As a small token of appreciation for what is done at the University to encourage the study of my dear Mother Tongue, I would like, if it meets with your approval, to give a prize at the end of this year to the pupil (not French speaking) who has been the most successful in the study of the French language.

Thanking you for the keen interest you have taken in the organization of French courses at the University,

Very sincerely yours,

(Signed) C.cile G. Coté.

10034 - 107 St.,
Edmonton, March 2nd, 1923.

On motion of Professors Coar and Sonet, Mme. Coté's offer of a prize was gratefully accepted and the following terms awarded to it: "The prize offered by Mme. Coté to go to the non-French speaking undergraduate student in French 51, who during the current session has in the judgment of the Faculty Council made the most progress in French".

9. Summer reading courses in "A" languages.

Professor Coar, on behalf of the Department of Modern Languages stated that the present "A" language courses did not give sufficient time to cover the necessary amount of reading and proposed that a student desiring to count the "A" course for matriculation, summer reading should be exacted. President Tory suggested that as this affected other Faculties, the matter be brought up in the General Faculty Council. This was agreed to.

10. New Courses: The Council gave its approval to a new course in the Department of Modern Languages, to be known as Comparative Literature 51 , to be given co-operatively by the Dean and the Department, and described as follows:

Comparative Literature 51 3hours

A comparative study of the masterpieces of continental European literature from the fall of the Roman Empire to the rise of the Napoleonic Empire.

The purpose of the course is to trace the evolution of modern European culture in the interplay of literary ideals and forms. The course is intended more expecially for those senior students who are not prepared to read the masterpieces of French, German, Italian and Spanish literature in the originals. These will be read and analyzed in English renderings and will include the following:

The Chanson de Roland	
The Nibelungenlied	
Parsival	(Selections)
Dante:	Divina Commedia (Selections)
Cervantes:	Don Quixote "
Calderon:	La Vida es Sueno
Racine:	Iphigénie
Molière:	Tartuffe
	Le Misanthrope
Corneille:	Le Cid
Selections from:	Montaigne
	Rousseau
	Voltaire
	Diderot
Lessing:	Nathan der Weise
Schiller:	Wallenstein
Goethe:	Faust.

The meeting adjourned at 6:30 p.m.

W. L. A. Kerr

The regular meeting of the Council was held in the Senate Chamber on Friday, March 30, at 3:00 p.m.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Broadus, MacEachran, Lehmann, Sheldon, Lewis, Dean Boyle, Professors MacGibbon, Killam, Gordon, Burt, Strickland; Associate-Professors Sonet, Misener, Campbell, Rowan; Assistant-Professors Long, Pelluet, MacDonald, Eddy; Owen, MacPhee; Miss Patrick, Mr. Race.

The minutes of the previous meeting were read and approved.

The following agenda was then proceeded with.

1. (a) A notice of motion respecting the title of the Specialist Certificate was temporarily laid on the table, it being understood that the question would come up again in connection with the general settlement of the Specialist Certificate question.

(b) Resuming the discussion of the Specialist Certificates and the matter of teacher training allied with it, Professor MacEachran objected to the plan proposed as being faulty both from the academic standpoint, and from the point of view of the teacher himself. The speaker advocated a longer period of training for the teacher, during the course of which the necessary preparation in Psychology, Philosophy and the History of Education should be given. In support of this contention, he read extracts from the Report of the American Commission of '17 and pointed out that for upwards of seventy years the system he advocated had been successfully pursued in Germany and other countries. Professor MacEachran also read resolutions which are to be laid before the forthcoming Teachers' Convention. These resolutions pointed to the increasing on the part of the teaching body in the training for the profession and the extent of the development of opinion among the teachers, which would perhaps favor some such system as he was advancing. The speaker concluded by proposing that no hasty decisions be arrived at, and that more time be arranged for the large general question to be studied and expressed the hope that pressure from the teaching profession itself would work in favor of a scheme which would commend itself as theoretically sound to the University.

Professor Alexander stated his agreement with Professor

MacEachran's general line of argument, but doubted the practibility of bringing the Department of Education to consent to such an ideal scheme and asked if Professor MacEachran could give any definite assurance of this.

President Tory stated that, in his opinion, the time had come when the University should draw up what seemed to the Faculty a reasonable plan for covering the whole question of Specialist Certificates and teacher training and that this plan should be worked out by a committee appointed especially for that purpose. Their final conclusions should be embodied in a comprehensive report and laid formally before the Government of the Province. President Tory thought that before any half policy were adopted, a distinct effort should be made to force a decision by the Department of Education.

Professor Broadus stated that he had opposed Professor MacEachran at the last meeting because he saw no alternative and felt compelled to support what seemed to him the only practical plan at the time. But if there was any prospect of success along the lines just indicated, he would be very glad to withdraw his opposition.

The Dean then stated that he regarded the matter before them as one of grave importance, and with the consent of the Council, asked the President himself to appoint a committee to study and submit a formal report on the subject of debate. It was agreed that the Calendar statements respecting Specialist Certificates should remain for another year as they were and be carried out as heretofore.

2. Professor Killam, on behalf of the Honors Committee submitted a report drawn with a view to harmonizing their report

of a month ago, then accepted in principle, with the phraesology of the current Calendar. The report was taken up clause by clause and certain changes were made in the wording. The proposal to institute third class honors was deleted and the substitution was made of a clause ordering the transfer of students not securing 65% to the pass course. With these emendations, the report was finally adopted as follows:

Degrees with Honors in the Faculty of Arts and Sciences.

1. The courses in honors differ from the general courses in that they are planned with a view to specialization.

2. Students desirous of reading for honors must consult the head of the department concerned as early in their university course as possible; and are responsible for registering in their second year according to the regulations on the following pages.

3. Application to read for honors should be addressed to the Registrar if possible before the end of the second year.

4. Permission to read for honors is granted by the Faculty Council of Arts and Sciences on the recommendation of the Committee on Honors

5. Students must begin their courses in honors in the third year and in order to graduate with honors, must continue this work through the third and fourth years. Students may be graduated with first or second rank honors; this being determined by the average mark of all senior courses in the department in which they are reading for honors. Students who fail to secure 65% shall be transferred to the pass course.

6. Students in the second year, intending to read for honors in the third and fourth years, are required to take courses in two divisions, but in the third and fourth years may confine their work to one division, but not to one department.

3. A formal report from the Department of English re the transfer of certain courses within the Department from pass to honors and honors to pass group was received and approved as follows:

(a) After due experimentation over a period of several years, the members of the Department of English are of the opinion that English 55 (a course in the history of literary criticism) is not suitable for a pass course, but would,

with proper adaptation, be suitable for an honors course. The Department of English accordingly suggested to the Faculty of Arts that English 55 be dropped, and that the material of the course, with proper adaptations, be offered as an honours course in the third year, to be known as English 108. This suggestion was referred to the Dean and the Head of the Department of English for adjustment, and is now recommended by them to the Faculty with the further recommendation that the present third year honours course be shifted to the fourth year; that it be described as a "Conference Course" and that it be renumbered 109.

(b) The members of the Department of English are of the opinion that a course in Chaucer should be made available for pass students. It was accordingly suggested to the Faculty of Arts that a general reading course in Chaucer should be offered as a pass course to be known as English 62, - the linguistic study of Chaucer to be retained as now stated in the Calendar list of honours courses. This suggestion was referred to the Dean and the Head of the Department of English for adjustment and is now recommended by them to the Faculty.

4. Report on Advanced Sections.

Favorable reports were submitted by the Departments of Classics, English, History, Mathematics, Moderns, Physics respectively in regard to the formation of advanced sections in the first year work in these subjects. The general idea - to pick out the better students and form them into a kind of racing squad - received warm general commendation and it was agreed that these advanced sections should be formed immediately after the first tests. In some cases, as in the Department of Mathematics, it might be advisable to form the advanced section earlier and eliminate from it those who proved unfit to carry on the work. Professor Burt stated that in the Department of History the problem would probably be solved at least in the case of Grade XII students, by putting them into second year History.

5. The Council then considered the results of the tests of the second, third and fourth year students, a report being submitted by the Dean giving statistical information. (See below.)

6. New Courses

Approval was given to the listing of Entomology 61 and 62.

Entomology 61: General Entomology 3 hrs.lect; 3 hrs. lab.

Insect morphology, external and internal; development; ecology; recognition of common species; insects of economic importance, and methods of control.
Course designed for students who are prospective teachers of biology
Text Book: Lougheed, Economic Entomology.
Reference Books: (See Entomology 51).

Entomology 62: Taxonomy 2 hr. lect., 3 hr.lab.

Classification of Insects, Histology, Embroyology, Methods of breeding, mounting, and preserving insects.
Text Book: Nolander and Brues, Key to the Families of North American Insects.

President Tory pointed out that for the next year or two, the Department of Entomology must not undertake work involving more assistance than was at present available. Professor Strickland replied that he was in a position to provide for all the work now offered.

7. Special Cases.

Glen Peacock. Mr. Peacock petitioned for permission to take the examination in Latin 1-3 in September. He had made a mark of 43% in Latin 31 - 32 two years ago, but had been unable to take the supplemental at that time, and was out of the University the following year. The Department of Classics concurring, it was agreed that Mr. Peacock should be allowed the privilege of a special supplemental in Latin 1-3 in September next.

8. Professor MacGibbon proposed that Economic Geography, a half-course, at present two hours a week, should be raised to a normal

unit of three hours, -the reason being that Mr. Paton who has given the course, was compelled through constant absence from the University, to compress the work into two hours; but from now on will be in a position to give it a normal amount of time. The Council concurred in the request.

9. The Dean submitted a report showing the number of students intending to graduate in the Faculty of Arts and Sciences.

B. A.	28	
B. A. & Med.	4	
B. A. & App. Sci.	6	
B. A. & B. S. A.	2	
B. A. & L. L. B.	10	
	50	
B. Com.	3	
B.Sc. in Arts	9	
B.Sc. in H. Ec.	4	
B.Sc. in Pharm.	5

M.A.	11	
M.Sc. in Arts	2	
M.Sc. in App.Sci.	1	
B. Educ.	1	
M.Sc.	1	
	16	

10. The Dean stated that last summer he had taken up with Dean Coleman, of the University of British Columbia the question of a possible interchange of instructors in the Summer Session of the two institutions. Dean Colemen had approved the plan in principle. During the winter President Klinck had been in Edmonton and had also approved of the plan, and promised to secure his Faculty's adhesion. Lately, a letter had been received form President Klinck stating that the staff of the University of B. C. were not at present in favor of the scheme, the grounds of opposition being objection to the Alberta climate and the rate of renumeration.

President Tory, in answer to a question, stated that our Summer Session would continue as last year and that formal announcement would be made in a few days.

For the information of the Council he stated that the Faculty of Agriculture had lately arranged to raise the entrance requirements to matriculation standard and had voted to discontinue the degree of B.S.A. and substitute for it the B.Sc. in Agriculture.

STANDING OF SECOND YEAR STUDENTS AT FEBRUARY TESTS - 1923.

Number of students without failures - 16

Number failing in one subject - 13

11. Arts and Law with Honours History: The request of Mr. E. R. Tavender, presented through the Committee on Honours, to take Honours History in connection with the combined course in Arts and Law, as involving a new principle, to wit: the taking of Honours in a subject in connection with a combined course, was referred to President Tory to discuss with the Faculty of Law.

The Council adjourned at 5:30 p.m.

H. M. Tory

A special meeting of the Council of the Faculty of Arts and Sciences was held on Friday, May 11, 1923 at 2 p.m.

There were present: President Tory in the chair, Dean Boyle, Professors Alexander, Broadus, MacEachran, Lehmann, Sheldon, Lewis, Allan, Burgess, MacGibbon, Gordon, Burt, Strickland; Associate-Professors Sonet, Misener, Campbell, Smith, Rowan; Assistant-Professors: Long, Pelluet, Walker, MacDonald, McGoun, MacPhee, Dunn, Miss Patrick and Mr. Race.

1. The minutes of the previous meeting were read and approved.

2. Dean Boyle raised the question of members of the staff attending Baccalaureate Sermon. The President stated that it was the custom for some of the staff to attend, but that there was no ruling to this effect. The whole question of the University assuming control of the occasion was recommended for discussion to the General Faculty

3. The Revision Committee, consisting of Professors Alexander (Chairman), MacEachran, Burt, and Campbell, made the following report with respect to the examinations in the second, third and fourth years:

Of the graduating class of 71, 63 pass clear, 7 have one or two supplementals, and there is 1 aegrotat.

The third year showed no striking failures, but in the second year there was a fairly large number, and in some cases the failures exceeded the passes. The Committee expressed a doubt as to the advisability of such persons receiving credit for their year.

The Council authorized the action of the Committee in raising the marks of Miss J. M. Cook in English 57, from 49.3 to 50%, and of Miss M. Matthias in History 58 from 49 to 50%, and gave the Revision Committee authority to deal with the question of supplemental examinations in the second year.

4. His instructors concurring, and in view of his present illness, Mr. Max B. Palmer was given credit for the courses in which he was registered this session, thus granting him his degree of Bachelor of Commerce on aegrotat standing.

5. The consideration of the standing of the first year students was referred to the Freshmen Committee with power.

6. The following graduands were then recommended by the Faculty of Arts and Sciences to the University Senate for their respective degrees:

Bachelor of Arts.

Ballantyne, Jessie McIntyre
Barker, Lucile
Brownlee, Eva
Chalmers, Helen Harriet
Dixon, Irma Augusta
Duclos, Geraldine Florence

Frazer, Irene Beryl
Geddes, Helen Emma (with Second Rank Honours in Classics)
Hickey, Elizabeth Euphemia
Hope, Jean Terry
MacEachran, Marion Mae
McIntyre, Beulah Marie.
MacLennan, Ruth
Martin, Edith Mary Foster
Murray, Mary Augustine
Richards, Dorothy Freda (with First Rank Honours in Modern Languages)
Shanks, Margaret Stevenson
Simmons, Marjorie
Bramley-Moore, Alfred Gordon
Brown, James
Bryan, George James
Churchill, Ernest Leroy (with Second Rank Honours in Mathematics)
Edwards, Cedric Gerald
English, John Frederick Kerr
Gowan, Edward Hunter
Gray, Harold Ellacott (with First Class General Standing in Arts and Agriculture)
Grindley, Thomas William (with First Class General Standing in Arts and Agriculture)
Hall, Robert Bruce
Herbert, Walter Bertram
Jarrett, William Arthur
Jean-Richard, Marcel Edmond (with First Rank Honors in Modern Languages)
Lamb, Robert Lincoln
Lukaschuk-Luoren, Henry Roman
McClung, John Wesley
Moss, Raleigh Walter
Muir, Charles Keith
Rudd, Frederick Albert
Shankman, Harry
Stewart, Neil McMartin
Wees, Wilfred Rusk (with First Rank Honours in Philosophy)
Willis, Ernest MacPherson
MacFarlane, Agnes Winnifred

Bachelor of Commerce

Allan, Donald Hendry
Page, Robert Henry Constant
Palmer, Max Bayard

Bachelor of Science in Arts

Dowding, Eleanor Silver
Hegler, Florence Helene
Shaw, Olive Jennie
Simpkin, Melville Mary
Campbell, William Paton (with Second Rank Honours in Chemistry)
Fisher, Harry
Lang, William Albert
Pegrum, Reginald Herbert
Mair, Beveridge James (with Rank Honours in Chemistry).
Taylor, Geoffrey Bradford (with Second Rank Honours in Physics
Wilson, George Leslie

Bachelor of Science in Household Economics

Carmichael, Bernice
McLaughlin, Ione Estelle
Raver, Irma Carolyn
Roth, Edna Irene

Bachelor of Science in Pharmacy

Bennett, Margaret Victoria
Garbutt, Amy Eleanor (with First Class General Standing)
Russell, Margaret Barr
Hardin, Nahum Moses
Pawling, Henry Murray

PRIZES AND SCHOLARSHIPS

7. The President read a letter from the Department of English

regarding the Aikens Scholarship in English Language and Literature which "is open to graduating students who have pursued the study of English throughout the first three undergraduate years---- the scholarship being tenable during the fourth year, provided that such students shall have obtained satisfactory standing in English I or its equivalent, and not less than 75 per cent in each course in English taken during the second and third years and shall have obtained high standing in their other subjects". The terms of award further specify that the committee of selection "shall consider, not only the academic standing of the candidate, but also evidence of intellectual grasp, and of proficiency in expression, as displayed in such essays or other tests as the committee may impose".

The award of the following prizes and scholarships was received by the Faculty Council from the Departments concerned and sent forward for ratification to the University Senate.

The Jane Alexander Memorial Prizes

In Latin - Miss Mary Manson

In Geology - George Salt

The Gordon Stanley Fife Memorial Prize in History

Miss Dorothy Richards and Robert L. Lamb, equal.

The Historical Club Prize

Miss Marguerite F. Wees

The Bennett Prize

Not awarded

The Mathematics 1 Prize

Miss Hilda Jenkins

The Mathematics 3 Prize

Miss Grace Atkinson.

The Vallée French Prize

Miss Mary Manson

The Société du Parler Francais Prize

Miss Yvonne LeBlanc

The Coté Prize in French

Edward H. Gowan

The Comité Permanent de la Langue Francais Prize

Miss Dorothy Richards

The Wells Prize in French

Marcel E. Jean-Richard

The Samuel Richard Hosford Memorial Prize in English

Miss Barbara Villy

The Huestis Memorial Prize in English

G. W. Watts

MEDALS

The Lieutenant-Governor's Gold Medal for the Study of Shakespeare

Not awarded

The Charles Allan Stuart Gold Medal in Classics

Not awarded

The Alexander Cameron Rutherford Gold Medal in English

Not awarded

The Women's University Club Gold Medal

Donald Hendry Allan

The James Ramsay Gold Medal in Mathematics

Not awarded

The Pharmaceutical Association Gold Medal

Amy Eleanor Garbutt

The Club Laverendrye Gold Medal in French

Marcel E. Jean-Richard

SCHOLARSHIPS

The Aikens Scholarship in English

Miss Barbara Villy

The Lloyd Harmoll Bishop Memorial Fellowship in English.

Not awarded

Other prizes and scholarships were referred to the Revision Committee with power for award. (See page)

It was agreed that for fourth year students in a combined course, First Class General Standing should be designated "First Class Standing in Arts and ---- (Name of Course).

8. The Report of the Committee on Honors regarding the working regulations for the standing necessary for honors, was accepted as follows:

(a) Students receiving less than eighty per cent in the second year in the subject for which they wish to read for honors must show a satisfactory record in the other subjects of the second year.

(b) Students must have sixty-five per cent in the second year in the subject for which they wish to read for honors.

(c) Students wishing to read for honors may be summoned before the Committee on Honors.

(d) As a rule honor students should enter the third year without conditions and deficiencies in any subject.

9. Mr. Tavender's application to read for honors in History in connection with the combined course of Arts and Law, was refused by Dr. Tory in consultation with the Department of History and the Faculty of Law.

10. The Committee on Honors brought up the question of oral examinations for Honors students. The Registrar was asked to report at the next meeting of the Faculty on the position of the University as shown in the Calendar, in regard to holding oral examinations for honors.

11. Special Cases.

F. J. Barnecut requested permission to write the following examinations in September: Geology 51, Philosophy 51, Physics 8, and Chemistry 1 lab. Due to illness he had twice been compelled to leave the University and so had been unable to complete the work and take the examinations. His request was granted, subject to the presentation of a doctor's certificate.

12. After a discussion of the regulations permitting students to carry a junior subject into the fourth year, Professor MacGibbon gave the following notice of motion:

(a) If a student fail in a subject and also in the supplemental; then repeat the course and fail again, he should be advised to enrol in a different course.

(b) A student may not enter the fourth year with a deficiency he has carried for more than one year.

(c) That an effort be made to extend the time of the junior classes to bring the writing of examinations and Convocation closer together.

Professor Sheldon requested that a fourth point be considered at the same time, namely "That in order to graduate in the Faculty of Arts, a student must make 50 per cent in each subject and 60 per cent in at least half the subjects."

A report from the Examinations Committee bearing on these points and the procedure in other universities, was to be read at the next meeting of the Council.

The meeting adjourned at 4:15 p.m.

Addendum

The report of the Revision Committee re First Class General Standing was as follows:

Fourth Year - T. W. Grindley in Arts and Agriculture
H. E. Gray in Arts and Agriculture

Third Year - H. D. McKay.

Second Year - None.

A special meeting of the Faculty of Arts and Sciences was held on Friday, May 18, 1923, at 2 p.m.

There were present: President Tory in the chair, Professors Alexander, Broadus, MacEachran, Sheldon, Burgess, MacGibbon, Burt; Associate Professors Sonet, Campbell, Smith; Assistant-Professors Long, Walker, MacDonald, MacPhee; Miss Patrick and Mr. Race.

1. The minutes of the previous meeting were read and approved.

2. A report was given by the Examinations Committee, which dealt with a comparison of our regulations regarding supplemental examinations and those of other universities. Certain changes in ourregulations were suggested. In view of the fact that the Dean of the Faculty was absent and the Faculty considerably diminished, the Committee recommended that action in this matter be postponed until the opening of the session 1923-24. As the question concerned the practice throughout the University, it was referred to the General Faculty for discussion.

3. The Registrar was asked to report at the next meeting on the number of students entering the third or fourth year with deficiencies.

4. The Revision Committee made the following recommendations which were agreed to by the Council.

B. Kotzin, a student in the second year Arts and Applied Science, who failed in Chemistry 1, Mathematics 21 and 22, and Zoology 1, should have no supplementals and his registration should be restricted to five subjects: the four subjects in which he failed and one other.

J. S. Madill, a student in the second year Arts and Medicine, failed in Biology 1, Chemistry 1, Mathematics 1 and Zoology 1, and did not write on French 5-4 or German 41, an extra. He is to have no supplementals and his registration is to be restricted to the subjects in which he has failed and French 5-4, or another course from Division A.

Miss Ruth Becker, in the third year of the degree course in Pharmacy, failed in Materia Medica 51, Physics 21, Pharmacy 51, 52 and 54. The Committee recommended that she be required to repeat these subjects.

Miss E. M. Eubank, in the third year Arts, also failed in three of her five courses: Latin 1-3, French 5-4, English 53, English 57, Political Economy 63. She is to repeat four subjects, that is, all except Latin 1-3.

Miss Bertha Studholme, in third year Arts, failed in three out of five subjects. Her case is to be decided according to the general regulations.

Glen W. Peacock, in the third year of the Bachelor of Commerce course, failed in Political Economy 66, Mathematics 61, which will not be given in the session 1923-24, and dropped Latin 1-3. His case was decided according to the general regulations.

6. The Freshmen Committee made the following recommendation to the Faculty: "That because of failure in so many subjects and low marks in the subjects passed, the following Freshmen be required to repeat those subjects in which they have passed and that in such cases the mark in the subject be not published: Coupez, L. A., H. C. Bell, Miss N. Donaldson, Miss M. Barkdull, E. O'Donnell, Miss M. Deane, Miss P. Oshorne, S. Savage, W. Steele It was moved by Professor Alexander, seconded by Assistant-Profess MacPhee that this recommendations be accepted. Carried.

7. A letter was read from Mr. F. C. Manning, who had failed in English 57 with 45%, asking that the Faculty recommend him to the Senate for his degree. The President stated that he had advised Mr. Manning to carry his request to the Senate only if the Department of English concurred. A letter was read from the Department of English which confirmed the original mark for his paper, therefore his request was refused.

8. Mr. H. Lebourveau had had his paper in Political Economy re-read. His mark was not raised by the Department and the Faculty confirmed this marking.

In connection with the procedure to be followed in securing the re-reading of papers, it was suggested that the Registrar have a copy of these regulations distributed in the sutumn.

The meeting adjourned at 3:30 p.m.

#. Revision Committee report:

Because of further information which had been received in regard to the special cases, a special meeting of the Faculty of Arts was called immediately after a meeting of the General Faculty on Saturday, May 18, 1923. The report was referred back

to the Revision Committee in consultation with the Registrar for adjustment. The record as made above in the Minutes is the result of the consideration of this Committee. and has the approval of the President.

W. T. A. Kerr

The Council of the Faculty of Arts and Sciences met in the Senate Chamber on Tuesday, May 25, 1923.

There were present: Dean Kerr in the chair, President Tory, Professors Broadus, MacEachran, Lehmann, Sheldon, Allan, Burt; Associate Professors Misener, Smith; Assistant-Professors Pelluet, Walker, MacDonald, Eddy, McGoun.

1. The minutes of the previous meeting having been read and approved, upon the motion of President Tory, seconded by Professor MacEachran, the findings of the Revision Committee were accepted as minutes of the Faculty Council.

2. The Chairman called attention to the fact that since the last meeting of the Council, Professor Killam had been taken from us by an untimely death, and suggested that any appropriate action be taken at the General Faculty Council.

3. The Chairman further stated that Professor MacGibbon would be absent until Christmas as a member of the Grain Commission, and would be at the disposal of the National Government until then. Professor Coar had also been granted leave of absence

for the current session as he is at present connected with the Liberal League in the United States. Arrangements had been made to carry on the work of both Professor MacGibbon and Professor Coar.

Special Cases

4. Sister Herbreteau was granted permission to leave before the close of the hour in two of her classes in French 52, as it would be impossible for her to reach the school of which she is principal if she stayed the full time in her lectures at 11:30 Tuesdays and Thursdays.

5. Maurice Rookwood presented two requests: first, that Mathematics 110, a summer session half course, and Mathematics 62 Part 1 be combined so as to give him credit for one complete senior course in Mathematics. In view of the fact that he was teaching, and it would be impossible for him to get the other halves of the course, and with the consent of the Department of Mathematics, this request was granted. In the second place, Mr. Rookwood requested permission to complete Psychology 5~~7~~, the first half of which he had taken at Summer School, in the period after the coming New Year. The Faculty agreed to this proposal.

6. W. E. Sieber, a special student at Robertson College, desired to take a class in German A at the University, and as it would be impossible for him to attend the Monday morning class because of Mission work outside the city, he asked for exemption from this hour. As he already had a reading and speaking knowledge of German, the request was granted.

7. L. V. Bell, in transferring from B.A. and B.S.A. to B.Sc.

in Arts, asks that Political Economy 1 be counted as a Division "C" course in the second year. The petition was refused.

8. After rereading the examination paper in Mathematics 1 of D. A. Sprung, the Department of Mathematics recommended that his final mark be raised to 56 and the record for the year to 50 per cent. The Council ratified this recommendation.

9. C. R. McClocklin asked for a combined course in Commerce and Law. A committee was appointed consisting of Assistant-Professor McGoun, Chairman, and Associate Professor Weir and the Registrar to examine the possibility of such a course and report back to the Council.

The meeting adjourned at 3:30.

W. T. H. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 4:30 on Monday, October 1, 1923.

There were present: Dean Kerr in the chair, Professors Alexander, Gordon, Burt, Strickland; Associate Professors Campbell, Long; Assistant-Professors Pelluet, Walker, MacDonald, Eddy, McGoun, MacPhee; Owen; Miss Patrick and Mr. Race.

1. The minutes of the previous meeting were read and approved.

2. The Dean asked that with the consent of the Council all matters of general principle should be left for future discussion.

3. The Council ratified the result of the re-reading of the

English 1 paper of Thomas Musto, in which the mark was not raised.

. Business arising from the Minutes:

4. The following report from the Committee appointed to examine the possibility of a combined course in Commerce and Law, was submitted:

That it would, in the opinion of the members of the Committee, be possible to arrange a course which would entitle a student to receive the degrees of B.Com. and LL.B. in six years. The standards and requirements of this course could be made to conform closely to those at present laid down for the combined course leading to the degrees of B.A. and LL.B., but could be made to differ from these requirements sufficiently to make the new course somewhat distinctive.

At the same time the requirements might not be such as to preclude the possibility of a student complying with the Calendar requirements of the three degrees of B.A., B.Com.; and LL.B. by taking a couple of extra courses; so that it might be advisable to insert a provision in the Calendar, regulating this on a reasonable basis.

It is further to be observed that the regulations at present in force whereby the holder of the degree of B.A. is entitled to be admitted to the practice of law after attendance in a law office for three periods of four months each, whereas a person without the degree of B.A. must serve in a law office for an entire year, apply to the degree of B.A. only. The Law Society would have to be approached with a view to raising the question whether the same privilege might be given to holders of the degree of B.Com."

After hearing the report and after some brief discussion had taken place, it was decided to have the report manifolded and the whole matter submitted to the General Faculty for consideration.

Other Business

5. The following requests from the Department of Geology were granted:

That students taking B.Sc. in Arts be permitted to substitute Geology 54 for Geology 53, which is not being offered this year, laboratory work to be arranged so that the scope of the work in Geology 53 would be covered.

That for this session Geology 52 (Applied Science, three hours lecture and three hours lab. throughout the year,) be allowed as a senior course in Arts.

6. On behalf of the Department of Mathematics Professor Sheldon asked the approval of the Council to the following arrangements of the tests and final examinations in Mathematics 1: five term tests to count each ten per cent; final examinations to count fifty per cent. The Council consented the foregoing proposal being in harmony with the arrangements herewith followed in Physics 1.

7. On behalf of the Department of Household Economics Miss Patrick stated that the time devoted to Food Chemistry 59, would be reduced from six to three hours per week. She asked that the three hours thus freed should be given as extra time to Household Economics 59, in which the students need personal attention and in which the enrolment is double that of last year. The Council consented.

Special Cases

8. Miss Margaret Clark, who is repeating Mathematics 1, had a time-table conflict between Bacteriology 2 in the Household Economics course, and one hour of Mathematics 1. Professor Sheldon concurring, Miss Clark was exempted from one hour per week in Mathematics 1 until Christmas.

9. Milton J. Johnson, a third year student entering honours in Political Economy, petitioned that Accountancy 55 and Political Economy 73 be allowed him as options in his honour course and that he be also allowed to carry History 2 as an extra. The Council agreed to his request.

10. Mervyn Tuck, who has a clash between Geology 55 laboratory and one hour of English 53, asks that he be permitted to leave

the Geology laboratory for the period involved. It is understood that he will make up the time thus missed. Subject to the approval of the Department of Geology, the Council concurred in the request.

11. The departmental returns for the supplemental examinations were received, adopted, and ordered published.

12. Professor Burt raised the question as to the course which should be followed with regard to graduating students who fail a course in the spring, and also fail the supplemental. As the problem affects the whole University, it was agreed that it might be brought up at the General Faculty.

13. Some discussion took place regarding the divulging of supplemental examination results before these had been submitted to the Faculty Council for approval. It was pointed out by the Registrar that in order that registration should not be unduly delayed it was practically necessary to use the supplemental results for this purpose.

The meeting adjourned at 5:30.

W - K. M. Kerr

The regular meeting of the Faculty was held on Monday, November 5, 1923 at 4:30 p.m. in the Senate Chamber.

There were present: Dean Kerr in the chair, Professors Alexander, MacEachran, Lehmann, Sheldon, Boyle, Allan, MacGibbon, Gordon, Burt, Strickland; Assoc.Prof. Misener, Long, Campbell, Rowan; Assistant-Professors: Pelluet, Walker, Eddy, McGoun, MacPhee, Owen, and Miss Patrick.

The minutes of the previous meeting having been read and approved, the following agenda was proceeded with:

1. As certain general questions were up for discussion, the special cases were first disposed of, to wit:

Sister Hayes asked permission to change her registration from Psychology 104 to French 52 and in the latter course, for exemption from one hour per week. Sister Hayes has an excellent record and lives in a community in which French is spoken. The petition, therefore, was granted.

Miss Marjorie Bradford: an honours Mathematics course, scheduled at irregular hours, conflicted with Philosophy 51. Miss Bradford asked that she be granted exemption of one hour per week from Philosophy 51 until Christmas, when the conflict will disappear. The petition was granted.

Miss Anne Kennedy, who is repeating Latin 1-3, which clashes with Anatomy 53, asks for exemption of one per week in the Latin. It being reported by the Department of Classics that her work was going well, the petition was granted.

G. Klingaman asks for late entrance from October 24. Mr. Kilingaman was serving under contract for threshing operations for a farmer. This work was delayed by unseasonable weather. As Mr. Klingaman has an excellent record, his request was granted. It is understood that the rule permitting absences shall not apply in his case.

O. Whitford whose degree was deferred through failure in Latin 1-3, has registered in Lat3.He asks permission to be absent from lectures until the New Year, when special classes will be given for students deficient in Latin 3. At Christmas

he will write a special examination in Latin 1. - Granted.

C. F. Manning whose degree was deferred through failure in English 57 was granted permission to re-study the course at home and take the examination again in the spring without repeating the lectures.

E. R. Copeland, B.Sc. in Pharmacy, asked what courses would be required of him to secure either B.A. or B.Sc. in Arts. His case was referred to the committee of the General Faculty Council which has been appointed to study the question of combined courses.

2. The results of supplemental examinations in Botany1, English 1, Latin A., Mathematics 1, English 53, Psychology 54, 55, 56, which had not heretofore been submitted to the Council, were approved.

3. On behalf of the Examinations Committee Professor Burt submitted the following recommendations:

(a) That in considering the results of the Spring examinations, not more than two supplementals be allowed to any student (except in the Faculty of Medicine) and then only if the student has an average of 60% on the total. Students falling below this standard shall receive no credit for courses in which they may be shown as having passed and shall repeat the previous year's registration.

(b) No student shall be permitted to enter the first year with more than two conditions or deficiencies, nor the second with any condition or with more than one supplemental not cleared.

(c) No student shall be permitted to enter any year beyond the second with any supplemental not cleared.

Speaking on behalf of the foregoing Professor Burt stated that the Examinations Committee has had difficulty in dealing with the apparently increasing number of applications for supplementals and special supplementals. The result was

that students entered the third and fourth years still trailing first and second year subjects. The Examinations Committee, while not pressing for the adoption of the suggestions still felt that the matter might be made a basis for discussion and that something might be done to stiffen up our standards. He pointed out that the Examinations Committee had been in correspondence with certain of the Universities and had accumulated some information. Though not completed, it might be of use in a comprehensive study of the question, either by the Examinations Committee itself, or perhaps better, by a special committee nominated for the purpose.

Professor Sheldon supported Professor Burt in general terms, expressing the belief that the time was opportune for an improvement in our examination standards. A general discussion, participated in by Dean Boyle, Professors Lehmann and MacGibbon and Assistant-Professor MacPhee followed. Regret was expressed that so many students succeeded in registering in upper years with junior deficiencies. The hope was given voice to that legislation might be brought into force which would tend to overcome the difficulty.

In closing the discussion the Dean stressed the fact that there was implicit, though not explicit in the proposals put forward by the Examinations Committee, a reversal of the policy of promotion by subjects, which had been adopted when the University was founded, at a time when the President was chairman of the Faculty Council. He pointed out, too that a considerable part of our present difficulty was owing to the entrance of students from the rural High Schools, with the

Grade XII, but no credits in languages. This meant that inevitably they were, in this respect, two years out of step. It was agreed, however, that a committee, in which the President should have a voice, should be appointed to study the question and report at a later date.

4. The following report, asked for at an earlier meeting, was submitted, giving information regarding the history of oral examinations for Honours Students in this University:

(a) Inserted in Calendars 1911-14: The final examination for the second term of his Fourth Year shall be an oral examination dealing with his general knowledge of the subjects which constitute his work in the Third and Fourth Years. This examination will be conducted by the members of the faculty under whom the candidate has been pursuing his courses. This oral examination may be supplemented by a written examination at the option of the department.

(b) Inserted in Calendars 1914-20 (with the exception of 1915-16 Calendar): The final examination for the degree shall include in addition to the regular written examination an oral examination upon the subjects of the course taken in the third and fourth years. This examination will be conducted by the members of the Faculty under whom the candidate has studied.

(c) No mention of Honours Requirements previous to 1911. No mention of Oral Examinations for Honours Students since 1920.

5. The following report from the Registrar, requested at a previous meeting, on statistics regarding deficiencies of senior students, was submitted: 1. Subjects affected:

Third Year Students	Deficiencies, Session 1922-23	
First Year deficiencies (including Algebra and General History)	- 45	(A languages, Grade XII 39 being languages).
Second Year deficiencies	- 9	(no languages).

Fourth Year Students	Deficiencies, Session 1922-23	
First Year deficiencies	- 6	(5 being languages)
Second Year "	- 4	(no languages).
Senior "	- 1	

Third Year Students - Deficiencies Sessiin 1923-24

First Year deficiencies (including A languages) - 29 (23 being languages)

Second Year " - 39 (8 being languages)

Fourth Year Students - Deficiencies Session 1923-24.

First Year deficiencies (including Grade XII Algebra) - 10 (8 being langs)

Second Year deficiencies - 21 (4 being languages)

Number of Students in Third Year, Session 1922-23 with deficiencies - 50

" " " " " " " 1923-24 with deficiencies - 38

" " " " Fourth " " 1922-23 with deficiencies - 8

" " " " " " " 1923-24 with deficiencies - 30

6. The question of an Honorary Secretary for the Faculty Council: The Dean recalled the fact that formerly it had been customary for the Registrar to read the minutes. Latterly, however, with the increase of work in the Registrar's office, it was often difficult for the Registrar to get away at the exact time that the Council began business. The result had been that at the past few meetings the Chairman had been usually compelled to read the minutes himself. As this did not seem to be the best practice, he asked the approval of the Council to appoint an Honorary Secretary whose duty would simply be to read the minutes, the proceedings as heretofore, to be taken down by a stenographer. The Council concurred in this request.

7. On behalf of the Honours Committee, Professor Alexander submitted the following report:

Fourth Year Students

Miss M. Bradford: Honours Mathematics - Math 102, 104, 53a, Philosophy 51, English 53 and Physics 54.

J. M. Cassels, Honours Political Economy - Political Economy 65, 66, 101 and Philosophy 53.

Miss M. Gratz, Honours Mathematics: Mathematics 102, 104, 56, 62, Psychology 51.

Miss L. M. Heathcote - French 52, 54, 101 and 102; German 54, English 52. - Honours Modern Languages.

Miss H. Hobbs: Honours History - History 57, 53, 102, English 53.

K. D. McArthur: Honours History - History 56, 57, 102, and Political Economy 64.

Miss D. McLean: Honours English - English 52, Philosophy 53, English 62, 57, French 52 (extra).

Miss K. MacNab: History 56, 57, 102, English 62.- Honours History.

G. Salt: Honours Botany - Botany 52,101, 103, Biochemestry 61

Third Year Students

Miss H. Carswell: Honours Modern Languages - Miss Carswell to be allowed, on recommendation of Professor Broadus to take English 53 this session as she is not able to take English 2 owing to time-table clash. She must, however, complete English 2 before graduating. She has three years in which to finish her course this year's registration being German A, Phil. 2, French 52, 54, English 53.

W. B. Cromarty: Honours History - History 56, 57, 102, 2; Political Economy 64.

Miss O. Haw: Honours English - French 5-4, Classics in English 51, English 52, 53, 62 (equal 195). She was deficient in the prerequisites, so the above course was arranged by Professor Broadus, with the understanding that Classics in English should count as a senior subject.

M. Johnson: Honours in Political Economy - Political Economy 64, 65, 101, Accountancy 55 with Political Economy 73 as option and History 2 (extra).

R. L. Kutz: Honours Chemistry - Chemistry 51, 58, 101, Math. 55.

W. M. Kutz: Honours Chemistry - Mr. Kutz is demonstrating this year and is taking only Chemistry 54 and 102.

Miss J. McKitrick: Honours Philosophy - Psychology 51, 52, Philosophy 51, Zoology 1, German 2-4 postponed until next session.

W. C. McRae: Hnours Mathematics - Mathematics 102, 104, 57, 62, Physics 51 or 12. Mr. McRae is deficient in first year Latin and his second year is week and he will be required to discontinue the honours course if he is unsuccessful.

Miss D. L. Smith: Honours English - English 52, 53, 62, French 52.

Second Year Students

W, H. Mueller - Preparatory to Honours Chemistry - French 1-3, German 2-4, Mathematics 55, Chemistry 101, Botany 1.

Miss A. Russell - Honours English - Latin A, French A, English 2, History 2, Philosophy 2, Classics in English 51 in place of Physics 3 in which she had originally registered.

Miss C. Barclay: Honours English - English 2, French 5-4, Hist. 2 Classics in English 51, German A as an extra, Latin 2-4 in place of Physics 6 in which she was originally registered, and which is not required for Honours English.

/ Miss B. Villy - Fourth Year Honours English - English 52, 57, 62, History 53.

The report, after some discussion of individual cases, was adopted as a whole.

Dr. Boyle called attention to the ruling of the Committee in the case of Miss Alta Russell, who entered the University with Grade XII. On page 71 of the Calendar a foot-note to the general course stated that students entering with Grade XII must select either Chemistry or Physics of the second year. As Miss Russell proposed to read for honours, the Committee has ruled that she was exempt from the foregoing requirement. Dean Boyle stated that he would not question the justice of the interpretation, but desired to call attention to the fact that this possibility had perhaps been overlooked when the present wording of the Calendar was adopted three years ago.

The Council adjourned at 5:45 p.m.

W. S. M. Kerr

A meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, December 3, 1923.

There were present: Dean Kerr in the chair, Professors Alexander, Lehmann, Allan, Gordon, Burt; Associate Professors Misener, Campbell, Smith, Rowan, Long, Dunn; Assistant-Professors Walker, Eddy, Hardy, Owen; Miss Patrick and Mr. Race.

The minutes of the previous meeting having been read and confirmed the following agenda was proceeded with:

1.

1. The Chairman stated that in confirmation with the resolution adopted at the previous meeting, he had asked Associate Professor Long to act as Honorary Secretary of the Council. This Professor Long had kindly consented to do.

2. The Chairman reported that the following committee had been appointed to deal with the question of supplemental examinations and standards associated therewith: President Tory, Chairman, Dean Kerr, Professors Alexander, MacEachran, Sheldon, Burt. The Chairman stated that the Committee had met and had been joined by Professor MacLeod as delegate from the Faculty of Applied Science. The general result of the deliberations of the Committee was to recommend that the General Faculty Council should be asked to appoint a permanent committee, representing all the Faculties which should develop a policy touching supplemental examinations and such other questions as might be put under their jurisdiction and that the working rules of such a policy having been approved by the General Faculty Council, a good deal of discretion should be left to the Committee to deal with individual cases.

3. On behalf of the Department of Pharmacy Associate-Professor Dunn asked that Latin 66 be transferred from the Fourth Year to the Second Year of the degree course in Pharmacy, the reason being that Latin 66 is a prerequisite to Pharmacy 52, which is at present in the Third Year. The Council concurred in the request. The proposal to make Chemistry 58 compulsory in the B.Sc. course, brought forward also by Professor Dunn was left for report to a Committee consisting of Professor Lehmann and Assoc.-Professor Dunn.

4.
Special Cases

J. W. Gerrie embarked on a combined course in Arts and Dentistry before such a course had been definitely drawn up and approved, and followed the course as laid down for Arts and Medicine. As the course in Arts and Dentistry as likely to be adopted will include two courses from Division "C", Mr. Gerrie finds himself in the position of not satisfying the requirements of B.Sc. and D.D.S. After some discussion the Council agreed to recommend to the General Faculty that in Mr. Gerrie's case, since he acted in good faith, and provided he was successful, the degree to be awarded should be the B.A.

Mrs. Masson applied for late entrance as from November 28th in German 1-3. As Mrs. Masson is the widow of a returned soldier and is struggling under great difficulties to make things go, the Council concurred in her request.

Moses Weinlöss changed from Medicine to Arts and Medicine and with the consent of the Medical Faculty was granted late entrance into German 54 as from November 21st. Permission was also granted to him to count Chemistry 2 and 3 as equivalents of 1 and 52, subject to the condition that he make not less than 65% in Chemistry 3.

E. S. Wyman, who stood second in the Province in Grade XI 1922 and had begun Grade XII at the High School in Lethbridge, where he was resident, moved to Edmonton, and asked permission to enter the Second Year of the University, late. Late entrance as from November 21st was granted. On the suggestion

of the Registrar it was agreed that no allowance should be made for his first tests which he had missed, unless he failed a given subject, in which case he should be treated as having been absent through illness.

A. D. MacPherson asked for permission to repeat Botany 1 without the laboratory. This petition was refused.

O. Whitford petitioned that his special examination in Latin 1 be postponed until after Christmas. This petition was declined.

5. The Dean submitted statistics giving the results of the first Junior tests taken by Sophomore students in the Second Year of attendance. Gratification was expressed at these results as being an improvement over last year.

NOVEMBER TESTS 1922

6. Professor Gordon asked, on behalf of the Department of English that no student be permitted to take a senior course in English who had not previously secured credit for English 2 or its equivalent. After some discussion it was agreed that a committee should be appointed to study the question in its various implications and report back.

The meeting adjourned at 5:35 p.m.

W. T. Allen

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 4:30 p.m. on Monday, January 7, 1924.

The following members were present: Dean Kerr in the chair, Professors Alexander, Lehmann, Sheldon, Lewis, Allan, Strickland; MacGibbon;/ Associate-Professors Campbell, Smith, Long, Dunn; Assistant-Professors Walker, McGoun, Owen, MacPhee; Miss Patrick and Mr. Race.

After the reading and confirmation of the minutes of the previous meeting the following agenda was proceeded with:

1. Professor Lehmann submitted on behalf of the committee appointed to consider the question of the addition of Chemistry 58 to the degree course in Pharmacy, a report showing two methods of meeting the issue: one by bringing Chemistry i into the first year and moving either Chemistry 51 or 52 into the second year. Room would then be made for Chemistry 58 in the fourth year. The alternative plan was simply to add Chemistry 58 to the fourth year.

The adoption of the first plan was moved by Assoc. Prof. Dunn and seconded by Professor Lehmann. In the discussion which followed objection was taken chiefly to the infraction of the principle of a common first year and on the vote being taken the motion was lost. Subsequently the second plan was adopted.

Professor Lewis then gave notice that at the next meeting of the Council he would move that Chemistry 1 be added to the subjects of the first year of the B.Sc. in Arts.

2. On behalf of the committee appointed to consider the question of English 2, namely Professor Broadus, Chairman, Alexander, Burt. and Ass't. Professor Owen, Professor Alexander made a progress report and stated that the committee hoped to be able to report definitely at the next meeting of the Council.

3. Returns covering final examinations for the first term and a special examination in Latin 1, were submitted, approved and ordered published.

4. Professor Allan recalled that earlier in the term the Council had agreed to permit students in the Faculty of Arts to take Geology 54 in lieu of 53. As it later transpired that there was only one Applied Science student concerned, and other arrangements being made for him, Professor Allan now asked that the

Council concur in the re-transfer of the Arts students to Geology 53. The Council agreed.

The Council adjourned at 5:15 p.m.

W. B. M. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held on Monday, February 4, 1924 at 4:30 p.m. in the Senate Chamber.

The following members of the Council were present: Dean Kerr in the chair, President Tory, Professors Alexander, MacEachran, Lehmann, Sheldon, Lewis, Allan, Gordon, Burt, Strickland; Assoc. Professors Sonet, Misener, Campbell, Rowan, Long, Dunn; Assistant Professors Pelluet, Walker, Eddy, McGoun, MacPhee, Owen; Miss Patrick, Mr. Race.

After the reading and confirmation of the minutes, the following agenda was proceeded with:

1. On behalf of the Committee appointed to deal with the proposal to require English 2 as a prerequisite to all senior English courses, Professor Alexander reported as follows: that there be inserted in the Calendar under the requirements of the Department of English the phrase: "That English 2 or its equivalent in mental discipline be regarded as a prerequisite to senior courses in English". The Council concurred in the recommendation.

2. It was then proposed by Professor MacEachran that all proposed prerequisites in the second year should be reported

to the Faculty Council for approval. The Council concurred also in this suggestion.

3. Notice of motion that Chemistry 1 be added to the subjects of first year of the B.Sc. in Arts: Professor Lewis stated that he was not at present pressing for the adoption of his proposal, but had always thought that Chemistry should be added to the first year of the B.Sc. and desired to have the matter discussed. He felt that students taking, for instance Botany, in the second year would be much better equipped if they already had some Chemistry. In his opinion Chemistry might be made an option along with Physics in the first year.

Professor Walker supported the proposal, stating that in most Canadian Universities, Chemistry was now available as a first year subject. He offered as a solution the suggestion that one language be required, either Physics or Chemistry be required and that a second subject might be selected from a list including the remaining languages and Physics or Chemistry.

Miss Patrick stated that a knowledge of Chemistry on the part of students coming into her Department would be of great assistance, as at present they had to take both Organic Chemistry and Biochemistry at the same time. The President pointed out that in view of the financial situation it would be futile to propose any change which would involve additional teaching power.

Professor Sheldon doubted the wisdom of forcing a choice as between the B.A. and the B.Sc. in the first year, owing to the immaturity, as he said, of our freshmen.

It was finally agreed that a committee should be appointed to canvass the question and report in the autumn.

4. The Dean brought forward the advisability of adding a fifth course to the third and fourth years. He thought there had been a general feeling for some time that the students in the senior years in the Faculty of Arts were not doing an amount of work commensurate with that done in the other Faculties, and he submitted statistics in support of this assertion. He stated further that most of the other Canadian Universities were already demanding five courses in the senior years and that this was also the universal practice in the United States. The additional point was made that of the students who would be affected in the third year, 45 per cent were already carrying more than four courses and in the fourth year, 49 per cent were now registered for more than four courses.

A general discussion followed, participated in by the President, Professors Gordon, Sonet, Lewis, MacEachran, Alexander, Sheldon and Misener. In addition to the solution proposed by the Chairman, two other suggestions were made: one, that the same number of courses be retained, but that a higher standard of passing be required; second, that the content of the courses be increased, so that while retaining the three hours per week of lectures, the amount of instruction to be covered would approximate that which would be undertaken in courses of four hours per week. The Voice was also given to the opinion that no change at all was necessary and that students in the Faculty of Arts should be allowed leisure in which to browse. Finally it was agreed that the discussion should be continued at the next meeting of the Council.

5. The Dean asked the consideration of the Council for the following problem which had arisen. Under our rules students are compelled to register first for any deficiency, and this practice is as a rule being well carried out. But [redacted] certain students not interested in these subjects in which they are deficient, are careless about their attendance and after a while accumulate enough absences to exclude them from the course, so that our own regulation defeats the purpose of the registration. After some discussion it was agreed that this matter should be referred to the University Committee under appointment to deal with supplementals, etc.

6. Special Cases.

W. Sieber: Asst. Professor Owen brought up the case of Mr. Sieber, a native born German, who is at present a student in German A and German 2-4. It was agreed on the recommendation of the Department of Modern Languages, that Mr. Sieber's technical deficiency in German 1-3 should be overlooked and that he should be allowed to write the examination in German A without further attendance to the end of the term, and be given standing in German 1-3 provided his showing in 2-4 is satisfactory.

K. P. Duggan: petitioned for aegrotat standing in Accountancy 55 on the basis of illness. On motion of Mr. Race it was agreed that Mr. Duggan should be granted aegrotat standing in that course provided he passed all his other courses satisfactorily at the end of the session.

Miss D. Newson: the Dean brought up the case of Miss Newson, a fourth year student in Arts and Medicine, who at Christmas had failed a final examination in Zoology 3. Pending settlement of

the principle involved in such cases by the new Committee on Supplementals it was agreed that the Faculty of Medicine should be asked to give Miss Newson a special supplemental before the close of the present term.

7. The following statistics were submitted, showing the results of the senior tests December 1923.

Course	Total No. Students	Total % Failure	No. 3rd Year	No. 3rd yr. failed	No. 4th Year	No. 4th yr. failed

The Council adjourned at 6:30 p.m.

W. A. H. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held on Monday, March 3, 1924 at 4:30 in Room 212 in the Arts Building.

There were present: Dean Kerr in the chair, President Tory, Professors MacEachran, Lehmann, Sheldon, Lewis, Burt; Associate-Professors Campbell, Smith, Long; Assistant-Professors Pelluet, Eddy, MacPhee, Hardy, Owen, and Mr. Race.

The minutes of the previous meeting having been read and confirmed, the following agenda was proceeded with:

1. The Dean reported that the following committee had been appointed to consider the question of the possible addition of Chemistry 1 to the programme of the first year in the B.Sc. in the Faculty of Arts and Sciences: President Tory, (Chairman), Deans Kerr and Boyle, Professors MacEachran, Lehmann

Sheldon, Lewis. Professor Gordon's name was subsequently added in accordance with the resolution below.

2. The discussion regarding the advisability of stiffening up the work of the third and fourth years either by the addition of a fifth course or by the raising of the passing standard in a certain number of the courses, was reopened. The attendance of the members of the Council being small, Professor MacEachran suggested that in view of the importance of the problem, the whole question be turned over to a committee for consideration and report in the autumn. This proposal being agreed to by the Council, the Chairman suggested that the committee already named above in connection with Chemistry 1 might also be asked to deal with this problem. Professor Sheldon was of the opinion that it would be well to have another non-scientific member on the committee. To meet with this suggestion it was agreed that Professor Gordon should be added to the personnel.

3. The Dean stated that it would be necessary to elect three representatives to represent the Council on the University Senate as the present representatives would retire March 8th. At the suggestion of Professor MacEachran it was agreed that hereafter a nominating committee should be appointed whose duty would be to suggest whatever number of names was necessary to fill the vacancies, but that it would also be in order for other nominations to be made, provided they were in writing and signed by two members of the Council. It was agreed that nominations should be in the hands of the Registrar by 12 o'clock Friday, March 7 and elections

should take place at 12:25 p.m. on the same day.

4. The question of what degree, whether B.A. or B.Sc. should be granted to students reading for honours in Division C subjects was then discussed. It was made clear that this point had not been considered at the time of the revision of the curriculum some three years ago. Finally it was agreed that this difficulty should be placed in the hands of a committee for report, the committee to consist of Professor Lehmann, Chairman, Dean Boyle, Professors Lewis and Sheldon.

5. Statistics were submitted by the Dean, covering the records of students in their second year in the Faculty of Arts. After some discussion respecting these statistics they were ordered incorporated in the minutes. (See below.)

6. On motion of Professors MacEachran and MacPhee the following recommendations touching work in the Department of Philosophy were agreed to:

1. The two courses in Education hitherto described as Education 51, History of Education and Education 52, Philosophy of Education are to be merged into a single course to be designated Education 54, History and Philosophy of Education.

2. After next session Philosophy 1 shall be a prerequisite to Psychology 51 and 52, except in cases where special permission has been obtained from the Dean and the Department of Philosophy.

3. Philosophy 51 shall be a prerequisite to Philosophy 53 and Education 54.

4. Students who as undergraduates are considering proceeding to the degree of Bachelor of Education after graduation, are advised to take the following courses in their undergraduate work: Philosophy 1 or 2, Philosophy 51 and Psychology 51.

5. The arrangement of the course leaves an option in the second year of the Bachelor of Education course. This option should be selected by the student in consultation with the Department of Philosophy.

The Council adjourned at 5:35 p.m.

A special meeting of the Council of the Faculty of Arts and Sciences was held in Room 212 in the Arts Building on Friday, March 7, 1924 at 12:25 p.m., for the purpose of electing three representatives to the University Senate for the two year term ending March 8, 1926.

There were present: Dean Kerr in the chair, President Tory, Professors MacEachran, Lehmann, Sheldon, Allan, Gordon,

Burt; Assoc. Prof. Smith; Asst. Professor MacPhee.

As the number present was two short of a quorum, it was agreed that the regular meeting should be asked to validate the proceedings.

The Dean stated that the following Nominating Committee had been appointed in accordance with the resolution of the Council meeting of March 3: Professors MacEachran (Chairman), Allan, Burt.

This Committee had proposed a slate containing the following names: Professors Alexander, Gordon, Smith. As there were no other nominations it was ordered that the Secretary cast a ballot, and the three gentlemen named were declared elected.

W. S. M. Kerr

The regular meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Monday, April 7, 1924 at 4:30 p.m.

There were present: Dean Kerr in the chair, Professors Lehmann, Sheldon, Gordon, Burt; Associate Professors Sonet, Misener, Campbell, Smith, Rowan, Long; Assistant Professors Pelluet, Walker, Eddy, MacPhee, Owen; Miss Patrick.

The minutes of the regular meeting of March 3rd and of the special meeting of March 7th were read, approved, and signed.

1. On behalf of the committee on degrees for honours course students in scientific subjects, Professor Lehmann submitted a progress report.

2. The Chairman read a letter from Professor Alexander thanking the Council for his election to the Senate of the University.

3. The Chairman announced the gift by Mrs. R. B. Wells of two prizes of twenty-five dollars each for proficiency in French. The Department of Modern Languages proposes the following terms of award, in which Mrs. Wells concurred: the prizes to be offered only to students whose native language is not French, one prize to be given to third year students and one to fourth year students, taking senior work in French, both prizes to be awarded on the basis of a special oral and a special written examination. The Council agreed to the conditions proposed and desired that its appreciation be sent to Mrs. Wells for her generosity.

The Chairman then read the following letter from Mr. W. R. Wees, B.A. '23.

March 31, 1924.

Professor J. M. MacEachran,
Department of Philosophy,
University of Alberta.

Sir,

I have the honor to ask permission to present an annual prize of a set of books to the student of the junior years taking the highest marks in Philosophy 2, the granting of the prize to any student to be conditional his registration in the full course of his year, and to his obtaining not less than 80% of the possible marks in the subject. I should like to have the honor of having the prize called "The Halley Hamilton Gaetz Memorial Prize".

The Council in this case also expressed its appreciation and asked that this be conveyed to Mr. Wees.

4. The results of the examination covering the special course in Latin 3 were submitted and ordered published.

5. Statistics showing the results of the second junior and

senior tests were submitted and after some discussion ordered recorded in the minutes. (See below.)

6. Special Cases:

S. Barker: The Dean read a letter from Mr. Barker asking permission to take the final examination in History 1, on the basis of attendance of one hour a week. While Mr. Barker should have applied formally at the beginning of the term for this permission, the Council was inclined to believe that although he had acted loosely in this matter, he had acted in good faith, and therefore granted his petition. It was understood that this grace on the part of the Council involved no precedent.

Miss G. Simenstin, who had made a mark of 42% in Psychology 55 in 1922-23, but who, through illness had been unable to take the supplemental, petitioned for permission to take the second half of this course, together with Psychology 51 at the coming Summer Session and write the examination on the whole of the Psychology 55 at the close of the second part. As Miss Simenstin expects to graduate in 1925 and has a regular teaching position on the city staff, her request, on the recommendation of the Department of Philosophy was granted.

7. Assistant Professor MacPhee raised the question as to whether action should be taken to eliminate students from the University, who required more than say five years in which to secure the Bachelor's degree. Some discussion followed in which it was pointed out that such a rule might be difficult to enforce, owing to the fact that many of our students are teachers and demonstrators, doing one or two courses as the opportunity permitted.

8. Professor Rowan reported that Miss Dora Newson had passed the special supplemental in Zoology 3, with the mark of 56%.

The Council adjourned at 5:30 p.m.

STANDING OF FOURTH YEAR STUDENTS FEBRUARY TESTS 1924 (97)

No. of students without failures	- 73 or 75%	in 1923	80%

W. S. M. Kerr

A meeting of the Council of the Faculty of Arts and Sciences was held in room 235 Arts Building on Saturday, May 10, 1924 at 10 a.m.

There were present: Dean Kerr in the chair, Professors MacEachran, Lehmann, Sheldon, Lewis, Allan, Burgess, MacGibbon, Gordon, Burt, Strickland; Assoc. Professors Misener, Campbell, Smith, Long; Assistant Professors Pelluet, Walker, Eddy, McGoun, MacPhee, Hardy, Owen, Dunn; Miss Patrick, Mr. Race.

1. The minutes of the previous meeting were read and approved.

2. The following students, whose records had been considered by the Arts Revision Committee consisting of Dean Kerr, Chairman, Professors Burt, Allan; Assoc. Professor Smith and Mr. Matthews, were recommended to the Senate for their respective degrees:

Bachelor of Arts

Balaam, Ruth V.
Beny, Helen
Bickell, Jessie C.
Cook, Janet M.
Driscoll, Aileen
Gerrie, Constance C.
Graham, Marjorie K.
Gratz, Muriel M. (with First Rank. Honours in Mathematics.)
Hayes, Mary M. (Sister)
Hobbs, Edith H. (with Second Rank Honours in History).
Hollinshead, Lorna E.
Iddings, Theresa A.
McCaffary, Marie G.
Clarke, Alfred E.
Clarke, Thomas
Crawford, Hugh W.
Glover, Robert M.
Grindley, Thomas W. (with First Class General Standing in Arts & Ag.
Gerrie, John W.
Harkness, Douglas S.
Jamieson, Kenneth R. (with First Class General Standing in Arts & Law)
Karran, Frederick R. D.
Lebourveau, Homer B.
Lee, John G.

MacLean, Dorothy M. (with Second Rank Honours in English)
MacLeod, Agnes J.
MacNab, Kathleen M. (with First Rank Honours in History).
Moffat, Flora
Moraw, May
Newson, Dora A.
Raver, Annabel
Rowe, Mildred E.
Stanford, Margaret
Stothers, Jennie
Villy, Barbara L. (with First Rank Honours in English).
Walker, Marjorie
Wallis, Edna I.
Baltzan, Harry L.
Bradford, Andrew C.
Butchart, Elwood A
Campbell, Clarence S.
Cassels, John M. (with First Rank Honours in Political Economy.
Young, Margaret I.
Heathcote, Lesley M. (with First Rank Honours in Modern Languages).
Herbreteau, Josephine (Sister)
MacArthur, Kenneth D. (with First Rank Honours in History)
McCorry, James
Macdonald, Bruce J. S.
McKay, Hugh D. (with First Class General Standing in Arts and Law).
MacMillan, William A.
Manning, Frederick C.
Marshall Samuel.
Megas, Joseph
Newson, Frank J.
Powell, Roscoe G.
Putland, Arthur K.
Rookwood, Maurice
Ruddy, Charles E.
Saucier, Jack J. (with First Class General Standing in Arts & Law).
Simpson, Alexander M.
Stacey, Earl C.
Swift, William H.
Teskey, Hugh G.
Todd, William H.
Tuck, Mervyn A.
Turner, William O.
Underwood, Clifford
White, Edward, W.
Williamson, James O.

Bachelor of Commerce

Caldwell, Olive J.
Charlesworth, Doris
Baker, Robert M. (with First Class General Standing)
Bures, Anton J. (sith First Class General Standing)
O'Donnell, Cyril
Owen, Philip
Simpson, Douglas (see below).

Bachelor of Science in Household Economics

Fairfield, Alice
Lawson, Elizabeth, M. M.
Malone, Margaret M.
McIntyre, Edna H.
Simpson, Gretta S.
Stacey, Ferne L.
Timmins, Beatrice
Wilson, Hilda M.

Bachelor of Science in Pharmacy

Hollinshead, Guy F.
Scott, Norman
Stothers, William

3. The following records were considered, in the case of graduating students, but no recommendations were made:

Helen Armstrong, failed English 52 with a mark of 24%. This was raised to 30%. (B.A.)

Robert Cameron failed History 57 with a mark of 42%. (B.A.)

Donald Currie failed Psychology 52 with 44% and French 5-4 with 46%.

Kenneth Duggan failed Political Economy 65 with 46%. It was agreed to allow him a supplemental in Political Economy, but the proposed aegrotat in Accountancy was withdrawn. (see page 92). (B.Com.)

F. Grindley failed C.E. 1 with 44%. (Arts and App.Sci.)

Duncan McNeill failed History 57 with 43%. (Arts&Law.)

Margaret Matthias failed History 57 with a mark of 38%. (Arts&Law)

The case of Douglas Simpson was then considered. On the motion of Professors Lehmann and Allan his mark of 45% in Chemistry 1 was raised to 50, and he was granted aegrotat standing in Political Economy 73.

Ruby Wood failed in Geology 54 with 40%, Chemistry 51 with 46% and Physics 6 with 42%.

PRIZES AND SCHOLARSHIPS

The Jane Alexander Memorial Prize

In Geology: Marjorie Walker

In Latin: Gwen Little

The Gordon Stanley Fife Memorial Prize

Kenneth D. MacArthur

The Wells Prize in French

Sister Mary M. Hayes (Fourth Year French)

Anton J. Bures (Third Year French)

The Coté Prize in French

Flora Moffat

The Halley Hamilton Gaetz Memorial Prize in Philosophy 2

Olive Folkins

Mathematics 1 Prize

Not Awarded

Mathematics 3 Prize

Miss Dorothy McNichol

The Aikens Scholarship in English

Olive Haw

The Huestis Prize in English

Marilda Clermont

The Hosford Prize in English

Olive Haw

The Bishop Memorial Fellowship not awarded.

The Vallée Prize in French 1-3: Miss Wilma Coone

The Société du Parler Français Prize: Gwen Toby (French 5-4)

MEDALS

The Lieut. Gov. Gold Medal for the Study of Shakespeare -

Not Awarded

The Charles Allan Stuart Gold Medal in Classics - Not Awarded

The Rutherford Gold Medal in English: Barbara Villy.

The Women's University Club Gold Medal: Sister Herbreteau

The James Ramsey Gold Medal in Mathematics: Muriel Gratz.

The Pharmaceutical Association Gold Medal in Degree Course

Guy Hollinshead

The Club LaVerendrye Gold Medal in French: Lesley Heathcote

The Bishop Memorial Felloship in English - Not Awarded

Bachelor of Science in Arts

Andrews, Elizabeth E.
Bradford, Marjorie (with second Rank Honours in Mathematics)
Mitchell, Bessie
Baker, Roy I.
Salt, George (with First Rank Honours in Botany)
Tomlinson, Horace O.

4. The following recommendations of the Revision Committee were confirmed, that

J. W. Giffen, on the basis of illness be granted aegrotat standing in Chemistry 52 and supplemental examinations in Chemistry 51, Philosopht 51 and Psychology 51.

Helen B. Young, on the basis of illness be granted aegrotat standing in Classics in English 51 and Geology 51.

Eleanor Matthews, on the basis of illness, be granted supplementals in Mathematics 7 and Philosophy 51.

Dorothy Smith, on the basis of illness, be granted aegortat standing in English 52, 53, 62, French 52, her honours standing to be determined by her record in her senior year.

Louis Hyndman, on the basis of family affliction be granted a supplemental examination in History 3.

William C. McRae be granted one senior course in Mathematics on the basis of having passed two half honours courses, Mathematics 102 and 105.

James Beach, through a mistake having missed the examination in Political Economy 73 was granted a supplemental in this course.

5. The Dean stated that there had been a demand lately for an honours course in Latin and French. Heretofore the honours course had been departmental, but the combination of these two languages was natural, so in answer to the demand Professor Alexander and the Dean had considered the question and had come to the conclusion that it would be possible to effect such a combination without additional teaching being required. The Council having given its approval to the principle, it was moved by Assistant-Professors Hardy and Owen that the following tentative scheme be provisionally

recommended to the University Senate, to be subject to possible revision later:

French and Latin Honours

Second Year: French 5-4, Latin 2-4, History 2, Psych. 1 or 2, English 2 (or for those who have begun, Germ.2-4)
Third Year: Two French courses; one Latin; English or Div. B.
Fourth Year: Three French courses; one Latin.

Latin and French Honours

Second Year: French 5-4, Latin 2-4, Psych. 2, English 2 (or Germ. 2 or Greek 2), Classics in English 51.
Third Year: Two Latin courses; one French; 1 option (related)
Fourth Year: Two Latin courses; one French; 1 option "

6. Professor Dunn stated that certain difficulties had arisen through a lack of practical experience on the part of graduates of the Degree Course in Pharmacy, as compared with the graduates of the Licentiate Course. He declared that it was the wish of the Pharmaceutical Association, and with this wish he concurred, that at least twelve months apprenticeship be required of students in the Degree Course in Pharmacy. With this end in view he moved that the Council recommend to the Senate that before entering his Third Year in the Degree Course, a student be required to complete at least twelve months apprenticeship, and that the total apprenticeship before license to practise was granted should be two years.

7. Professor Lewis announced the gift of a collection of ferns from Mrs. de Forrest. The Council expressed its gratitude for the gift and recommended its acceptance by the Board of Governors.

8. Professor Sheldon raised the question as to whether it would not be advisable to require a six hour examination in all three-hour courses. This question was referred to the

General University Revision Committee.

The Council adjourned at 11:20 a.m.

#

At a brief meeting of the Faculty of Arts and Sciences on Monday, May 12, 1924, subsequent to the meeting of the General Faculty Council, it was agreed that the Pharmaceutical Gold Medal should be awarded to Guy Hollinshead. Mr. Hollinshead had made an average mark of 77.1% in his Fourth Year in the Degree Course in Pharmacy. Being under the impression that he was repeating his year, Professor Dunn proposed that the gold medal be not awarded. The Council concurred in this view at the meeting on May 10th. Subsequently it was discovered that it was his Third Year which Mr. Hollinshead had repeated and after that was away from the University for a year. As a result of this correction, the Council had agreed to award the medal.

The following report shows the record of the Second, Third and Fourth Year Students at the final examinations, May 1924.

STANDING OF STUDENTS IN THEIR SECOND YEAR AT THE UNIVERSITY

Second Year (71)	First Test	Second Test	Final
Per Cent without failures	48	31	48

W. S. A. Kerr

A meeting of the staff of the Summer Session 1924 was held in the Senate Chamber on Saturday, August 16, 1924 at 10:30 a.m.

There were present: Dean Kerr in the chair, Associate-Professors Campbell, Long; Assistant-Professors Walker, Hardy, McPhee; Mr. de Savoye.

The results of the final examinations in the following subjects were read, approved and ordered published: Chemistry I, Parts I and II, French 1-3, Parts I and II, Greek 2-4, Parts I and II, History 56, Parts I and II, Latin 1-3, Parts ~~I and~~ II, Mathematics I, Parts I and II, Mathematics 7, Parts I and II, Mathematics 53, Part I, Mathematics 62, Part I, Physics I, Parts I and II, Psychology 51, Parts I and II, Psychology 55, Parts I and II.

R. D. Henderson was ill at the time of the examinations. As his term marks, however, were satisfactory, it was agreed that he should be granted a supplemental examination.

The Dean asked the opinion of those present as to what extent they were satisfied with the type of work done at the Summer Session. The general feeling was that the students worked hard, but had difficulty in digesting the material presented, owing to the necessary pressure under which the work was given.

The Chairman stated that he had been approached by certain students who asked if something might not be done to expedite their progress towards the degree. In more than one instance the following proposal had been put forward: that teachers in active service should be allowed to do the first

half of a given course extra-murally during the winter and be permitted to take the second half at the Summer Session, writing an examination on the whole course at the close of the session. This would enable them to overtake two courses per year and would make progress towards the degree less dispairingly slow than at present. A general discussion followed touching this question. Sympathy was expressed towards the proposal in principle. Voice was given to the feeling that such a scheme might be put in operation if there was some method of selecting students worthy of the privilege sought. Another member of the staff suggested that a higher passing mark than 50% might be required in case the scheme were seriously considered.

The Dean finally stated that Manitoba had done something of this kind for teachers in that Province and that the University of Toronto had some plan in operation. He offered to correspond with these institutions and secure what information there was to be had.

The Council adjourned at 11:25 a.m.

W. A. R. Kerr

A regular meeting of the Council was held on Monday, October 6th, 1924 at 4:45 p.m. in the Senate Chamber.

There were present: Dean Kerr in the chair, Professors Lehmann, Sheldon, Lewis, Boyle, Coar, MacGibbon, Collip, Gordon, Strickland, Campbell; Associate Professors Smith, Rowan, Long; Acting Director Dunn; Assistant Professors Walker, MacDonald; Miss Patrick; Assistant Professors Warren, Sandin; Lang; and Mr. Race.

The Chairman welcomed the members of the Council back to the work of the Session.

He introduced two new members, Assistant Professors Lang and Sandin, and extended the congratulations of the Council to Professors MacDonald and Warren, the former on the attainment of the degree of D. Litt. at Edinburgh, and the latter on the gaining of the degree of Ph.D. at Toronto.

The minutes of the regular preceding meeting and of the meeting of the teaching staff at the close of the Summer Session were read, approved and signed.

The following agenda was then proceeded with:

I. Business arising out of the minutes:

(a) Concessions re attendance for teachers in active service proceeding to the Bachelor's degree. The Chairman reported that he had gathered certain information touching the question from other Canadian Universities.

COMPARATIVE REPORT ON RESULTS OF SUMMER SESSION COURSES. '24.

Course	Men	Women	Drop	No.failed	%failed
Chem.1 (1)	4	2	2	1	25%

Psych. 55 (1) (2) 3 results to come in.

Total registration in Summer Session 109
Registration in 1923 -- 94.

(1) indicates Part I
(2) " Part II

In the case of the Psychology courses, the students who had taken the first part in Calgary were permitted to write the examination on both parts on the completion of Part II.

RESULTS OF SAME SUBJECTS IN FINAL EXAMINATIONS IN MAY

Course	Total in class	# failed	% failed
Chem. 1	80	16	20
French 1-3	104	13	13
Greek 2-4	5	0	0
Latin 1-3	95	18	19
Math. 1	124	35	29
Math. 7	14	4	29
Phys. 1 (lect.)	124	32	26
(lab,)	115	19	17
Hist. 56 Not offered.			
Math. 53	3	0	0
Psych. 51	28	3	11
Psych. 55 not offered.			

He proposed with the consent of the Council to submit this for consideration at the next regular meeting.

II. Aikins Scholarship

Professor Gordon reported that the revised terms of the Aikins Scholarship as drawn up by the Dean and himself had been adopted by the University Senate as follows:

I. This scholarship, the gift of Sir James Aikins, is of the value of "125.00 per annum. It is open to graduating students who have pursued the study of English throughout the first three undergraduate years--the scholarship being tenable during the fourth year; provided that such students shall have obtained satisfactory standing in English 1 or its equivalent, and not less than seventy-five per cent in English of the second year. If a candidate takes only one course in English in the third year he must obtain not less than seventy-five per cent. If he takes more than one course, his average mark must be not less than seventy-five per cent and in no English course must he fall below second class standing.

II. The selection of the scholar will be made by a committee appointed by the President; the committee to consider not only the academic standing of the candidate, but also evidence of intellectual grasp and of proficiency in expression as displayed in such essays or other tests as the committee may impose."

III. Reports of Committees

(a) Committee to discuss the possibility of placing Chemistry I in the first year. The Dean reported that owing to the absence of various members during the summer it had not been possible to bring the Committee together. The Committee, therefore, merely reported progress.

(b) Committee on the question of the degree to be granted to Honour students in the scientific course whether B.A. or B.Sc. The Chairman, Professor Lehmann, reported progress.

(c) Committee on the question of requiring a fifth course in the third and fourth years. The Dean reported progress.

(d) Committee on question of lengthening apprenticeship in the B.Sc. Pharmacy. The Dean reported that in the opinion of the Senate the suggested lengthening of the apprenticeship was not in conformity with the spirit of the Pharmacy Act. The Senate, therefore, had deemed it inadvisable to press the matter.

Professor Dunn stated that at a recent meeting of the Council of the Pharmaceutical Association that that body had concurred with the view of the University Senate, and it had been agreed that the regulation should be left standing. Professor Dunn stated that the Council was satisfied to leave, meantime, the University to meet the difficulty in the best way possible.

(e) Honours Committee

The preliminary report of the Honours Committee submitted by the Acting Chairman, Professor Gordon, was then submitted.

(a) Fred Antrobus Before going on with Honours in Mathematics it is required that Math. 55 be cleared up or else Mr. Antrobus be required to proceed with the general course.

(b) Donald M. Brown Moved by Dean Boyle, seconded by Professor Gordon that in the view of the Council, Mr. Brown's record is not such as to justify him,

therefore, his enrolment as an Honours student in Physics was not agreed to.

(c) Lorna L. Dalgleish In the discussion of this case, the general opinion is that Miss Dalgleish's record would not justify her admission to read for Honours in History. On motion of Dean Boyle and Professor Sheldon her application was, therefore, declined.

(d) Fred Irwin On motion of Professors Lehmann and Walker it was agreed that Mr. Irwin be permitted to register for the current year as follows:

Chemistry 51, Chemistry 58, Chemistry 101 and Math. 55, but that his case comes up for consideration again at the beginning of the Academic year 1925-26.

IV. Special Cases

(a) David Simpson The request of David Simpson for a supplemental with a view to retrieve work failed in 1914 was regretfully declined.

(b) Irene Castor Owing to her poor record in 1923-24, Miss Castor had been informed by the Dean that she would only be allowed to register subject to the special approval of the Faculty Council. During the summer Miss Castor passed Political Economy at the University of British Columbia, and on her return passed supplementals here in French 52 and English 52. She has thus cleared her record to date.

The Council agreed that Miss Castor should be permitted to enroll at the current Academic Session.

(c) R. D. Henderson The petition of R. D. Henderson, a third year student in Arts and Law, for aegrotat standing in Latin 1-3 taken at the Summer Session 1924 was declined, and the privilege of a special supplemental was granted by the Examinations Committee and confirmed.

(d) J. F. Caley The request of John F. Caley to enter the Lab. of Physics 6 one hour late in order to avoid a conflict with Greek I was refused.

(e) Edmund E. Cross The petition of Edmund E. Cross for exemption of one hour a week in attendance in History 58 owing to a conflict with a one hour course in Bills and Notes was granted, the reason being that though Mr. Cross had already failed the course he has credit for full attendance in History 58.

(f) Fred McDougall The petition of Fred McDougall, student in B. Sc. Pharmacy, for full exemption from Physics I was refused but Mr. McDougall while required to take Lab. was granted exemption from lecture course.

V. Professor Coar brought up the fact that certain members of the Council were automatically excluded from the meetings owing to the courses for teachers which are now given in the late afternoons. He suggested that Tuesday when the C.O.C.T. was in operation might be a more convenient time.

Dean Boyle recalled the fact that there had been a formal schedule in existence, drawn up with a view to avoid clashes in meetings of various organizations.

Professor Campbell and Mr. Race were appointed a committee to resuscitate this schedule. The Dean mentioned that when Monday was originally chosen it was satisfactory to everybody, but on his suggestion the matter was left over for further consideration at another meeting.

The meeting adjourned at about six p.m.

W. S. M. Kerr

A regular meeting of the Faculty Council was held in the Senate Chamber, Monday, November 3rd, 1924 at 4:30 p.m.

There were present: Dean Kerr in the chair, Professors MacEachran, Lehmann, Sheldon, Boyle, Allan, Coar, MacGibbon, Gordon and Campbell; Miss Misener, Associate Professors Rowan and Long; Assistant Professors Pelluet, Walker, Miss Patrick, Warren, Sandin and Lang.

The minutes of the previous meeting having been read, approved and signed, the following agenda was proceeded with:

I. Business arising out of the minutes:

(a) Reports of Committees

(I) Re Concessions for Teachers in Active Service

The Chairman stated that he had gathered certain information which was ready for submission to the Council, but that in the meantime some special factors arising from the situation in Calgary had required consideration and President Tory had asked Professor MacEachran and the Dean to study these and report upon them before the question as a whole was laid before the Council.

(2) Committee to consider the placing of Chemistry I in the first year, and the possible addition of a course to the third and fourth years. Owing to the indisposition of the Chairman the Committee could only as yet make a progress report.

(3) Committee on the degree to be granted to Honour students in the scientific division.

The Chairman, Professor Lehmann, on behalf of the Committee presented the following report:

"That in view of the present regulations regarding teachers' certificates of "Science Specialists", students taking Honour courses in scientific Departments (1) be permitted at the time of registration to select either the degree of B.A. or B.Sc. on the completion of their course, (2) that this option be specifically mentioned in the regulations governing Degrees with Honours, and, (3) that these regulations also direct attention to rule #1 under Graduate Degrees, viz., that of the proper sequence of degrees."

The report was unanimously adopted.

(4)Honours Committee

Professor Gordon on behalf of the Honours Committee presented a second report, the details of which follow:

William St. George Hollies, fourth year. Honours Chemistry. The Courses approved for the current session are Chemistry 102 and Math. 57. Mr. Hollies will take two years to finish.

R. L. Kutz, fourth year, Honours Chemistry. The courses approved for the current session are Chemistry 102, Physiology 61 and Math. 57. Mr. Kutz is registered for three courses instead of four because he is taking an extra year.

W. H. Mueller, third year. Honours Chemistry. Courses for the current session approved: Chemistry 51, 58, 102 and Math. 55.

Murray G. Sturrock Honours Chemistry. Courses approved for the current session are Chemistry 51, 58, 101 and Philosophy 51.

John W. Sutherland third year. Honours Chemistry. The Courses approved for the current session are Chemistry 51, 58, 101 and Physics 6. This was approved in view of Dr. Alexander's note, Minute Book pg. 102.

Catherine Barclay third year. Honours English. The courses approved for the current session are English 60, 62, 53, French 51 and German 1-3.

T. C. M. Hargrave third year. Honours in English. The courses approved for the current session are English 53, 60, 62, Philosophy 51 and Greek 1.

Olive Haw, fourth year. Honours English. Courses approved for the current session are English 59, 60, 109, French 51 , and Philosophy 51.

Catherine M. Keir, third year. Honours English. The courses approved for the current year are English 62, 53, 60, French 51 and Latin 1-3. Granted Chemistry 1, Philosophy 1 because of work at Bedford College, London.

Dorothy McAlpine, third year. Honours English. The courses approved for the current session are English 53, 60, 62, and Classics in English 51.

Kenneth McKenzie, third year. Honours English. The courses approved for the current year are English 53, 60, 62, Classics in English 51 and French 5-4.

Marjorie Sherlock, third year. Honours English. The courses approved for the current session are Psychology 52, French 51, English 59, 60, and 62.

Dorothy Smith, fourth year. Honours English. The courses approved for the current year are English 59, 61, 109 and French 51

Ethel Cobb, third year. Honours History. The courses approved for the current year are History 58, 101, Political Economy 63, English 59 and Classics in English 51(extra).

Marion M. Gimby , third year. Honours History. The courses approved for the current year are French 51, History 101, 58, 56

and German A.

Dorothy E. Werthenbach, third year. Honours History. Miss Werthenbach submitted the following registration: Latin 3, History 2,3,101, Political Economy 63 and Education 53. History 2 and Political Economy 63 conflict, but both are compulsory. The Committee recommend Political Economy 63 this year as it is not given next year and History 56 this year instead of History 2, and History 2 to be taken next year.

Eva Jagoe, third year. Honours Mathematics. The courses approved for the current year are Physics 54, Math. 53, 57, 101 and 103.

Mrs. Delle Taylor, third year. Honours Mathematics. The courses approved for the current year are Math. 53(1/2), 57, 61, 101 (1/2) and Math. 103.

Mary Manson, third year . Honours Classics. The courses approved for the current year are Classics in English 51, Latin 51, 105, Greek 51, 105 and Philosophy 51 as an auditor. Miss Manson already had Philosophy 55 and so escapes #6,p.71 of the Calendar.

Jean Williamson, third year. Honours in Moderns. The courses approved for the current year are French 51, 55, German 51 and English 62. Miss Williamson will take English 2 next year.

Jean McKitrick, fourth year. Honours in Psychology. The courses approved for the current year are German 2-4, Philosophy 53, Psychology 54, 104 and Physiology 51.

Gwendoline Little, Honours in French and Latin. The courses approved for the current year are German 2-4, French 51, 55, Ancient History 51, and Latin 52.

Gwendoline Toby, Honours in French and Latin. The Courses approved for the current year are French 51, 55, Philosophy 51; German 2-4 and Latin 52.

Miss Toby is eligible to register for German 2-4 with suspended credit on German 1-3. She took English 1 and German A in "23-'24.

M. L. Watts, third year. Honours in Philosophy. The courses approved for the current year are Psychology 51, 55, Philosophy and Math. 62.

I. J. W. Oke Honours in Political Economy. Mr. Oke is deficient in French A and Geometry. The Committee recommends that he clear his record before considering Honours, or else proceed on a pass course. He is deficient also in two first year languages.

Randolph G. Brewer Honours in Chemistry. Mr. Brewer's second year standing 1922-23 is as follows:

Latin 1	68
" 3	61
English 2	50
Chem. 1	61
Math. 7	36
Botany 1	71
Pol. Ec. 1	59
Phys. Ed.	Pass.

Mr. Brewer was granted a supp in Math. 7, but did not come last fall to write. The Committee considering the above record a low third, and in view of the lack of Physics and the supp in Math 7, recommends that the application be refused.

This report was adopted unanimously.

The Dean called to the attention of the Council the fact that the University of Manitoba this year required Senior Matriculation for admission to Honours courses; in this respect following the example set by Toronto. He gave his opinion that sooner or later we should have to take a similar step. A general discussion followed during which various arguments supporting such a move were advanced. It was agreed on Professor Coar's suggestion that the matter come up for further discussion at the next meeting of the Council.

(b) Hour of Meeting for the Faculty Council The Chairman reported that the General Faculty Council had considered the question of the Council's hour of meeting, and had referred the matter to the Council of the Deans for study and report.

III. Communication from the Department of Physics. Dean Boyle, on behalf of the Department of Physics gave the following notice of motion "That in the Second Year Honours Physics Course, p. 75 Calendar, Prerequisites be changed. "Physics 6 or 8 or 12" be changed to "Physics 6 and 12" and Chemistry I be deleted. Also in the Third Year, p.76 "a course in Chemistry" be substituted for "one free option."

IV. Re statement of Matriculation requirements to accord with the new High School Curriculum. The Dean stated that the time had come when the University should take cognizance of the new High School Curriculum. GradesIX and X were in effect this year and in 1925-26 Grade XI would be brought into effect. The President had suggested that each Council nominate one member to a general committee which might study and report on the

raised by the new curriculum in relation to University Matriculation. The Chair suggested that Professor Sheldon who was Chairman of the Freshman Committee and a member of the University Examinations Board, should represent the Faculty of Arts and Sciences. This nomination was agreed to.

V. Special Cases.

(a) Harry F. Hardin and Almeda Jean McLennan

The Council was agreed in the case of the above students, as they have credit for Chemistry I and are doing advanced courses in Chemistry, that they shall not now be required to clear Chemistry of Grade XI in spite of the fact that the latter course is required for admission into B.Sc. in Pharmacy, the reason being that apparently in good faith they entered the Faculty of Arts clear of conditions.

(b) Rockwell R. Hinchey It was agreed subject to satisfactory passing of tests, to allow Mr. Hinchey to register in Psychology 52, Philosophy 51, Hebrew 54 and Classics in English 51.

(c) Dorothy D. Craig It was agreed to allow Miss Craig exemption from two attendances per week in History I, and it was agreed also that Miss Craig should attend the quiz hour and take the regular intra-term tests, the reason being that, if compelled to repeat full attendance in History I, she would be forced to give up Honours Botany.

(d) Margaret E. Clarke The Council decided, with respect to Miss Clarke's course in Physiology 61, that she take the lab. attached to the course on Friday afternoon, attend one hour per week after Christmas and take in addition the regular intra-term tests in the course.

(e) H. D. Ainlay The request of Mr. Ainlay to substitute Education 53 for Latin 4, Composition, was refused.

(f) Earnest Villy The request of Mr. Villy to alternate attendance one hour per week as between French 51 and Math. 62 was granted.

VI. The following students having at the recent supplemental examinations completed the requirements, were recommended to the University Senate for their respective degrees:

Bachelor of Arts Donald Currie
Margaret Matthias
Helen Armstrong
Frank L. Grindley

Bachelor of Science in Arts Anne Kennedy

Bachelor of Commerce Kenneth Duggan.

The meeting adjourned at 5:45p.m.

W. S. M. Kerr

A regular meeting of the Council was held in the Senate Chamber at 4:30 p.m., Monday, December 1st, 1924.

There were present; Dean Kerr in the chair; President Tory, Professors Alexander, Broadus, MacEachran,

Sheldon, Lewis, Boyle, Coar, MacGibbon, Burt; Miss Misener, Associate Professors Smith, Rowan, Long; Assistant Professors Walker, Miss Patrick, Eddy, Owen, Warren, Sandin, and Mr. Race.

The minutes of the previous meeting, having been read and approved, were signed.

The following agenda was then proceeded with:

I. Business arising out of the minutes:

(a) Reports of Committees:

1. Concessions for teachers in active service.

The Chairman asked President Tory, who has been occupied with the question, to make a statement to the Council respecting the present position. The President reminded the Council that this question of extra-mural teaching had been before the University authorities a very long time in one form or another. He alluded to the fact that certain Eastern Universities had recently embarked on ~~whether they wished it or not, been apparently forced into~~ a measure of extra-mural teaching. The University of Toronto had made arrangements through extra-mural work and summer sessions to enable students possessing senior matriculation to cover second, third and fourth years of the Arts course in five years. The President was of the opinion that, if we embarked on any extra-mural scheme, the Toronto plan would offer a basis for

possible action. He recalled to the Council that courses given by the Department of Philosophy in Calgary for teachers were being appreciably patronized. Upwards of seventy students are enroled this session. The real issue was whether this plan of sending lecturers out for week ends should be developed and whether, if this were done, it would not be wise also to establish other centres, such for instance as Lethbridge and Medicine Hat. The Chair asked the members of the Council to express their views on the question. An interesting discussion then ensued; some members favouring in principle the plan suggested; others having doubts as to the effect on the University's central organization. No particular enthusiasm for extra-mural work as such was exhibited. It was finally agreed that the matter should be left over for further consideration at the next meeting of the Council.

2. Committee to consider the placing of Chemistry 1 in the first year, and possible addition of a course to the third and fourth years. The Committee through the Chair reported progress.

(b) The question of the adoption of Senior Matriculation for admission to Honours Courses was left over as the hour was becoming late.

(c) The following motion, notice of which stands in the names of Professors Boyle and Smith, was then carried: "That in the Second Year Honours Physics Course, pg.75

calendar, prerequisites to be changed. "Physics 6 or 8 or 12" be changed to "Physics 6 and 12" and Chemistry 1 be deleted. Also in the Third Year, pg. 76 "a course in Chemistry" be substituted for "one free option".

II. The Dean called attention to the fact that two years ago the University had for financial reasons been compelled to discontinue the teaching of Hebrew. This work has been left in the hands of affiliated colleges. The Hebrew work is still conducted by Professor A. D. Miller, who had previously been our own instructor in this subject. It was to be hoped that,as soon as financial conditions warranted, the University would resume the teaching of Hebrew and Professor Miller's name would again appear on the University staff. The Dean suggested, therefore, that in the meantime Professor Miller's work in Hebrew should be recognized as previously as a senior language option. He read a letter from Professor Miller stating that the Hebrew work was being carried on precisely as formerly. The Council, having heard the explanation, agreed to the recognition of Hebrew .

III. Special Cases.

(a) Jacob Caspar It was agreed, that owing to a time table conflict and with the Departments concerned concurring, Jacob Caspar should have exemption from one hour per week attendance in History I and in Latin 2-4.

(b) Ruby Wood, having petitioned for supplementals in Geology 53, Physics 6 and Chemistry 51 next spring, on motion of Professor MacGibbon, it was agreed that Miss Wood be offered the opportunity of coming in at New Year's of 1925 or 1926 and completing the three courses in which she failed, by resident study from New Year's until the close of the Spring term.

(c) M. Weinloss The Council concurred in the action of the Medical Faculty Council granting Mr. Weinloss certain concessions in attendance and Lab.work in connection with Chemistry 51.

The meeting adjourned at about 6:15 p.m.

W. A. R. Kerr

The two hundred and twenty-seventh meeting of the Council of the Faculty of Arts and Sciences was held at 4:30 p.m. in Room 212 Arts Building Monday, January 5th, 1925.

There were present: Dean Kerr in the chair; Professors Alexander, MacEachran, Lehmann, Sheldon, Lewis, Coar, Gordon, Burt and Campbell; Miss Misener, Associate Professors Smith, Rowan, Long; Mr. Dunn; Assistant Professors Walker, MacDonald, Eddy; Mr. Lang and Mr. Race.

I. The minutes, having been read and amended in one point of phraseology, were approved and signed.

The following agenda was then proceeded with:

II. Business arising out of the minutes:

(a) Reports of Committees

(1) Concessions for teachers in active service.

In the absence of the President, who had led the discussion at the previous meeting on this subject, the matter was left over for consideration at a future meeting.

(2) Committee to consider the placing of Chemistry I in the first year and the possible addition of a course to the third and fourth years.

This Committee reported progress.

(b) The question of the adoption of Senior Matriculation for admission to Honours Courses was referred to the preceding Committee for consideration and report.

III. Special Cases.

(1) Margaret I. McNeill petitioned for exemption from one hour a week in Latin A owing to a conflict with Latin 36. Granted.

(2) Dorothy E. Werthenbach. Being compelled to drop out at Christmas 1924 for financial reasons, and proposing to return New Year's 1926, Miss Werthenbach petitioned for credit for work taken during the Autumn term of 1924-25 and for permission to resume the courses temporarily dropped in January 1926. If any of the courses concerned do not resume until January 1927 Miss Werthenbach is to have permission to take them up again at that time. Petition granted.

(3) Jean E. Lobb Miss Lobb entered the University 1910, and

owing to financial and health difficulties does not expect to graduate until after the coming Summer Session. She petitioned for permission to substitute a second year course in Dynamics 1912-13 plus Mathematics 62(Autumn term 1924-25) in lieu of a half course in Calculus failed in 1913-14. In view of attendant circumstances, and it being understood that there was no precedent involved, the Council granted Miss Lobb's petition.

(4) D. O. Sproule, who holds Grade XI and Grade XII certificates, asked permission to enter the University at the beginning of January and devote himself entirely to Latin A, 1-3, French A and French 1-3, with a view to entering with a clear record into the second year of B.Sc. in Arts this coming Autumn. As Mr. Sproule possesses matriculation in Latin and has done some preliminary work in French, his petition was granted, it being understood that the University would accept no responsibility for his success.

(5) Mrs. Delle Taylor entered upon her third year Honours Mathematics September 1924. She has now made up her mind that she does not want to proceed with Honours and asks to be transferred to the pass course. The Council agreed in principle to the petition and referred it for the working out of details to the Honours Committee, the Department of Mathematics and the Dean.

(6) Miss Catherine Keir entered upon her third year Honours English September 1924. The Department of English is now of the opinion that Miss Keir cannot successfully carry on

Honours work and advised the Council that it would be wise ~~that~~ if the student in question would transfer to the pass course. It was agreed that Miss Keir should continue her third course in English for the balance of the year as a pass student, and that in September 1925-26 her registration in the Department of English should be restricted to one course, so that the Senate regulation of not more than two courses per year should be ~~=~~observed, so far at least, as the bulk of her work taken these two years was concerned.

The meeting adjourned at 5:15 p.m.

Addendum

STANDING OF SECOND YEAR STUDENTS AT NOVEMBER TESTS 1924

Those not under the supervision of the Freshman Committee.

" " " "	1924-25	16
" " more than two failures	1923-24	17
" " " " " "	1924-25	10

Mrs. Delle Taylor It was agreed that Mrs. Taylor, who wishes to transfer from Honours Mathematics to the general course for the degree of B.Sc. in Arts, be granted the following:

(a) Mathematics 62 (Part I) and Mathematics 57 (Part I) to be aggregated as one senior course. (completed).

(b) Mathematics 61

(c) Mathematics 101 (a, completed) (b) and Mathematics 103 to be aggregated as one senior course.

(d) Mathematics 53 (Part I), completed, and Mathematics 53 (Part II) as one senior course.

This will leave Mrs. Taylor four subjects to complete next year none of which may be mathematical. (see calendar, pages 70-71.) This decision was subsequently revised by the Committee in the following sense: the revision involving the exemption of Mrs.

Taylor from further obligation in respect to Mathematics 103. The courses which she has taken or which are at present in process of completion are be reckoned in the following way:

(a) Mathematics 62 (Part I) and Mathematics 110 are considered as the equivalent of one senior course.

(b) Mathematics 53 (Part I), credit for which was obtained at the Summer Session of '24, is to be completed at the end of the current term.

(c) Mathematics 61 is to be completed as a whole at the end of the present term.

(d) Mathematics 57 (Part I), Mathematics 101 (October to Christmas '24) and Mathematics 103 (October to Christmas '24) are all three to be considered as the equivalent of one senior course.

The above action regarding Mrs. Taylor is reported for information by the Committee appointed for the purpose. (See page 132.)

W. L. A. Kerr

The two hundred and twenty-eighth meeting of the Council of the Faculty of Arts and Sciences was held at 4:30 p.m. in the Senate Chamber on Monday, February 2nd, 1925.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Lehmann, Sheldon, Boyle, Allan,

Coar, MacGibbon, Gordon, Burt, Strickland, Campbell; Associate Professors Smith, Long; Assistant Professors Dunn, Pelluet, Walker, MacDonald, Miss Patrick, Eddy, Warren, and Mr. Race.

The minutes having been read and approved were signed.

The following agenda was then proceeded with:

I. Business arising out of the minutes:

1. Reports of Committees.

(a) Concessions for teachers in active service.

President Tory, who had suggested possible methods of meeting requests of teachers for extra-mural courses at the meeting of December 1st, stated that in his opinion it is inexpedient to make any definite move at present. He thought it would be wise to await the announcement of the stand to be taken by the Provincial Government on the Calgary College question which would probably be before the Legislature at the coming session. If the Government declared formally that, so far as they were concerned, nothing could be done to duplicate the University in Calgary, then perhaps with safety we might consider the question of concessions.

(b) Committee to consider:

1. the placing of Chemistry 1 in the first year.
2. the possible addition of a course to the third and fourth years.
3. the possible adoption of Senior Matriculation for admission to Honours Courses.

In connection with this Committee, President Tory stated that the Committee had met twice already and was to meet again

on Friday afternoon of the current week. He promised a report from the Committee for the Faculty Council at the March meeting.

II. Authorization of new courses for 1925-26 or changes in courses already sanctioned. No Department was yet ready to ask for changes and it was agreed that these might be made at the March meeting.

III. The results of the Christmas finals in Bacteriology 61, Geology 33, Household Economics 2, Household Economics 59 and Physics 3 (a) were submitted and approved. The only doubtful case was that of C. F. Weir who made 48 in Physics 3 (a) and who was recommended for pass by the instructor, Mr. Nichols. After an examination of his general record the Council decided that Mr. Weir's marks should remain at 48.

IV. In connection with the comparative statistics governing the first senior tests, it was agreed on the suggestion of Professor Allan that an additional column be inserted which would indicate the number of Arts students enrolled in that course in which students from more than one Faculty were registered.

V. Professor Campbell raised the question as to whether it would not be possible, when it is necessary to cancel lecture periods, either for the sake of the Students' Union or in the case of an exchange Professor, to use some hour other than that just prior to lunch. It was pointed out that courses time-tabled at 11:30-12:30 suffered unduly in this respect as compared with courses time-tabled at other hours. President Tory agreed that the point was well taken and should be kept in mind in the future.

VI. Special Cases.

R. A. Cameron. A petition was received from Mr. R. A. Cameron

who has completed the requirements for the degree of Bachelor of Arts except for History 57. As the course is not being given this year, and as Mr. Cameron has already put in his attendance, and is no longer at the University, it was agreed that he should be allowed to take a special supplemental in the spring. It is understood that he is to write the ordinary final course examination in History 57.

F. D. Waines. Mr. Waines is deficient towards his B. Sc. in Arts in a half course in Geology. As he has credit for Geology 32 he was permitted to enter Geology 51 as after Christmas. If this half course is successfully completed it is to be regarded with Geology 32 as giving Mr. Waines credit for one full senior course in Geology and hence completing the requirements for the B. Sc. degree.

The meeting adjourned at 6:00 p.m.

Addendum

W. S. H. Kerr

The two hundred and twenty-ninth meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 4:30 p.m. Monday, March 2nd, 1925.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Broadus, MacEachran, Lehmann, Sheldon, Lewis, Boyle, Coar, MacGibbon, Gordon, Strickland, Campbell; Associate Professors Smith, Rowan, Long; Assistant Professors Pelluet, Walker, MacDonald; Miss Patrick, Assistant Professors Eddy, Warren, Sandin, Mr. Race and Mr. Lang.

I. The minutes of the previous meeting having been read and approved were signed.

The following agenda was then proceeded with:

II. Business arising out of the minutes:

(a) Report of the Committee to consider:

1. the placing of Chemistry I in the first year.
2. the possible addition of a course to the third and fourth years.
3. the possible adoption of Senior Matriculation for admission to Honours Courses.

1. The placing of Chemistry I in the first year.

The Dean read the following memorandum setting forth a précis of the Committee's discussion and the conclusion reached which was averse to the placing of Chemistry I in the first year.

"The Committee canvassed this problem thoroughly during three meetings. The chief arguments that emerged as a result of the discussion in favor of the proposal are three:

1. The general desirability of widening the options in the scientific subjects so as to permit of the exercise of personal taste or aptitude.

2. The advantages to be derived for Botany, Zoology and Geology through having Chemistry made available as an antecedent subject.

3. It would be advantageous in the professional courses given in the Faculty of Arts and Sciences, to wit: Household Economics and Pharmacy, to have Chemistry in the first year.

In contradistinction to the above, the chief arguments against making a change seemed to be four as follows:

1. A majority feeling on the part of the Committee that Physics is to be regarded as the fundamental science and hence should come first.

2. Some years ago embarassment was caused from the very large numbers of students plucked in Physics. This is no longer the case. There is apparently now no more disability in respect to Physics than any other first year subject.

3. The difficulty of adjusting new 2nd year students who are increasing year by year in relative numbers; in both Household Economics and the degree course in Pharmacy approximately fifty per cent entered the University with Grade XII.

4. The financial problem, while it is not the business of the Faculty Council to deal with financial matters, the reaction of financial considerations cannot at present be neglected. If Chemistry were made optional with Physics in the first year it is clear the provision would have to be made for a possible considerable enrolment in Chemistry and problems of instruction and laboratory facilities with their attendant financial requirements immediately present themselves. With present difficult budgetary conditions the wisdom of making moves whose effects are uncertain becomes obviously dubious.

As the result of long discussion and weighing of the arguments above outlined your Committee reports without dissent against the placing of Chemistry at present in the first year. If however Grade XII were made the entrance to the Faculty of Arts and Sciences then the question of placing of Chemistry in the First Year might be reconsidered on a more favorable basis."

It was moved by President Tory, Chairman of the Committee, and seconded by Professor Sheldon that the memorandum as read be received and adopted, Professors Lewis and Walker being noted as opposed.

(2) The possible addition of a course to the third and fourth years. On behalf of the Committee the Dean stated that the

Committee had discussed this problem during four meetings and had had difficulty in arriving at a conclusion. Their ultimate decision was to recommend that nine courses in place of the present eight be required in the two final years. It was their opinion that the extra course should be selected from one of the Departments in which the student was already studying. Figures were produced indicating to what extent students in the third and fourth years were compelled, either through deficiencies in entrance languages or failures, to carry a fifth senior course. Certain new points emerged during the discussion. It was finally agreed on President Tory's suggestion to refer the question back to the Committee, that the matter might be considered again especially in the light of certain points raised in a communication from the General Revision Committee transmitted to the Faculty of Arts and Sciences.

(3) The possible adoption of Senior Matriculation for admission to Honours Courses. The Dean stated that the Committee had gone very carefully into this matter. Certain of the eastern universities, and now the University of Manitoba, had already adopted Senior Matriculation as entrance to Honours. It was felt that if possible we should maintain standards equal with those of sister institutions. The Committee had been unanimously of the opinion that from the academic stand point Honours Courses would be greatly improved through the addition of another year's study, but the members of the Committee had wondered whether the extra year with its financial burden would have an averse effect on the limited number of students presenting themselves

for Honours. A meeting of the Honours students had been called by the Dean. These students were unanimous in their approval from the academic stand point of the proposed change, and with the exception of one student who was a little doubtful, were unanimous also in believing that the financial problem - provided due notice were given - would not deter any serious students from entering upon Honours work.

The Committee therefore recommended that Senior Matriculation be adopted as admission to Honours courses. On motion of Professors Alexander and Coar the report was adopted with the understanding that the new regulation would come into effect in the autumn of 1926.

III. Authorization of new courses for 1925-'26 or changes in courses already sanctioned.

1. The Chairman read the following letter from Professor Allan who was absent.

Dear Sir:

The Department of Geology would request permission from the Faculty Council to transfer the course in general geology, now designated as Geology 51 in the Third and Fourth years, to Second year, under the number Geology 31.

It is really essential that the introductory course in geology should be given in the Junior years. This has been apparent for some time, but not until the present has it been possible to request this change. The contents of Geology 31 would be approximately the same as that of 51, but the course would be lightened in keeping with the Junior courses.

Yours truly,

(Signed) John A. Allan,
Professor of Geology.

After some explanation by Professor Warren and with the understanding that the course would have the new number of 31 and would be reduced in order to put it into conformity with other Junior courses, the request of the Department of Geology was agreed to.

2. Professor Alexander on behalf of the Department of Classics asked the sanction of the Council for the consolidation of Latin 2-4 and of Greek 2-4. He pointed out that the Department of Modern Languages had consolidated their Junior courses a year or two ago and that the Department of Classics now wishes to take a first step in this direction. In the meantime the first year courses would remain separated. The request was agreed to.

IV. Jane Alexander Memorial Prize in Latin.

On the request of Professor Alexander the following change in the terms of award of the Jane Alexander Memorial Prize in Latin was approved:

"That instead of its being awarded on the basis of two special papers as heretofore, it be hereafter awarded on the basis of the regular work in Latin of the Second Year, to be given to the student making the highest mark in the usual term and final examinations of that year."

V. Special Cases.

H. D. Ainlay. Professor Alexander read the following memorandum and asked the permission of the Council to put into effect the proposal contained therein:

> "This student, a mature man, now serving as principal of the Garneau Public School, took the course in second year Latin a number of years ago, and completed the authors section, but was unsuccessful in the prose. He is now about to complete his course for the B. A. degree.

He has been attending lectures in this half-subject this year, but having no authors work as a basis and having been away from Latin studies for a long time, he is encountering serious difficulties.

I propose that Mr. Ainlay shall continue to make good his attendance requirement, but that at the spring examinations I should be authorized to set him a paper on the basis of the special course which I have given for several years past up till this present year. This course is more limited in range than the regular second year Latin prose but is a fair test in the syntax of the language.

(Signed) W. H. Alexander.

The Council agreed.

VI. The Dean recalled the provision of the University Act under which the Faculty Council are entitled to two representatives on the University Senate for every ten members or fraction of ten above five. As the membership of the Council of this Faculty is 37 we are entitled to elect a fourth member to the Senate. At the suggestion of Professor MacEachran it was agreed that a nominating committee should be appointed, it being understood that other nominations might be freely made also. It was agreed that all nominations should be in the hands of the Registrar by noon of Friday, March 6th, and that a special meeting of the Council would be held at 12:25 on that day to elect the new representative. The Chairman named the present representatives of the Senate of this Faculty as a nominating committee, to wit; Messrs. Alexander, Gordon and Smith.

The meeting adjourned at 6:25 p.m.

Addendum.

W. S. H. Kerr

The two hundred and thirtieth meeting (special) of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 12:25 p.m., Friday, March 6th, 1925.

The following members were present: Dean Kerr in the chair; Professors MacEachran, Lehmann, MacGibbon, Gordon, Campbell; Associate Professors Sonet, Smith; Assistant Professor Pelluet and Mr. Race.

The purpose of the meeting was the election of the fourth representative to the University Senate. As Professor Sonet's name was the only one put forward he was declared unanimously elected to the University Senate for the term ending March 8th, 1927.

The meeting adjourned.

W. S. M. Kerr

The two hundred and thirty-first meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 4.30 p.m. Monday, April 6th, 1925.

There were present: Dean Kerr in the chair; President Tory, Professors Alexander, Broadus, MacEachran, Lehmann, Sheldon, Lewis, Boyle, MacGibbon, Burt, Strickland, Sonet, and Campbell; Associate Professors Long, Pelluet and Walker, Miss Patrick, Assistant Professors Eddy, Owen, Warren and Sandin.

The minutes of the preceding two meetings having been read and approved, were signed.

The following agenda was then proceeded with:

I. Business arising out of the minutes:

(a) Report of Committee to consider the possible addition of a course to the third and fourth years.

The Committee to consider the possible addition of a course to the third and fourth years reported at the last meeting in favor of adding a ninth course to the eight senior courses already prescribed. As a result, however, of certain new points being brought forward, this report was referred back to the Committee for reconsideration. In the light of further discussion the Committee now recommends to the Council that the desired stiffening of the two senior years in the Faculty of Arts and Sciences be brought about through requiring senior students to pass four of their senior courses with a mark of 65 per cent. This regulation shall come into effect in the Session 1925-26. The graduating class of 1926 will, therefore, be required to pass two courses with 65 per cent.

Seconded by Dean Boyle, President Tory moved the adoption of this report. Carried unanimously.

(b) On behalf of the Department of Modern Languages Professor Owen read before the Council the scheme for the redistribution of the material in German and the re-numbering of the courses in German. General approval was given to the proposal, but the request for permission to split up three hour courses into one and two hour sections for which individual credit

would be given was referred back for reconsideration.

(b) On behalf of the Department of Geology, Professor Warren asked that the permission granted a month ago to transfer Geology 51 to the second year be rescinded. This was asked in view of the proposed extension of the Honours scheme to cover three years in place of two. The Council agreed.

II. On behalf of the Departments of Classics and Modern Languages Professor Alexander proposed that beginning with the Session 1925-26 the passing grade for "A" languages should be placed at 65 %. The same mark to be required for supplemental examinations. The following were the chief reasons advanced for the proposed change:

1. It is believed by the Departments of Classics and Moderns that the passing mark of 50 % on the short "A" language courses compared with the 50 % on the much longer High School course should not entitle students to equivalent standing, to wit: Matriculation.

2. It is known that large numbers of students are deliberately postponing their language work in schools where the languages are taught. They prefer one year of this work at the University to two or three years at the High Schools. Such action only intensifies our difficulties and increases embarassing inequalities amongst entering students.

3. While we cannot yet safely or fairly give up the elementary language classes altogether, by making the "A" course both expensive in money and stiff in standard, it is hoped to force the bulk of the matriculation language work back into the schools where it belongs.

4. A special fee of $12.50 is now imposed for each "A" course and it is now proposed, in addition, that the passing mark for "A" courses be hereafter 65 %.

After some discussion of the issues involved the Council inanimously gave its approval.

Dean Boyle pointed out that other faculties would be affected by the proposed change and it was agreed that the

change, together with the reasons suggested for it, should be sent to sister faculties and if they concurred, the question would not then need to go to the General Faculty Council.

III. Honours in French and Latin. The Chairman recalled the fact that at the meeting of the Council on May 10th, 1924 authorization had been given for a scheme of Honours in French and Latin, and Latin and French. It was understood at that time that this scheme might be subject to possible revision later. On behalf of the Department of Modern Languages and with the approval of the Department of Classics, the Dean proposed that in the combination French and Latin, the third year should be amended to read: Two French courses, one Latin, one option from Division A or Division B; the fourth year , two French courses, one Latin, one option from Division A or Division B. The changes suggested would somewhat liberalize the original scheme and would also bring it into practical conformity with the Latin-French scheme. The Council agreed.

IV. On behalf of the Department of Modern Languages the Dean asked that the Council agree to the deletion at page 177 of the Calendar of the note under French 1-3. At the time the restriction therein contained was laid down it was understood that the Department of Classics would act in a similar way. As, however, no action was taken by the latter Department, the Department of Modern Languages now asks that the restriction in these cases be rescinded. The Council agreed.

V. Dr. MacGibbon asked if anything had been done as to the suggestions touching promotion made by the late General Revision Committee and forwarded from the General Faculty

Council to this Council. The Chairman promised that this matter would be brought up at the next meeting.

The meeting adjourned at 6.00 p.m.

W. L. M. Kerr

The two hundred and thirty-second meeting (Special) of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 11.00 a.m. Friday, April 17th, 1925.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Lehmann, Sheldon, Boyle, Burgess, Coar, MacGibbon, Gordon, Burt, Sonet, Misener, Campbell; Associate Professor Long, Assistant Professors Pelluet, Walker, Hardy, Eddy, Owen, Warren and Mr. Race.

The purpose of the meeting was to consider the report of the Committee to which had been referred the suggestions of the late Revision Committee. These suggestions were:

I. The general regulations permitting students to advance into senior years varies from the very drastic regulations of the Faculty of Medicine to none at all in some Faculties, students being registered simply course by course. The Faculty of Applied Science makes the rule that no student

deficient in a matriculation subject can enter second year. No student deficient in a first year subject can enter third year. Similar rules govern the fourth and fifth years. It is the opinion of the Committee that some such rule might be the basis of uniformity in all Faculties. The rules of the Medical Faculty appear very strict. On the other hand, in the Faculty of Arts and Sciences, investigation would show that many students in the senior years are really spending a considerable part of their time doing first and second year work. The rules of the Faculty of Applied Science give the student a reasonable length of time to clear his record of deficiencies.

II. Your Committee is aware of course that certain difficulties arise over students entering the university for Arts with Grade XII certificate but deficient in languages. It is thought that such students should not be allowed to enter the second year. If allowed to enter the second year to do their High School languages as well as their first year languages after they come in, it means that they must do the equivalent of about a year's work while they are pursuing their advanced studies. This entails a loss of time and energy that should be devoted to senior studies.

III. Students failing a course several times:

The Committee discussed the problem created by a student failing in a supplemental examination, repeating the course and again failing. It was observed that this is a problem affecting students in science courses of the first year of Arts especially. In the following years of the Arts course the student has a choice of selecting another subject if he finds he repeatedly fails a certain course. The Committee did not consider that any recommendation could be made relating to the professional Faculties, but with respe to Arts it was decided to bring to the attention of the Faculty Council two possibilities:

(1) That a student failing in a course, failing in a supplemental, and again failing in a course upon repeating it, should be required to take some other course as an equivalent.

(2) That provision be made in the first year for two additional subjects in science which would provide options, namely, Biology and Chemistry.

The second suggestion raises a broader question than the first. The Committee makes no recommendation.

The following recommendations in the same report were adopted, and are here reproduced for information:

1. It is recommended that graduating students failing in one subject should have the privilege of a supplemental in the fall and failing this the opportunity of again writing in the spring examination without repeating attendance, except in certain scientific subjects where, in the opinion of the Department concerned, a second attendance would be necessary.

2. It is recommended that if a student in the final year fail a completed subject at Christmas he be allowed a supplemental in the spring.

3. The Committee was granted its discharge, it being understood with reference to revision of supplemental results,

1. That a uniform policy as far as possible be adopted to apply to all Faculties.

2. That the application of this policy should rest with a Faculty Committee in each instance.

Having discussed the foregoing suggestions the Committee of which President Tory was the Chairman recommended as follows:

1. that students entering the second year with Grade XII, but with no languages, shall be required to spend four years at the University in order to obtain a degree, that is, their first two years at the University must be spent in doing first and second year only.

2. that students who enter with Grade XII, but deficient in one language shall not be allowed to enter the third year with an "A" language course unpassed.

3. that students who enter with Grade XI but with deficiencies or conditions shall not be allowed to enter the second year with a matriculation condition or deficiency.

The foregoing three proposals were unanimously adopted.

In regard to suggestion contained in subsection 2, paragraph 3, our Committee made no recommendation. It was pointed out, however, that, as the Council had already declined to place Chemistry in the first year, there would obviously be difficulties in making the suggestion possible of operation. As it was clear also that there were no alternative courses

for English, History and Mathematics, the question of reasonable substitutions would be difficult. After some discussion it was proposed to enact and publish a regulation such as was suggested. As it would probably only invite applications for the use of the privilege therein proposed, the Council subsequently came to the general agreement that if it were demonstrated that a student had a real inaptitude for a given required subject his case might be brought into the Council for consideration.

With the consent of the Council Professor Coar was permitted to submit his scheme for the reorganization of the Senior Courses in German. The new plan as ratified is as follows:

German 54, German Literary Classicism. (3 hrs.) Its development and chief characteristics, with some reference to Greek and Roman antiquity and the cultural background of the eighteenth century. Study of the masterpieces of Lessing, Goethe, and Schiller.

German 55, Modern German Literature. (3 hrs.) Literary types in the first half of the nineteenth century with some reference to the changing social and political conditions. The course will consist of two parts to be taken concurrently and as a unit.
(A) Romantic Drama (two hours weekly) Kleist, Grillparzer, Hebbel and Ludwig.
(B) Lyric poetry or prose fiction (one hour weekly).

German 56, Modern German Literature. (3 hrs.) Literary types in the last half of the nineteenth century and first quarter of the twentieth century, with some reference to the revolution of 1848-49 and that of 1918-19. The course will consist of two parts to be taken concurrently and as a unit.
(A) Realistic Drama (two hours weekly) Ihsen, Hauptmann, Sudermann, Schnitzler.
(B) Prose fiction or lyric poetry (one hour weekly).
(Not offered 1925-26.)

German 57, Advanced Grammar and Composition. (3 hrs.)
(A) Introduction to Germanic Philology (two hours).
(B) Der deutsche Aufsatz. (one hour).
(Not offered 1925-26.)

Honours Courses.

German 101, Germanic Philology. (2 hours). Middle High German, Historical German; Paul's Mittelhochdeutsche Grammatik. Prerequisite: German 57.

German 102, German Literature. (one hour). Study in a special field. Discussion, reports, thesis. Prerequisites: German 54 and one of 55, 56.

German 103, Old High German. (one hour). Prerequisite: German 57.

German 104, Study in some early period of German Literature. (two hours). Prerequisite: as for 102.

Graduate Courses.

Graduate students desiring courses in German should consult the head of the Department.

On motion of Professors Coar and Alexander it was agreed to recommend to the Senate the scheme of Honours in Latin and German and German and Latin corresponding with the scheme already authorized for Latin and French and French and Latin. An outline of this proposal, as ratified, is as follows:

Honours in Latin and German.

Second Year:	German 2-4, Latin 2-4, Psychology 2, English 2 (or French 5-4 or Greek 2), Classics in English 51.
Third Year:	Two Latin courses; one German; one option in Division A or Division B.
Fourth Year:	Two Latin courses; one German; one option in Division A or Division B.

Honours in German and Latin.

Second Year:	German 2-4, Latin 2-4, History 2, Psychology 1 or 2, English 2 (or for those who have begun French, French 5-4).

Third Year: Two German courses; one Latin; option in Division A or Division B.

Fourth Year: Two German courses; one Latin; option in Division A or Division B.

It was explained that what was involved was a redistribution of material and that the proposals would not require any increase in the number of courses offered in a given year.

Professor MacGibbon, in view of the coming lengthening of the time required for the Honours degree, asked if it would be possible to have a report from Professor MacEachran, Chairman of the Committee, which was appointed to confer with the Department of Education in relation to the question of specialist's certificates of teachers.

W. B. M. Kerr

The two-hundred and thirty-third meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber at 10.00 a.m. Monday, May 11th, 1925.

There were present: Dean Kerr in the chair, Professors Alexander, Broadus, MacEachran, Sheldon, Lewis, MacGibbon, Gordon, Burt, Sonet, Misener, Campbell and Dunn; Associate Professors Smith, Rowan, Long and Macdonald; Assistant Professors Walker, Eddy, Warren, Miss Patrick and Mr. Race.

The minutes of the preceding meeting having been read and approved were signed.

The following agenda was then proceeded with:

I. Report of the Arts Revision Committee

(1) The Revision Committee, consisting of Dean Kerr (Chairman), Messrs. Alexander, MacGibbon, Burt, Walker and Matthews, recommended that the following graduating students should be granted aegrotat standing in the following respective subjects:

Miss Esther Prevey - Classics in English 51

Miss Grace Studholme - Comparative Literature 51

(2) Edward Tavender - Mr. Tavender originally registered for Law and met the full matriculation requirements at the time of his original enrolment. He subsequently changed to Arts and Law. Through some slip in the Office it was not noticed that his altered course demanded not only Algebra and Trigonometry but also Geometry of Grade XII. As good faith was not in question the Council agreed with the concurrence of the Department of Mathematics that Mr. Tavender's record for his degree should be regarded as complete.

(3) The following students were then reported to the Council as clear for their respective degrees and were recommended by the Council to the University Senate for the degrees indicated:

BACHELOR OF ARTS

Buckley, Beatrice Georgina
Bullard, Edwina Grace
Castor, Jessie Irene
Clermont, Eugenie Marie
Eubank, Edna Merle
Evans, Eileen Louise
Haw, Olive Vera (with First Rank Honours in English)
McKitrick, Jean Kathleen (with Second Rank Honours in Philosophy)
Matthews, Eleanor Catherine
Millar, Jean Malcolm
Morrow, Mertle Laura
Silverthorn, Mamie Elizabeth

Ainlay, Harry Dean
Bloor, William Gordon Keen
Bright, Aubrey Harry
Cairns, James Mitchell
Cromarty, William Bramwell
Davies, Percy Griffith
Flack, Charles Ruthven
Giffen, John Wilson
Gish, Walter Kuhns
Hargrave, James Howard
MacDonald, Shirley Graeme
McLaughlin, John Harold
McNeill, Duncan Edward Ives
Mitchell, Robert Richmond
Ross, William Stanley

Smith, Dorothy Lillian (with First Rank Honours in English)
Studholme, Bertha Grace
Studholme, Reva Marie
Willison, Mary Charlotte
Rush, Raymond Dowswell
Tavender, Edward Rusling
Weinlos, Moses
Whitford, Oswald William
Wilson, Ernest Brown

Walters, George Theodore
Watts, George Wesley Townsend

BACHELOR OF SCIENCE IN HOUSEHOLD ECONOMICS

Clarke, Margaret Elizabeth
McBeath, Phyllis Louise
Prevey, Esther Elizabeth
Skene, Jean Isabel McGregor

BACHELOR OF SCIENCE IN PHARMACY

Becker, Ruth
Goodall, Annie McClean
Marshall, Alice Louisa
Hardin, Harry Feibel
Laws, Claude

(4) The following students, who failed to complete the requirements for graduation, were granted supplementals:

Rockwell Ross Hinchey - Psychology 52, Philosophy 51.

Daniel Riley - Latin 3

William Calvin McRae - Physics 6, English 2.

II. Special Cases:

Catherine Keir - On the basis of illness Miss Catherine Keir was granted aegrotat standing in the following subjects: Latin 1-3 and English 62. Miss Keir was also granted a supplemental in English 53.

Jean Folkins - The action of the Dean in permitting Miss Folkins to write the final examination in Latin 1 was ratified.

W.D. Goldberg was taken ill during the final examination in Mathematics 7. On the recommendation of the Department of Mathematics his mark was raised from 42% to 50%.

Donald Brown, who was excluded from the final examination in Mathematics 55 owing to deficient attendance, was granted a supplemental.

Lucina Coone - As Miss Coone, who is enrolled in Arts and Medicine, has made a poor record in scientific subjects, it was agreed that she be interviewed as to the wisdom of continuing on this course.

III. Passing mark to qualify for the summer reading courses.

On behalf of the Departments of Classics and Moderns the Dean recalled the fact that a student obtaining 65% in the "A" languages had the privilege of writing off the authors part of the first year language courses in the following autumn. The two departments now recommend, since the passing mark in the "A" languages has been raised to 65%, that the privilege mark be raised to 75%. This was agreed to.

IV. The following recommendations with respect to prizes, medals, and scholarships were sent forward to the University Senate:

Prizes:

The Jane Alexander Memorial Prize in Latin - Chaim Weinlos

The Jane Alexander Memorial Prize in Geology - Alfred Leahey

The Gordon Stanley Fife Memorial Prize in History - Maimie Silverthorn

The Harold Waldo Huestis Memorial Prize in English -

Miss Eugenie Louise Butler

The Samuel Richard Hosford Memorial Prize in English -
Miss Elsie Catherine Barclay

The Vallée Prize in French - Alan Stuart Galbraith

The French Prize of the Société du Parler Français - Wilfred Galla

The Historical Club Prize - John Gilchrist Morrison and Eugenie Louise Butler (equal).

The Halley Hamilton Gaetz Prize in Philosophy - Loris Shano Russel

Mathematics 1 Prize - James Alexander McPherson

Mathematics 3 Prize - Olive Jagoe

MEDALS

The Lieutenant-Governor's Gold Medal for the Study of Shakespeare
Dorothy Lillian Smith

The Charles Allan Stuart Medal in Classics - not awarded.

The Alexander Cameron Rutherford Gold Medal in English -
Miss Olive Vera Haw

The Women's University Club Gold Medal - Leslie Victor Bell

The James Ramsey Gold Medal in Mathematics - not awarded.

The Alberta Pharmaceutical Association Gold Medal in the Degree Course - Annie McClean Goodall

Le Club La Verendrye Gold Medal in French - not awarded.

Scholarships

The Aikins Scholarship in English Language and Literature
Miss Marjorie Sherlock

The Women's University Club Scholarship - not awarded.

Fellowship

The Lloyd Hartnoll Bishop Memorial Fellowship in English Literature - not awarded.

VI. Professor Burt brought to the attention of the Council the

apparent lack of system in the way in which the prizes are listed in the University Calendar. It was thought that the order in which they now stand represents a chronological sequence. The following committee was appointed to examine and report on this question and on any other apparent anomalies in the Calendar: ~~Mr. Race, Professors Burt and Sheldon.~~ The matter was referred to the General Fac. Council. K. (K.)

VII. On behalf of the Committee on Specialists' Certificates for Teachers, Professor MacEachran made a progress report. He stated that a scheme had been devised for teachers' training within the University and that this scheme had been submitted informally to certain officials of the Department of Education which had, however, not yet agreed to adopt it. The Department up to the present declared itself holding the view that the teachers' training should remain within its own immediate jurisdiction. The Committee, however, had not yet given up hope of securing better results and asked that the Faculty take no definite action until after the Summer when it was hoped a final report could be submitted.

VIII. It was agreed with respect to Mechanics 22 and 26 that the Faculty Council recommend to the University Senate that the two hour laboratory hitherto attached entirely throughout the session to Mechanics 22 run from Christmas to the close of the academic year and continued in Mechanics 26 from October until Christmas.

The Council adjourned at about 11:30 a.m.

W. T. A. Kerr

The two-hundred and thirty-fourth (special) meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber on Tuesday, May 12th, 1925, subsequent to the meeting of the General Faculty Council.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, MacEachran, Sheldon, Gordon, Strickland, Misener and Campbell; Associate Professor Long, Miss Patrick and Mr. Race.

Owing to there not being a quorum, it was agreed that the proceedings be made subject to the validation of a subsequent regular meeting.

1. Gladys V. Brown On the recommendation of the Department of History it was agreed to grant Miss Brown aegrotat standing in History I.

2. Bertha McCallum was granted a supplemental in French 5-4.

3. In response to the request of the affiliated theological colleges for university recognition of further work done in the colleges, the Faculty of Arts and Sciences agreed to recommend to the University Senate that a course in Old and New Testament Literature be authorized as a senior option, Division A, in the Third and Fourth Years. It should be open to all senior students in the Faculty of Arts and Sciences except theological students for whom provision already exists in the shape of theological options.

This course might be regarded as rounding out the cycle of courses in general literature which already comprises courses in the Classical, Mediaeval and Modern Literature in English translation.

For the co-ordination of this work the Faculty Council agreed to recommend to the Senate that a standing supervisory committee be appointed, the members of which should be Professors Alexander (Chairman), Kerr and Broadus and ad hoc the instructors of the course in Old and New Testament Literature.

The following report shows the record of the Second, Third and Fourth Year students at the final examinations, May 1925:

STANDING OF STUDENTS IN THEIR SECOND YEAR at the University.

W. S. K. Kerr

A meeting of the staff of the Summer Session 1925 was held in the Senate Chamber on Monday, August 17th at 10 :00 a.m.

There were present: Dean Kerr in the chair, Professors Alexander, Gordon, Burt and Sonet; Associate Professors Walker and Macdonald; Assistant Professor Pelluet, Mr. Race, Mr. Laycock, Miss Gold and Mr. Young.

The purpose of the meeting was to review and pass upon the results of the final examinations in the following subjects: English 2; French 1-3, Pt.1, French 1-3, Pt.11; French 5-4, Pts. 1 & 11; Latin 1, Pts. 1 & 11. Latin 3, Pts. 1 & 11; Math. 1, Pt. 1, Math. 1, Pt. 11; Cl. in Eng. 51; History 58, Pts. 1 & 11; Math. 53, Pts. 1 & 11; Psych. 51, Pts. 1 & 11; Psych. 55, Pts. 1 & 11; Psych. 104, Pts. 1 & 11 and Psych. 105, Pts. 1 & 11. As there were practically no doubtful cases the returns of the various departments were ratified for publication, subject to the consent of the University Senate.

A general discussion followed covering the work of the Summer Session. Questions were raised as to how best the ranking of students should be determined in connection with the allocation of marks of the term work and the final examinations.

The Chair asked the opinion of those present as to the wisdom or unwisdom of permitting students who, by present regulation, are permitted to take three different half courses or the two halves of one complete course, to take not only one complete course, but also one additional half course. Opinions

varied but the majority seemed to be of the opinion that the present regulation was satisfactory and should be allowed to stand.

The Dean also raised the question as to whether it would be possible to liberalize the attendance rules somewhat so as to enable specifically teachers in active service, who are working towards their degrees, to make faster headway than they can at present. Various members of the staff, including Professors Alexander, Burt and Macdonald, took part in the discussion. Sympathy was expressed by everybody with the position of the teachers and their desire of self-improvement. The general feeling seemed to be that a proposal requiring half attendance on a course might well receive the sympathetic consideration of the Faculty Council. It was pointed out that in case of certain city teachers, these had already been exempted one attendance per week during the winter session which meant a two-thirds attendance, the difference between this and a half attendance would be only fractional. If such a plan were adopted it would be possible for teachers to get in touch with departments, obtain a syllabus of reading which they might do during the winter, and then put in the half attendance at a summer session The taking of two half courses at a summer session would therefore enable them to complete two full courses per year. It is understood that this question would be laid before the Faculty Council at an early meeting.

REPORT ON RESULTS OF SUMMER SESSION COURSES 1925

W. F. R. Kerr

The two hundred and thirty-fifth meeting of the Council was held in the Senate Chamber at 4:30 p.m. Monday, October 5th, 1925.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Braodus, MacEachran, Lehmann, Sheldon, Lewis, Allan, Coar, MacGibbon, Gordon, Burt, Strickland, Misener, Campbell, Dunn; Associate Professors Smith, Rowan, Long, Hardy, Walker, Warren, Miss Patrick; Assistant Professors Pelluet, Sandin, Eddy, and Mr. Race.

The minutes of the meetingsof May 11th, amended in two respects, of May 12th and of August 17th, were read, confirmed and signed.

The following agenda was then proceeded with:

I. Business arising out of the minutes.

(1) Re. Attendance of teachers in active service.

This matter, discussed some months before, was brought to the attention of the Council again through a petition from certain teachers who had attended last Summer Session. The question of the possible reduction of attendance of teachers had been under advisement at the closing meeting of the Summer Session Staff, and the possibility of permitting teachers to secure credit for courses with one-half attendance had then been sympathetically spoken of. President Tory explained the situation as he saw it, and thought that perhaps the time had come when some concrete action had become advisable. On the whole,he favoured some general plan by which one-half the work might be done extra-murally and one-half attendance put in at a summer session. Finally, on motion of Messrs. Alexander and Sheldon, the Council expressed its general approval of this proposal and authorized the Dean to appoint a

committee which should study the question and bring in a report. The following committee was subsequently appointed: President Tory (Chairman), Messrs. Kerr, Alexander, MacEachran and Boyle.

2. Report of Committees:

Honours Committee

The following interim report of the Honours Committee, submitted by Professor Alexander, was adopted:

Adam, Beatrice M. Honours in History. Record clear to end of Second Year. Programme for Third Year: History 102, 57, 58, one senior option, and permission to attend Classics in English 51 as an extra.

Stewart, Harriet Ellen Honours in Latin and French. Short one course in Second Year. - Classics in English 51. Registration for Third Year accepted as follows: Latin 51, 106, French 52, History 58 Classics in English 51.

Rudolph, Marion Nancy Honours in History. All prerequisites clear and following programme accepted: History 102, 57, 58, one senior option and permission to attend one other course, provisionally.

Casper, Jacob Honours Classics, asks permission to equate French 5-4 with English 2 as Second Year prerequisite. Permission granted. Request for credit in Greek 1 on basis of previous work referred to Admissions Committee. (ag'd Oct. 2, 1925.)

Nichols, Erma Lucile applicant for Honours in History. Miss Nichol's record for 1924-25 is:
History 2-57%
History 3-69
Political Economy 1 44% (supp. 83%)
English 2-53
French 5-4 -52%
In the judgment of the Committee, Miss Nichol's scholarship was not considered sufficient to warrant permission to continue.

Reiber, Harold G. Honours in Chemistry. (short Latin 1-3, First Year) but possesses very high grade standing in all Second Year subjects. Granted permission to read for Honours in Chemistry. Programme subject to further report from Dr. Lehmann.

Dickson, H. H. L. Honours English. Prerequisites completed by passing supplemental in Physics 1 this September. Application granted. Programme: English 52, 53, 62, French 52.

Craig, Carman D. Honours in English. All prerequisites clear and application approved. Programme: English 53, 52, 62, French 52.

Craig, Dorothy D. Honours in Botany. Second Year subjects as follows:

Chemistry 1	- 52%
Botany 1	75
Geology 33	78
French 5-4	51
Zoology 1	50

Scholarship standing deemed insufficient to warrant granting of application.

Owens, Agnes Bachelor of Commerce candidate applying for Honours in Political Economy. (see Cal. 1925-26 p. 84 footnote.) Second Year course complete with exception of Psychology 2. Application for Honours accepted with additional registration in Psychology 2 and one senior option.

Jamieson, Marion applicant for Honours in Chemistry.

Second Year:	Chemistry 1	- 72%
	Mathematics 55	50
	Physics 6	36% (supp. 63)
	French 5-4	53
	Mathematics 7	57%

Scholarship standing deemed insufficient to warrant granting of application.

Thrasher, Mildred M. applicant for Honours in Political Economy.

Second Year record:	English 2	55%
	Pol. Ec. 1	72
	Chem. 1	50
	Hist. 2	67
	Math. 7	34

Miss Thrasher is deficient Psychology 2 as a prerequisite. She has done nothing in regard to Mathematics 7, and shows a very mediocre scholarship standing. The Committee recommends that the application be refused.

Toby, Charlotte Gwendolyn Fourth Year Honours Moderns. Registration as follows: French 52, French 54, French Conference Courses 101, 102, German 54, Classics in English 51. This programme is correct in combination with her Third Year and stands approved.

Jagoe, Eva Fourth Year Honours Mathematics. Registration as follows: Mathematics 104, 105, Mathematics 56, 62, Physics 51. All clear to end of Third Year and above registration approved.

Sproule, Donald Preparation in Second Year for Honours in Physics. Following programme accepted: Physics 6, 12, Mathematics 7, 22 and Political Economy 1 and Latin 1-3 to clear deficiency in First Year. Completion of this programme will enable Mr. Sproule to enter Honours Physics in Third Year.

Little, Gwendolyn R. Fourth Year Honours French and Latin. Programme: French 52, 54, Latin 51, German 54. This completes programme for Honours French and Latin.

Barclay, Elsie Catherine Fourth Year Honours English. Programme: English 109, 57, 52, French 52, German 54(extra). The first four of above courses completes programme for Honours English.

Butler, Eugenie applicant for Honours English Third Year. All prerequisites complete with high standing except Latin 1-3. Miss Butler took Latin A last session with a standing of 98% and will take Latin 1-3 in addition to Honours registrations in Third Year.

Clark, R. V. applicant for Honours Chemistry.

Sturrock, Murray G. Fourth Year Honours Chemistry. Registration: Chemistry 102, 54, Biochemistry 61. Mr. Sturrock's fourth subject is already complete (see Physics 8 rec. 1922-23)

Harris, J.E. changing from Honours Classics to Honours English. Registration: English 52, 53, 62, History 3 (instead of 2 on advice of Professor Gordon as reported to the Chairman by Mr. Harris). Registration approved, and permission to attend Philosophy 53 as an auditor.

Williamson, Jean Fourth Year Honours in Moderns. Programme: English 2 (see Hon. Com. minute. pg. 109) French 52, German 54 and German 55 (extra), French 101 - 102 approved.

Coone, Wilma M. applicant for Honours in Latin and French and Latin and German. Permission granted to attempt this double course in view of Miss Coone's excellent record to end of Second Year, and in event of course proving too heavy Miss Coone to revert to Latin and French Honours only, the decision to rest with Dean Kerr. Programme: Latin 51, 106, French 52, German 54, Greek 2-4 (extra).

Galbraith, A.S. Honours in Mathematics. Programme as follows: Mathematics 57, 104, 105, Physics 54, German 2-4 (extra). Mr. Galbraith is taking three years for the two years of Honours Mathematic and proposes during this time to take German 2-4 and Chemistry 1 as extra subjects. Application approved according to above programme, which includes one of the extra subjects.

At meeting of October 5th the following cases were considered:

Taylor, Gwen applicant for Honours English. Miss Taylor has one prerequisite uncompleted in Second Year, Algebra XII outstanding in First Year and a day of outside engagements in the way of music lessons. In view of these facts and Miss Taylor's rather weak record in all subjects of the Second Year other than English, the Committee refused the application.

Culver, Edward S. applicant for Honours in Political Economy through the B.Com. course. Application approved, with same programme as for Miss Agnes Owens, viz: the senior option this year and Psychology 2 next year.

Trout, H.B. Honours in History. Mr. Trout is transferring from Queen's University, with all prerequisites of first two years complete and the Third Year Honours also. Admitted to Honours in Fourth Year.

Capsey, Ernestine Applicant for Honours Mathematics. Miss Capsey's first two years are complete with the proper prerequisites and her programme is approved as follows: Mathematics 57, 62, 104, 105 and Physics 6.

Mueller, W. H. Fourth Year Honours Chemistry. Programme: Chemistry 54, Biochemistry 61, Philosophy 51. Mr. Mueller being already one senior course to the good in his Third Year, requires these three only. He asked the Committee for permission to take English 2 in addition, but as Mr. Mueller is a demonstrator three afternoons a week, the granting of this permission was made contingent on Dr. Lehmann's consent.

Werthenbach, Dorothy E. Honours in History. Registration as follows History 57, 102, 3, Education 53 and Latin 3. Of these subjects, Latin 3 is to complete her First Year record from the University of Saskatchewan; History 3 is a prerequisite for Honours in History, and will have to be supplemented next year by History 2; Education 53 is the senior option; History 57 and 102 are supplemented by History 3 from the University of Saskatchewan, which is the equivalent of our History 58. The successful completion of the above programme will therefore bring the applicant to Fourth Year Honours with a programme of four senior subjects plus History 2. It should be noted that Miss Werthenbach began her course in the fall of 1924, but was obliged to drop out at Christmas time through illness. By letter from Dean Kerr, Jan. 6 /25, she is exempted from attendance in Education 53 and History 3 till Christmas time.

Sutherland, J. W. Fourth Year Honours Chemistry. Programme: Chemistry 102, 54, Mathematics 55. Mr. Sutherland being one senior subject to the good in his Third Year, this completes his requirements.

Hinke, Lydia M. Honours English. Programme: English 62, 52, 53 and French 52. Miss Hinke's first two years are clear including the removal of deficiency in Algebra XII, and her Second Year standing was very high in all subjects. Application approved.

Newhouse, Eva Honours in French and Latin. All prerequisites are completed and the application was approved with the following programme: French 52,54, Latin 51 and Psychology 51.

Klinck, W. R. Honours Classics. All prerequisites clear and Latin 52 as an extra. Application approved with the following programme: Greek 52, 102, Latin 51 and French 52.

Hunter, Edward F. Second Year B. Com. applicant for Honours in Political Economy. It is noted by the Committee that his first year is clear and his second year registration complete including Psychology 2.

Watts, Morrison W. L., Fourth Year Honours Philosophy. All clear to end of Third Year. Following programme approved: Psychology 55 and 104, Philosophy 53, Mathematics 55.

McAlpine, Dorothy Fourth Year Honours English. Everything in order to end of Third Year and following programme approved: English 52, 57, 109 and Psychology 52.

Manson, Mary Fourth Year Honours Classics. Everything clear to end of Third Year, following programme approved: Greek 52, 102, Latin 106 and French 52.

Woodford, Raymond S. Honours Physics. First Year clear through Admissions Committee transferring First Year B.Sc. in Agriculture to First Year B.Sc. in Arts. Second Year Arts will be clear for prerequisites towards Honours in Physics when Physics 12 is completed. Application accordingly approved with following programme Physics 12, 53, 54, Mathematics 57 and Architecture 62.

Jagoe, Olive Second Year registration towards Honours Mathematics. The Committee notes that her programme is as follows: Latin 1-3 to complete her First Year. Mathematics 7, 22 and Physics 6 in her Second Year, as Mathematics subjects. Philosophy 2 as B option was completed last year and for remaining option the registration in French 5-4. Therefore on completion of subjects indicated, Miss Jagoe will be clear to end of Second Year.

Bosmans, Stanley E. applicant for Honours in Political Economy through B.Com. course. The Committee notes that his registration is as follows: French 1-3 and Latin 1-3 to clear First Year; Geology 33 and Political Economy 10 towards his Second Year, in which he already holds credits as follows: Political Economy 1 - 55% Accountancy 1 - 76% and Chemistry 1 - 66%. As Mr. Bosmans cannot this year take French 5-4, he is permitted to take one Third Year subject, Political Economy 64, and also Psychology 2 as required (foot note pg. 84, Calendar 1925-26.) In event of Mr. Bosmans satisfactorily completing above programme he will reach beginning of Third Year short in French 5-4 but one senior course to the good, Political Economy 64, and should therefore be in a position to continue his Honours Course.

3. The question of special supplementals for graduating students in alternating senior courses. Professor MacGibbon asked that Miss Louise Paterson, who last spring had failed an alternating senior course, should be granted a special supplemental so that she might have a chance of graduating. Professor Burt pointed out that this plan was already in operation in connection with similar courses

in the Department of History and that the scheme had already received the Faculty sanction.

4. Recommendations to the University Senate for degrees:

The following students, having completed the requirements, are recommended to the Senate for their respective degrees:

Bachelor of Arts — Arthur Ernest Hutton

Bachelor of Science — Freda Gertrude Morehouse Smith

In the case of the latter, the Dean pointed out the fact that Miss Smith had been enrolled in the combined course in Arts and Medicine, and had taken what amounted to a very unsatisfactory Bachelor's degree in that she had three years of Arts and one of elementary medicine, and with this equipment she now proposes to give up her Medicine and turn to teaching. Ought some step not to be taken which would prevent such a situation arising again?

5. Special cases

1. Lucina A. Coone. At the request of Miss Coone, who is changing from the combined course in Arts and Medicine to B.Sc. in Arts, it was agreed to accept her mark in Physics 11 as a pass in Physics 1.

2. Eric Dain The petition of Mr. Eric Dain for a special supplemental in the grammar sections of French 1-3 and of French 5-4. was granted.

3. Aubert Wesley Giffen, in the Session of 1924-25 was unable to take Political Economy 66, a requisite course for the Bachelor of Commerce degree, because of a time-table difficulty. As Political Economy 66 is an alternating course and not offered this session, Mr. Giffen's request for permission to substitute Political Economy 67 for Political Economy 66 was granted.

4. Francis E. MacMillan. The petition of Miss MacMillan for exemption until Christmas of one hour a week in Mathematics 1 was granted.

5. Bertha McCallum - The petition of Miss McCallum for exemption of one hour a week in French 5-4C was granted.

6. Dorothy S. Young - The petition of Miss Young for exemption of two hours a week until the first tests in Chemistry 1 was granted.

7. Hesperia Aylesworth - The petition of Miss Aylesworth for exemption of one hour a week in Latin 1-3A until Christmas was granted.

8. Mona Tredway - The petition of Miss Tredway for exemption of one hour a week in Latin 1-3A until Christmas was granted.

9. Dorothy Dixon Craig - Professor Lewis brought up the case of Miss Craig suggesting that he be permitted to give her a special course in Botany which should be a six hour laboratory extension of Botany 51. The proposal, subjected to a certain amount of criticism, was allowed to lapse.

10. Sadhu Singh Dhami The request of Mr. Dhami for permission to take English 2 instead of French 5-4 was agreed to.

6. On the recommendation of the Department of Philosophy students taking the course leading to the degree of Bachelor of Commerce may take Philosophy 51 for the Session 1925-26 instead of Psychology 54, a requisite course for this degree, which is not being offered this year.

7. Canada North Research Prize A letter was read from Mr. J.F.K. English offering a prize of $25.00 for a piece of research in connection with resources of the north country. While warm

appreciation was expressed of the generosity of Mr. English, who is a recent graduate, there was some question as to whether the money could be usefully utilized. Finally the Dean proposed that a committee be appointed which might examine Mr. English's offer and report upon the feasibility of laying down conditions which would lead to useful competition. The following committee was subsequently appointed: Professor Allan (Chairman), Professors MacGibbon and Pitcher.

8. The reports of the autumn supplemental examinations as already passed by the various departments were submitted and adopted. The Council adjourned at 6:00 p.m.

W. S. M. Kerr

The two hundred and thirty-sixth meeting of the Council was held in the Senate Chamber at 4:30 p.m. on Monday, November 2nd, 1925.

There were present: Dean Kerr in the chair, President Tory, Professors Alexander, Broadus, MacEachran, Sheldon, Coar, MacGibbon, Gordon, Burt, Misener and Campbell; Associate Professors Rowan, Long, Walker, Macdonald and Warren; Assistant Professors Pelluet, Owen, Eddy and Lang.

The reading of the minutes of the previous meeting was held over until the next meeting of the Council.

1. Business arising out of the Minutes:

1. Report of Committee on the question of special

courses for provincial teachers in active service. On behalf of the Committee appointed for this purpose a verbal report was made by the Chairman, President Tory, accompanied by a tentative schedule of courses which the Committee thought might be susceptible of being studied partly at the Summer Session and partly privately during the winter. This schedule is attached. President Tory, stating that the Committee had gone carefully over the ground, now laid before the Council a scheme of courses which seemed suitable for the purpose. It was to be understood:

(a) that this scheme was tentative and suggestive only and the offering of any given course named would of course depend upon the ability of a given department to carry out the suggestions.

(b) that no student would be accepted who had not been three years in active teaching (10) service and who did not possess a Grade XII certificate.

(c) that it is proposed to require Grade XII Physics and in addition to demand that the laboratory of Physics 1 be done at the University; noted, however, that Professor Boyle, who had at first favoured this provision, had to some extent changed his mind about the wisdom of it.

(d) that courses would be one and one-half hours daily for the six weeks of the Summer Session, the balance of the work to be done privately and students to take the regular spring examinations in April.

The Dean added that, supposing the Council and the Senate both approved of the present proposals, the departments would be

communicated with and asked what courses they would be prepared to offer next summer. On the basis of the reports secured early announcement might be made of the scheme, the teachers of the province circularized and, if possible, advanced registration obtained so that the departments might be made aware of what the demands were likely to be and arrangements as to teaching personnel might consequently be made early in the year.

Proposed Scheme of Special Teachers' Courses

Second Year

Division A		English 2 French 2 Latin 2
"	B	History 2 Political Economy 1 Philosophy 1
"	C	Chemistry 1 Mathematics

Third and Fourth Years

Division A		Classics in English English French Latin
"	B	Ancient History Education 53 or 54 History 53, 56, 58 Philosophy 51 or 54 Political Economy Psychology 51 or 52
"	C	Mathematics Geology

On President Tory's suggestion the Council unanimously agreed to the tentative proposals above prescribed and sent these forward for the consideration of the University Senate.

2. Canada North Research Prize On behalf of the Committee the Chairman, Professor Allan, presented a report recommending

the acceptance of the Prize under certain conditions. He suggested, however, as competition for the prize would be open to the whole University, that the report be submitted rather to the General Faculty Council. The Council concurring in this request remitted the report to the General Faculty Council.

11. Reports of Committees: Honours Committee

The reading of the second instalment of the Honours Committee report was held over until the following meeting of the Council.

111. Recommendation to Senate for degree:

Bachelor of Arts Daniel William Riley

IV. Special Cases:

(1) Archibald L. Cameron Owing to a conflict in his time table Mr. Cameron asks that he be exempted from one hour a week in Latin 1 which he is repeating. Petition granted.

(2) Eric Dain Mr. Dain having made a poor record in 1923-24, was informed that he could not re-enter the University without the formal consent of the Faculty Council. The Chair stated that Mr. Dain had not been in attendance in 1924-25 and had now returned and he would ask the Council to agree to Mr. Dain's re-admission. Request granted.

(3) Margaret E. MacFarlane Owing to a conflict in her time-table with Bacteriology 2, Miss MacFarlane petitioned that she be exempted from one lecture a week in Latin until Christmas. Petition granted, it being understood that in the cases of both Mr. Cameron and Miss MacFarlane the step taken was at their own responsibility.

(4) Irene E. Smith - Miss Smith entered the Second Year with

complete Grade XII including two sciences in 1923-24. She enrolled for preliminary to Honours English and did not select a course from Division C. She was not in attendance in 1924-25. Returning this year she desired to discontinue Honours English and go into the general course. Her adviser pointed out that she would have to make up her deficiencies in the Second Year and as a Division C subject she chose Mathematics 7, her adviser evidently forgetting that Grade XII students must choose either Physics or Chemistry in the Second Year. Miss Hayward only reached Miss Smith's card at the end of October in her re-checking. The Council sanctioned Mathematics 7 as Miss Smith's Second Year Division C option.

(5) A. Jean McLennan - Miss McLennan failed in the theory of Chemistry 58 last year but passed well in the lab. With a view to securing credit for the whole course Miss McLennan petitioned for permission to take only the theory this year and have her lab. counted. With the concurrence of the Department of Chemistry the Council granted the petition.

V. The results of certain special supplemental examinations were submitted and passed for record.

In the case of Miss Madge Dean, on the joint recommendation of the Departments of Zoology and Household Economics it was agreed that Miss Dean, who had made in her supplemental in Zoology 1 a mark of 55, be regarded, on account of the great improvement in her work, as having passed the course and her mark was raised to 60.

The Council adjourned at 5.00 p.m.

W. S. A. Kerr

The two hundred and thirty-seventh meeting of the Council was held in the Senate Chamber at 4:30 p.m. on Monday, December 7th, 1925.

There were present: Dean Kerr in the Chair, Professors MacEachran, Lehmann, Sheldon, MacGibbon, Gordon, Burt, Strickland, and Campbell; Associate Professors Smith, Long, Walker, Macdonald and Warren; Miss Patrick, Assistant Professors McGoun, Pelluet, Owen, Eddy, and Mr. Stephens.

The minutes of the meetings of October 5th and November 2nd having been read and confirmed, were signed.

The following agenda was then proceeded with:

1. Business arising out of the minutes:

(a) Courses for teachers in active service. Since the last meeting of the Council, the University Senate had approved of the principle involved in the scheme for special summer courses for teachers and the Dean now reported that he had been in touch with the various departments and submitted the following tentative list of courses which the departments deemed at this date feasible to offer next summer.

Admission Grade XII pro tanto; / Physics must be included and in addition the University will require the laboratory of Physics 1 (4 hrs. per week) to be done at the Summer Session.

Tentative list of Courses to be offered at the Summer Session 1926

Junior
Chemistry 1
English 2
French 5-4
History 2
Latin 2-4
Mathematics 7
Political Economy 1
Philosophy 2

Senior
Ancient History 51
Chemistry 52
English 58
French 54
History 56
Mathematics 62
Old and New Testament Lit.
Political Economy 66
Psychology 51

The scheme as submitted was approved and authorized for publication.

Professor Campbell pointed out that in some instances it might be necessary, in order to clear up the old system of half courses, to provide next summer, in case there were applicants, for half courses in some subjects. The Council agreed that wherever the University had in a sense entered into a contract with a student, some adjustments would undoubtedly have to be made. The Chair suggested that in the announcement sent to the teaching profession, a statement might be inserted that, in case of a difficulty similar to the one Dr. Campbell had pointed out, a student concerned might apply to the Registrar's Office for such adjustment as might be called for.

(b) Report of the Honours Committee

As the Chairman of the Honours Committee, Professor Alexander, was not present, further consideration of this report was deferred until next meeting.

2. A communication from the Faculty of Applied Science, to the effect that the Faculty had dropped C.E. 10 from the curriculum of the Combined Courses in Arts and Engineering and in Arts and Architecture, was read for the information of the Council.

3. Recommendation from the Department of Geology. As Geology 33 finished at Christmas time and is taken along with Geology 51, it was recommended that no test should be held in Geology 33. The Council concurred in the recommendation.

4. The Dean stated that certain difficulties had been met in the Bachelor of Commerce Course chiefly owing to the alternating of certain courses of instruction. On Professor MacGibbon's

suggestion the Chair agreed to appoint a committee to study the problem and report at a later date. The following committee was subsequently appointed: Professor MacGibbon (Chairman), Professor Campbell and Associate Professor Warren.

The Council adjourned at 5.10 p.m.

Addendum

Standing of Students in their Second Year at the University.

November Tests 1925 (Those not under the supervision of the Freshman Committee).

W. A. M. Kerr

The two hundred and thirty-eighth meeting (special) of the Council was held in the Senate Chamber at 4:30 p.m. on Tuesday, January 12th, 1926.

There were present: Dean Kerr in the chair; Associate Professors Long, Walker and Warren, Miss Patrick, Assistant Professors Owen and Sandin, and Mr. Stephens.

The business before the meeting was the consideration of the results of the Christmas finals. The results as presented were ratified and ordered to be published. As there were only eight members present and this did not constitute a quorum, it was decided that the action taken should be made a minute of the next regular meeting and subject to confirmation.

W. T. H. Kerr

The two hundred and thirty-ninth meeting of the Faculty Council was held in the Senate Chamber at 4:30 p.m. on Monday, February 1st, 1926.

There were present: Dean Kerr in the chair; Professors Alexander, MacEachran, Lehmann, Sheldon, Allan, Coar, MacGibbon, Gordon, Strickland, Misener, Campbell and Dunn; Associate Professors Rowan, Long, Walker, Macdonald and Warren; Miss Patrick, Assistant Professors Pelluet, Owen, Eddy and Lang, and Mr. Stephens.

The minutes of the last regular meeting were read, approved and signed.

The minutes of the special meeting held on January 12th

were read. The Dean explained that there had not been a quorum that day and the proceedings, therefore, were subject to confirmation by the present meeting. Confirmation and approval being given, the minutes of this meeting were signed.

The following agenda was then proceeded with:

1. Reports of Committees.

(1) On behalf of the Committee appointed to consider desirable changes in the Bachelor of Commerce Course the Chairman, Professor MacGibbon, submitted the following report:

Recommendations:

1. That Geology 33 be a separate course for Bachelor of Commerce students, the subject matter in general to be as follows: "The Mineral Deposits of the World in connection with their Physiographic Units". (three hours lectures - first term)

2. That Statistics (Mathematics 62) be added to the list of required subjects.

3. That the eighth subject to be taken in the senior years be a free option.

After some discussion the report, on motion of Messrs. MacGibbon and Campbell, was adopted as submitted.

(2) On behalf of the Honours Committee the Chairman, Professor Alexander, presented the balance of the Committee's report for the Session of 1925-26.

Dorothy McAlpine Leave granted to change optional subject from Psychology 52 to Ancient History 51.

J. A. Perrie 2nd yr. student following a programme of pre-requisites for either English or History, as follows: History 2, 3, Political Economy 1, English 2, Classics in English 51 and French 5-4.

Elizabeth M. Sudré a second year student following pre-requisites for Honours in Classics with the following programme:

Latin 2-4, Classics in English 51, English 2, History 2 and Greek 1.

Mary Hunt a 2nd yr. student with programme of prerequisites for English Honours as follows:
English 2, Classics in English 51, Philosophy 2, History 2 and French 5-4.

R. Jean MacLaggan 2nd yr. student taking prerequisites for English Honours with the following programme: English 2, Classics in English 51, History 2, French 5-4, Mathematics 7.

Irene Cumming applicant for Honours in History in third year. Application approved with following programme:
History 102, 57, 53 and French 52.

W. H. Mueller Dr. Lehmann having refused permission for extra subject, English 2 is struck off his programme.

Roland Clark application accepted with following programme:
Chemistry 54, Mathematics 55, German A.

Harold George Reiber Dr. Lehmann submits on Reiber's behalf the following programme: Chemistry 51, 54, 52, Mathematics 55 Latin 1.

R. L. Kutz Honours Chemistry fourth year. The following programme approved having previously been submitted to Dr. Lehmann: Chemistry 54, Biochemistry 61 and Geology 51.

Mary A. Grant 2nd yr. student following prerequisite courses for Honours in English with following programme: English 2, Classics in English 51, History 2, French 5-4, Philosophy 2 and Latin 1-3 as an extra.

J. M. Sweeney 2nd yr. student following prerequisite courses for Honours in English with following programme: English 2, Classics in English 51, History 2, French 5-4, Political Economy 1.

Ethel Cobb 4th yr. Honours History with following programme:
History 102, 57, 53, and English 53.

Kenneth C. MacKenzie This student is spending two years over his fourth yr. (Honours on the advice of Dr. Broadus, and submits following programme for this year:
English 52, 57, Latin 51, Ancient History 51 and French 5-4.

M. L. Watts By permission of Professor MacEachran this student is adding Physiology 62 to his programme.

J. D. Cornwall, 2nd yr. student following prerequisites for Honours English, with following programme: English 2, Classics in English 51, History 2, Latin 2-4 and Philosophy 2.

Marion Gimby Honours History 4th year with following programme:

History 102, 57, 53, Ancient History 51, English 57 as an extra.

Florence H. Borden, 3rd yr. Honours in Latin and French, with following programme: French 54, Latin 51, Philosophy 51, German 2-4, Greek 2-4.

Emily Horricks , 2nd yr. student taking prerequisites for Honours English with following programme: English 2, Classics in English 51, History 2, French 5-4, Political Economy 1. This student appears technically to have a deficiency in Physics 1, but has made application to the Admissions Committee for removal of same.

Leo Pekarsky, 2nd yr. student taking prerequisites for Honours in Classics, with following programme: Latin 2-4, Greek 2-4, Ancient History 51, English 2 and Philosophy 2. Mr. Pekarsky is also taking Math. 1 and Physics 1 Theory to complete his first year and French 5-4 as an extra, the latter contingent on his maintaining a satisfactory standing in the prerequisite subjects.

Effie Slonaker, 2nd yr. student taking prerequisites for Honours in Latin and French with following programme: Latin 2-4, French 5-4, English 2, Philosophy 2, Classics in English 51 with Math. 1 as a deficiency of 1st year.

A. W. Saddington, 2nd year student apparently taking prerequisites for Honours in Chemistry with following programme: Chemistry 1, Mathematics 7, Physics 8, Zoology 1, English 2, and Latin 1-3. The difficulty with this programme is that Physics 6 is the course called for by the Calendar, and Professor Smith was of opinion that Physics 8 was hardly equivalent. This matter was left for inquiry and if necessary for validation by the Chemistry Department.

T. C. Hargrave, 4th year Honours English with the following programme: English 52, 57, 109 and Ancient History 51.

D. K. Froman, 3rd yr. student with following programme: Physics 51, 54, Mathematics 57, Philosophy 51, Architecture 62. It was supposed, on the basis of this programme, that Mr. Froman was a candidate for Honours in Physics, in which case Professor Smith took exception to the extra subject, Architecture 62. Subsequent enquiry showed that W. Froman was not a candidate for Honours Physics, but the point raised in regard to his extra course was made a matter of further discussion in the programme of Mr. Woodford, candidate for Honours in Physics in 3rd year, and Professor Smith, who had been unable to attend the previous meeting of the Committee, took exception to the extra subject, Architecture 62. The Committee agreed that, in view of the objection of the Department of Physics, this subject should be stricken off, and Mr. Woodford notified to that effect.

A. W. Saddington Enquiry reveals the fact that Dr. Lehmann gave his consent to substitution of Physics 8 for Physics 6 in Mr. Saddington's programme in view of time-table difficulties.

Madeline Imogene Secord, applicant for 3rd yr. Honours in English,

with the following programme: English 62, 53, Ancient History 51 Comparative Literature 51 and Greek 1 to remove 1st yr. language deficiency. Miss Secord took in 1920-21 a general 2nd yr. course with the following programme: English 2, History 2, Political Economy 1, French 5-4, Chemistry 1. This leaves her deficient in Classics in English 51 as regards prerequisites for Honours English, and Miss Secord should have registered for this course this year. As however, it was impossible to detect the error earlier, it seems advisable that she should continue with her present registration and take Classics in English 51 in her 4th year. She is then entitled to have it count as a senior subject.

Marjorie Sherlock, 4th year student in Honours English, with the following programme: English 109, 52, Household Economics 51, Philosophy 51. Approved.

Walters, Susan Leonore, 2nd yr. Honours Philosophy. Programme Psychology 2, English 2, French 5-4, Zoology 1, Mathematics 1. Mathematics 1 is to cover her deficiency in Gr. XII Algebra and Geometry. History 2 will have to be postponed to next year.

Phyllis O'Donnell, Prep. Honours English. Programme: Greek 1, English 2, History 2, French 5-4, Classics in English 51, Political Economy 1, Phys. Ed.2.

Eleanor Cautley, Prep. Honours Latin and French. Programme: Latin 2-4, French 5-4, English 2, Philosophy 2, Classics in English 51 and Phys. Ed.2.

Farmer, Eleanor K. Prep. Honours English. five year course. Programme: English 2, History 53, Classics in English 51, French 5-4, German 2-4.

On motion of Messrs. Alexander and MacEachran the report as read was adopted.

Professor Gordon called attention to the fact that Miss Madeline Imogene Secord, who in accordance with the report of the Honours Committee had embarked on Honours English, had since then reverted to the general course.

11. Departmental plans for the new four years honours courses.

In introducing the subject the Chair pointed out that the adoption of the new courses would necessitate the re-phrasing of certain of the paragraphs introductory to honours courses as contained on page 77 of the current calendar. The Chair

pointed out as an instance of what was in mind that a number of the departments now required students to select a course from each of the three divisions in their first honours year, and that, therefore, the phrase "are required to take courses in two divisions" should be made to read "are required to take courses in at least two divisions". It was agreed that any necessary modifications to be made in the wording should be left in the hands of the Chairman of the Honours Committee and the Dean.

The Chair observed too that it had been the understanding up to the present that in the final honours year courses should be restricted to one division but not to one department. All the new departmental schemes submitted, except those of the Departments of English and Physics, agreed with this regulation.

The Dean pointed out further that the probability was that a large majority of the students taking our honours courses would in the future as in the past consist of people intending to go into the High School field. In connection with teacher training very significant work has been going on recently in the domain of Educational Psychology and it seemed a pity that our students by a completely prescribed programme should be debarred from the opportunity of taking any psychology courses in our own Department of Philosophy, and be allowed to assume their work as teachers with the meagre training of the Normal schools.

The Council then took up consideration of the various departmental schemes. With certain minor modifications all

were adopted with the exceptions of those submitted by the Departments of English and Physics. These were referred back to the departments concerned for reconsideration, particularly with a view to the introduction, if possible, of a little more elasticity through the substitution of one or more options in place of prescribed courses.

HONOURS IN CHEMISTRY

First Year: Subjects the same as for the General Course, but students are advised to select German and French as their language options and to take Mathematics 3 instead of Mathematics 1 if qualified to do so.

Second Year: Chemistry 1, Physics 6 or 8, Mathematics 7 or 55, Option in Division A or B. Option.

Third Year: Chemistry 51, 52, Option (Mathematics 55 unless already taken), Option.

Fourth Year: Chemistry 101 or 102, 54, 58, Option.

Fifth Year: Chemistry 101 or 102 or 103 or 104, Biochemistry 61, Option, Option.

HONOURS IN MATHEMATICS

First Year: Mathematics 3

Second Year: Mathematics 7, 22, Physics (Junior Course), One option in A or B., One option.

Third Year: Mathematics 55, Mathematics (another senior course) Physics (senior course), Physics (another senior course) or Political Economy (senior course) or Physical Chemistry or Philosophy.

Fourth Year: Mathematics (Honours course), Mathematics (senior course), Option, Mathematics (another senior course).

Fifth Year: Mathematics (Honours Course), Mathematics (senior course), Option.

HONOURS HISTORY

Second Year: History 2, Political Economy 1, English 2, two options.

Third Year: History 3, Philosophy 2, History 53 or 54, two senior options.

Fourth Year: History 56, 57, 102, Option.

Fifth Year: History 58, 101, Political Economy 63, Option.

HONOURS IN GEOLOGY

Second Year: Chemistry 1, Zoology 1, Botany 1, Mathematics 7, Option A or B.

Third Year: Chemistry 51, Geology 51, Option C, Option A or B.

Fourth Year: Geology 53, 62, Chemistry 54, Option.

Fifth Year: Geology 52, 55, 58, Option.

Note: Students are advised to have a reading knowledge of both French and German.

HONOURS IN CLASSICS

First Year Arts or Grade XII:
Note: If the student takes Greek 1 in this year, all the Greek courses standing at the head of the respective columns, can be moved back one place.

Second Year: Greek 1, Latin 2-4, Classics in English 51, English 2 or a 2nd yr. Modern Language. One free course (A-B or C).

Third Year: Greek 2, A Latin '50' course (with one hr. of the 3 devoted to Roman private life). Ancient History 51, A course in Greek and Latin Prose and Sight Trans., One free course (A-B or C).

Fourth Year: A Greek '50' course (with one hr. out of 3 to Greek private life.) Preliminary Greek Honours, Preliminary Latin Honours, One free course (A-B

Fifth Year: 2 Greek Honours Courses, one Greek Honours (with special attention to Classical Philology.)
1 Latin Honours.

(or)

Two Latin Honours Courses, one Latin Honours (with special attention to Classical Philology), one Greek Honours.
(the above depending on the choice of the Major subject

HONOURS IN MODERNS

FRENCH

Third Year: French 52, 55, German 54, Classics in English 51.

Fourth Year: French 51, German 55, Philosophy 51, Option.

Fifth Year: French 54, Rom. Phil. 101 - 102, Psych. 55, Option.

GERMAN

Third Year: German 54, 57, French 52, Classics in English 51.

Fourth Year: German 55, French 51, Philosophy 51, Option.

Fifth Year: German 56, Germ. Phil. 101 & 102 or 103 - 104. Psych. 55, Option.

FRENCH OR GERMAN plus LATIN

Second Year: Stet.

Third Year: stet (Option in a third subject from Division A & B.

Fourth Year: one French or German course, one Latin, Philosophy 51, option.

Fifth Year: one French or German, one Latin, Psychology 55, Option.

HONOURS IN PHILOSOPHY

Second Year: Prerequisites to Honours in Philosophy. Psychology 1 or Psych. 2; one option in Division A and one from Division B, two free optioms.

Third Year: Philosophy, two courses; Psychology, one course; option in a second department.

or

Psychology, two courses; Philosophy, one course; option in a second department.

Fourth Year: Philosophy, two courses; Psychology, one course; option in a second department.

or

Psychology, two courses; Philosophy, one course; option in a second department.

Fifth Year: Philosophy, two courses; Psychology, one course; option in a second department.

or

Psychology, two courses; Philosophy, one course; option in a second department.

Mathematics 62 (Statistics), Physiology 62, and certain other senior courses, to be selected after consultation with the Head of Department, may be substituted for certain of the above courses in Philosophy and Psychology.

HONOURS IN POLITICAL ECONOMY

Second Year: Prerequisites to honours in Political Economy: Political Economy 1, Psychology 2, Math. 7.

Students who desire to graduate with honours in Political Economy must present credits as follows: five senior courses in Political Economy; Mathematics 61 (Theory of Finance); Mathematics 62 (Statistics), two options and Political Economy 101, 102 and 103. (A senior course in Accountancy will be accepted in lieu of one senior course in Political Economy).

Political Economy 103 - Economic Programmes. A continuation of Political Economy 102 with special reference to particular problems.

HONOURS IN BOTANY

Second Year: Botany 1, two options from Division C (two of Physics, Chemistry, Zoology). Option from Division A, Option from Div. B.

Third Year: Botany 51 (a), Botany 101, Option (Chemistry recommended), Option (Geology recommended).

Fourth Year: Botany 51 (b), Botany 102, one of Geology, Biochemistry, Physiology, option (Chemistry recommended).

Fifth Year: Botany 52, Botany 103, one of Geology, Biochemistry, Physiology, option (Chemistry recommended).

Some discussion took place with regard to the selection by honours students of their options and it was agreed that a statement should be inserted in the introductory matter

requiring the approval of the Honours Committee of all options selected by honours students.

111. Broadcasting of courses of instruction.

The Chair stated that the question had been raised as to the possibility of broadcasting University courses by means of the radio,and attention was called to the fact that this practice is already in vogue in certain centres in the United States. Professor Coar added that it was being practised also by the universities of Europe. The general opinion was, however, that the time was not quite ripe for our embarking on any such scheme.

IV. Special Cases

(1) Louise C. Paterson. Miss Paterson, when taking the final Christmas examination in Political Economy 73, had not noticed on the back of the sheet questions 5,6 and 7. She made 44% on the four questions which she had answered. She petitioned for a special examination either on the work covered by the final three questions or if necessary on the whole paper. The envelopes still require the presiding examiner to call attention of candidates to questions on the backs of sheets. In the case of Political Economy 73 this apparently was not done. Professor MacGibbon stated that he arrived at the meeting called to consider the Christmas results just after the meeting was over, and that he had intended to recommend Miss Paterson for a pass as his Department was entirely satisfied that she deserved a pass. After some discussion, on motion of Messrs. MacGibbon and MacEachran, it was decided on the merits of the case to rescind the mark already passed

and give Miss Paterson credit for Political Economy 73.

(2) Hugh McDonald possesses Junior Leaving certificates of the Province of Ontario 1896 and a First Class Teacher's Certificate for British Columbia. He desires exemption from the primary examination of the Institute of Chartered Accountants. On account of his age and his long successful experience as a teacher, the Admissions Committee was disposed to grant him his request, but as his original certificate contained no languages and admission to chartered accountancy is the same as that of the Faculty of Arts and Sciences the Committee did not feel that it should forgive him the languages without the consent of the Faculty concerned. On motion of Messrs Alexander and MacEachran it was agreed to concur in the view of the Admissions Committee and to regard Mr. McDonald as having complied with the entrance requirements of the Faculty of Arts and Sciences, and for the purpose of Chartered Accountancy examinations to have complied with the requirements.

V. The Chair called attention to a communication from the General Faculty Council stating that an effort is being made to publish the Calendar at an earlier date than heretofore, and requested that the departments endeavor to have all the calendar material in not later than February 20th.

The Council adjourned at 5:50 p.m.

W. T. A. Kerr

The two hundred and fortieth meeting of the Faculty Council was held in the Senate Chamber at 4:30 p.m. on Monday, March 1st, 1926.

There were present: Dean Kerr in the Chair; President Tory, Professors MacEachran, Lehmann, Sheldon, Coar, MacGibbon, Gordon, Burt, Strickland, Campbell and Dunn; Associate Professors Smith, Rowan, Long, Hardy, Walker, Macdonald, Warren and McGoun; Miss Patrick, Assistant Professors Pelluet, Owen, Sandin, and Mr. Stephens.

The minutes of the preceding meeting, having been read and approved, were signed.

The following agenda was then proceeded with:

1. Business arising out of the minutes:

1. Report of the Committee to consider the general regulations governing Honours Courses.

On behalf of the Committee, consisting of Professor Alexander and the Dean, Professor Hardy representing Professor Alexander who was unable owing to indisposition to be present, submitted the following report:

DEGREES WITH HONOURS IN THE FACULTY OF ARTS AND SCIENCES

1. Admission to read for honours involves on the part of the student the possession of First Year Standing in the Faculty of Arts and Sciences, Senior Matriculation, or equivalent standing. The honours course covers a subsequent period of four years.

2. The courses in honours differ from the general courses in that they are planned with a view to specialization.

3. Students desirous of reading for honours must consult the head of the department concerned as early in their university career as possible; they are responsible for registering in their second year according to the regulations on the following pages.

4. Formal application to read for honours should be addressed to the Registrar before the end of the Second Year.

5. Permission to read for honours is granted by the Faculty Council on the recommendation of the Committee on Honours.

6. Work preliminary to honours begins in the Second Year and honours work proper extends subsequently over a period of three years. Students may be graduated with first or second class honours; this being determined by the average mark of all senior courses in the department in which they are reading for honours. Students who fail to secure 65% may be recommended to the Senate for a degree in the general course.

7. Students who fail to obtain honours standing at the end of their third or fourth years shall be transferred to the general course and become responsible for fulfilling the requirements of that course in so far as these differ from those of their honours course.

8. Students in the second year, intending to read for honours in the three following years are required to take courses in at least two divisions, but in the third and fourth years may confine their work to one division, but not to one department. Restriction of work to one department in the fifth year shall in all cases be subject to the special approval of the Committee on Honours.

9. Students reading for honours in one of the scientific departments are permitted at the time of their registration to choose either the B.A. or the B.Sc. degree, to be granted on the successful completion of their courses. The attention of such students is directed, however, to regulation 1 under Graduate Degrees. See page ....

10. The selection of all options available in a given honours course is subject to the approval of the Committee on Honours.

This report was adopted with the exception of Clause 6. Regarding this clause the question was raised by Professor MacGibbon as to whether any student should be granted Honours standing who, even in his optional courses, secured less than 65%. A variety of opinions showing itself, Professor MacEachran suggested that a committee be appointed to examine and report upon the issue involved at the next regular meeting. This proposal was agreed to and the Chair named the following committee: Professors MacGibbon (Chairman), Alexander, Lehmann, Sheldon, Coar and Burt.

11. Honours Courses:

1. On behalf of the Department of English, to which the original Honours scheme had been referred back for reconsideration, Professor Gordon submitted a revised plan as follows:

Second Year:	Continuation of the two languages taken in first year, Classics in English 51, English 2; a course in History #.
Third Year:	Continuation of one of the languages studied in first and second years, Honours Course in English (104), Pass course in English (English 53), an option from Division B#.
Fourth Year:	Honours Course in English (English 110), two pass courses in English (to be chosen from 52, 57, 58, 59, 60), an option from Division A or B.
Fifth Year:	Honours Course in English(English 109), pass course in English (to be chosen from 52, 57, 58, 59, 60), an option from Division A or B.

#To be selected after consultation with the Department of English.

This plan was approved.

2. Similarly on behalf of the Department of Physics Professor

Smith submitted a revised scheme for Honours Physics as follows:

First Year Arts or Grade XII must include Physics, Mathematics.

Second Year: Physics 3, Chemistry 1, Mathematics 7, One option in Division A, one option in Division B.

Third Year: Physics 6, Physics 12, Mathematics 22, Mathematics 55.

Fourth Year: Physics (senior course), Physics (another senior course), Physical Chemistry or optional subject, Mathematics 57.

Fifth Year: Physics (senior course), Physics or Mathematical Physics, Directed reading or research, or another senior course in Physics, and an optional subject.

This scheme was approved.

3. On behalf of the Departments of Classics and Moderns Professor Hardy submitted a scheme for Honours in Greek and French or German as follows:

Second Year: Greek 1; French 5-4 (or German 2-4); Philosophy 2; English 2 (or Latin 2-4 or German 2-4 or French 5-4); Classics in English 51.

Third Year: Greek 2-4; one senior French (or German) course; two options in Division A or B.

Fourth Year: Two senior Greek courses; one French (or German) course; one option in Division A or B.

Fifth Year: As for Fourth Year.

This scheme was approved.

111. New Courses of instruction or changes in old courses:

1. Botany 51. In the absence of Professor Lewis, the Chair stated that the Department of Botany desired to spread the content of Botany 51 over two years, thus making two courses which it was desired to number Botany 51 A and Botany 51 B. These courses would be given in alternate years and neither would be regarded as a necessary prerequisite of the other.

Professor Burt argued that where letters were used elsewhere in connection with the description of courses in the Calendar their use had been restricted to differentiating individual parts of a normal three-hour course and he was afraid that the proposal of the Department of Botany would introduce confusion. He suggested the possibility of abandoning the number 51 altogether and calling the two courses derived from it Botany 53 and 54. The principle of the division of the course having been approved, the question of its numerical description was referred back to the Department of Botany.

2. English courses - Professor Gordon, on behalf of the Department of English, submitted a re-statement of the description of the Honours courses in English as follows:

108 to be dropped out; 104 and 109 to remain as they are;

105 to be modified and renumbered 110.

The above re-statement was approved by the Council.

3. Geology 33 - Professor Warren, on behalf of the Department of Geology stated that it was now proposed to separate Geology 33 completely from Geology 32. Hitherto the Bachelor of Commerce students had taken lectures of Geology 32 in the autumn term. The content of this course was not, however, very suitable for the purpose of the Commerce students and it was proposed now to alter the nature of the instruction and give the Commerce students a course which would be more related to their needs. Geology 33 would, therefore, be described hereafter as follows:

Geography of Mineral Deposits (three hours, 1st term) Distribution of Mineral Deposits and the geographical relation of these to Physiographical units.

The above proposal received the approval of the Council.

4. Education 55 - On behalf of the Department of Philosophy Professor Macdonald submitted for the approval of the Faculty Council a new course to be described as follows:

Education 55 - The Supervision of Instruction in the Elementary grades.

Physical growth of children, including analysis of general body growth, brain development and relation of nutrition to growth.

Mental growth of children, including instinctive tendencies, growth in general intelligence, growth in specific capacities, development of language, drawing and play tendencies.

The supervision of Composition, Reading and Arithmetic, Summarizing results of scientific studies of these elementary school subjects. The Alberta Course of Studies for the elementary grades will be studied in detail.

The class will do research work in one subject, each student taking an investigation within the field chosen.

Professor Macdonald stated in explanation that there had been a specific demand on the part of teachers for such a course and that it would be given by Mr. Lazerte, who had had special training in this field. It was proposed to offer the course in the Session of 1926-27, but it would not necessarily be offered every year. The Chair inquired if the giving of this course involved any additional teaching power. Professor Macdonald replied in the negative. The Council approved of the new course.

5. Household Economics.

On behalf of the Department of Household Economics Miss Patrick asked the authority of the Council to make the following changes:

i. That the name of Household Economics 58 be changed from "Invalid Cooking" to "Food and Diet for the Sick".

ii. That the time for Household Economics 58 and 59 be increased to one hour lecture and three hours laboratory per week.

111. That in the second year of the B.Sc. course, "one course from Division A" be changed to "an approved course from Division A or B".

Miss Patrick stated that since Philosophy 1 or 2 has been made a prerequisite for Psychology 51, students in Household Economics have been unable to follow a course in Psychology. The suggested change would make it possible for them to do so.
The Council approved of the changes proposed.

IV. Description of Honours Courses: The Dean brought to the attention of the Council the fact that hitherto the University has granted two types of honours, First and Second Rank. Apparently the work "rank" had originally been taken from the McGill Calendar. The Chair suggested that "rank" was not a particularly happy term with which to describe honours and pointed out that McGill had abandoned the word "rank" and adopted the word "class" some ten years ago. Some members of the Council remarked that ordinarily we used the word "class" anyhow. It was agreed that hereafter the word "class" should be substituted for the word "rank".

V. Re. Test Examinations at the end of the Summer Session. The Dean pointed out that, when the Summer Session courses had been discussed, it was agreed that there should be no examination at the end of the Summer Session, but that students, provided with books, syllabi, etc. should return home and take the regular university examinations in the spring. The Chair stated that it had occurred to him since, that it might be advisable, as in the case of our ordinary work, to allow only 70% for the final examination, and to allot 30% for tests or term work of some kind. It seemed fitting that the Summer Session should close with some

short examination so that students at the conclusion of that Session would have some notion of how they were getting on. A short, general discussion followed, and it was agreed that the final examination should be valued at 70% and term work or tests at 30%. It was further agreed that each department should turn in to the office a mark at the end of the Summer Session of not less than 15%, the determination of the balance of the 30% - whether it should be allotted to a test or term work - should be left to the discretion of the various departments.

VI. Special Cases:

1. Cyril Kenway, who in the Session of 1924-25 attended the lectures in Mathematics 62, wrote the two term tests, but owing to not having registered in the course, did not write the final examination; asked permission to enter the course at this date and to sit the final examination this spring. The Department of Mathematics concurring, this request was granted.

VII. Other business.

Professor Smith, on behalf of the Department of Physics, stated that their method of marking junior courses had not been for some time that described in the Calendar, and asked that in section (a), page 63, the phrase "and in Physics 1" be deleted. The Council agreed.

Professor Owen similarly pointed out that in Moderns the description on page 63 was not quite correct in that in Moderns the 50% was based not only on weekly exercises but on term tests also. This correction was noted and approved by the Council.

The Council adjourned at about 5:45 p.m.

W. S. M. Kerr

A special meeting of the Council was held on Monday, March 15th 1926 at 12:25 p.m.

There were present: Dean Kerr in the chair; Professors Alexander, MacEachran and Lehmann, and Mr. Stephens.

The Dean announced that only three nominations as representatives on the University Senate - the slate proposed by the Nominating Committee - had been received, to wit: Professors J. F. Coar, A. L. Burt and Geneva Misener. On motion of Professors Alexander and MacEachran the three persons named were declared elected.

As there was not a quorum present the proceedings are subject to ratification at the next regular meeting of the Council.

Addendum.

W. S. M. Kerr

The two hundred and forty-second meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber, Monday, April 5th, 1926 at 4:30 p.m.

There were present: Dean Kerr in the chair; Professors Alexander, Broadus, Lehmann, Sheldon, Lewis, Coar, MacGibbon, Gordon, Burt, Strickland, Misener, Campbell and Dunn; Associate Professors Rowan, Long, Walker, Warren and Owen; Miss Patrick, Assistant Professor Eddy and Mr. Stephens.

The minutes of the preceding regular meeting having been read and approved were signed.

The action taken at the special meeting of March 15th at which there was no quorum was approved and the minutes of this meeting were also confirmed and signed.

I. Reports of Committees

On behalf of the Committee appointed to consider the question of the determination of honours standing the Chairman, Professor MacGibbon, moved, seconded by Professor Coar, the adoption of the following proposal:

"The Committee recommends that departments recommending students for graduation with honours shall send the recommendations to the Committee on Honours which shall review the student's record and send the recommendation forward to the Faculty Council with or without concurrence."

The Council agreed to this recommendation.

II. New Courses

In connection with the sub-division of Botany 51, it was agreed, Professor Lewis concurring, that the number 51 should be dropped henceforth and the two new courses arising from 51, which it was understood would alternate from year to year, would be called Botany 53 and Botany 54.

Botany 53 - 3 hrs. lect. 3 hrs. lab.
Classification, morphology and anatomy of the Algae, Fungi, Bryophyta and Pteridophyta. General methods of plant histology. Evolution of the lower groups of plants.

Botany 54 - 3 hrs. lect. - 3 hrs. lab. and field work.
Classification, morphology and anatomy of the Spermatophyta. General principles of heredity. Origin and development of plant associations with special reference to some district in Alberta.

III. Grouping of courses in General Literature.

The Senate having agreed at its meeting in May 1925 to the establishment of a course in Old and New Testament Literature, expression was given to the hope that in the future the afore mentioned course, together with Classics in English 51 and Comparative Literature 51, should be grouped in the Calendar under the heading of General Literature. Professor Alexander proposed that action in this sense be taken and the three courses named be grouped in the Calendar under the caption of General Literature. It is understood that each course will also appear in the department which supplies the teaching for it.

IV. Question of percentage of pass in combined courses.

The Dean stated that the Faculty of Applied Science had raised the question of injustice involved in requiring students taking the combined course in Arts and Applied Science to pass one half their senior Arts courses with a mark of sixty-five per cent owing to the fact that these students were obliged to carry more than the four courses demanded by the Faculty of Arts and Sciences. As other faculties were involved the Chair suggested that the matter be sent forward to the General Faculty.

The Council agreed.

V. Aegrotat Standing. Professor Sheldon on behalf of Professor MacEachran, who was unavoidably absent, asked consideration of the following point in connection with the granting of aegrotat standing. The rule has been that, if a student missed a test through illness, he was granted fifty per cent in case he needed the marks to secure a pass. The question raised by Dr. Sheldon was: Shall a student who misses a test be granted sixty-five per cent if he is depending upon a given course to make a necessary second class standing? As a result of a general discussion the general opinion seemed to be that it would be unwise to lay down a definite rule. It was pointed out that the student in question might secure enough second classes in enough other courses so that he would not be dependent on the one in question. Professor Strickland observed that the number of marks involved was insignificant in any case as 15% of fifteen marks amounted to only two. It was finally agreed that the point at issue should be kept in mind by the Revision Committee when they were going over the examination results.

VI. Attendance Requirements

The Dean asked the consideration of the Council of the question

of the possible relaxation of attendance requirements in the third and fourth years. He thought the time had perhaps come when the University might differentiate as between Junior and Senior students in the hard and fast obligation to attend a fixed percentage of lectures. He pointed out further that such a relaxation, if agreed to, would assist in bringing the attendance requirements of the Summer Session more into line with those of the regular winter session. A general discussion followed, and apart from obvious necessity of making no concession in attendance requirement so far as laboratories were concerned and the further necessity of definite registration in courses at the beginning of the term, all members of the Council approved of the principle. The question was sent forward to the General Faculty with unanimous recommendation for favorable consideration.

VII. Revision Committee For the purpose of considering the final examination results of the year, the following Revision Committee was appointed: Messrs. MacGibbon (Chairman), Burt, Macdonald, Lang and Matthews, and Miss Deadman.

VIII. Special Cases

Dr. W. N. Condell, who has a complete attendance record for French 5-4, Parts 1 & 11, in the Summer Session of 1925, but did not take the final examination, now petitioned that he be allowed to re-enter this course as from the first of February and take the coming final examination at the close of the present term. The Council agreed.

IX. Re. the late Marjorie Mae Anderson

The Chair stated that a number of the members of the Council had been discussing informally the possibility of doing something

for the late Miss Anderson, a member of the present graduating class, who had died subsequent to an operation for appendicitis on March 27th last. She had a very good record as a student and as her standing was clear, including the second tests in the Session, there was every prospect that she would have graduated. Professor Alexander pointed out that had Miss Anderson's operation not terminated fatally she would undoubtedly, on the basis of her record, have been granted an aegrotat degree and he thought in view of the circumstances that the Council would be doing a gracious and humane thing if they recommended to the University Senate the granting of the degree in the case of this student. Seconded by Dr. Lehmann, the proposal passed unanimously.

X. The Chair recalled the fact that since the last meeting of the Council the death had taken place of Chancellor Stuart. He did not like to see no reference in the minutes of this Council to so sad an event in the history of the University, but at the same time he suggested that formal action in this regard would more fittingly be taken at the coming meeting of the General Faculty Council, which would include all departments of the institution. The Council concurred in this view.

XI. The Dean stated that recent news of the health of the Registrar was not so good as had been expected. The hope was expressed, however, that Mr. Race's condition would speedily improve.

XII. Professor Lewis complained of the ventilation of the Arts Building. He understood that the fan had recently not been in operation. The Chair agreed to call this to the attention of the Resident Engineer.

The Council adjourned at 5:30 p.m.

W. T. M. Kerr

The two hundred and forty-third meeting of the Council of the Faculty of Arts and Sciences was held in the Senate Chamber, Tuesday, May 4th at 10:00 a.m.

There were present Dean Kerr in the chair, President Tory, Professors Alexander, Broadus, Lehmann, Sheldon, Lewis, Boyle, Burgess, Coar, MacGibbon, Burt, Strickland, and Campbell; Associate Professors Hardy, Walker, Macdonald, Warren and Owen; Miss Patrick, Assistant Professors Eddy and Sandin, and Mr. Stephens.

The minutes of the preceding meeting having been read and approved were signed. The following agenda was then proceeded with.

Professor MacGibbon called attention to the fact that no action had been taken at the General Faculty Council in relation to the death of Chancellor Stuart. The Dean stated that he would see to it that this matter was brought up at the next meeting of the General Faculty Council.

I. Abolition of Attendance Requirements. The Chair submitted the following resolution passed by the General Faculty Council and asking for a discussion thereon:

> "That the General Faculty Council remits to the Councils of the several Faculties, for their favourable consideration and early report, the abolition of attendance requirements in the senior courses."

President Tory stated in effect that he was afraid that the resolution was going too fast and too far and suggested that it might be well to try the proposal at first with the graduating class only. A general discussion followed participated in amongst others by Messrs. Alexander, Broadus, Lehmann, Sheldon, Lewis, Coar,

MacGibbon, Burt, Macdonald and Owen. Professors Alexander and Broadus advocated the unqualified adoption of the regulation. Professor Macdonald feared that all the consequences of the adoption of the regulation as it stands were not anticipated and was of the opinion - while he favoured the principle - that safeguards would have to be instituted if the regulation were to prove satisfactory in operation. As a result of the discussion the following resolution was unanimously adopted:

> "The Council of the Faculty of Arts and Sciences approves of the resolution sent forward by the General Faculty Council with respect to the abolition of the attendance requirement in the senior courses provided that the Faculty Council reserves the right to exclude all students from the examinations whose attendance in its opinion has been unsatisfactory."

Subsequently Professor Burt, seconded by Professor Sheldon, moved that the regulation as amended should be made applicable to the graduating class only. This motion was lost.

II. Advanced Taxonomy 63 At the suggestion of Professor Strickland a new course "Advanced Taxonomy 63" as described below, authorized by the Faculty of Agriculture, was opened to students of the Faculty of Arts.

> Advanced Taxonomy 63. 6 hrs. lect.-lab. Classification and biology of, and literature upon, two or more of the major orders. Students who take this course must have prepared a general collection which includes at least fifty species in each order that they select for special study.
> Prerequisite: Entomology 62.

III. Outstanding half courses of the Summer Session. The Dean submitted for the consideration of the Council a difficulty which had arisen through the change in the character of the Summer Session. A large number of students have credit on the University's Books for half courses taken under the old scheme. It had been

agreed at the time the change was originally discussed that certain adjustments would have to be made and the problem dealt with in a liberal spirit. The matter had been talked over informally by several members of the staff and the only practical solution that was suggested was to permit students having credit for such half courses to complete these by extra-mural study and a final examination. The general opinion of the Council seemed to be that there was no other feasible method of dealing with the question and the solution as just alluded to was adopted with the proviso that the privilege to clear up arrears in the way indicated should close with the spring of 1928.

IV. Special Case. A letter was read from A. Havelock Maclennan asking on the basis of illness for certain supplemental examinations. The letter was referred to the Revision Committee for consideration.

The meeting adjourned at 11:50 a.m.

W. A. M. Kerr

The two hundred and forty-fourth (special) meeting of the Faculty Council was held in the Senate Chamber at 2:30 p.m. Monday, May 10th, 1926.

There were present: Dean Kerr in the chair, Professors Alexander, Broadus, Lehmann, Lewis, Boyle, Burgess, MacGibbon, Gordon, Burt, Misener, Campbell, and Dunn; Associate Professors Rowan, Hardy, Walker, Macdonald, Warren, Owen and Lang; Miss Patrick, Assistant Professors Pelluet, and Eddy, and Mr. Stephens.

The minutes of the preceding regular meeting were read, approved and signed.

The main purpose of this meeting was to receive the reports of the Revision and the Honours Committees and to ratify the final results for the Session of 1925-26.

I. On behalf of the Revision Committee the Chairman, Professor MacGibbon, submitted the following report in relation to prospective graduates in the Faculty of Arts and Sciences:

"The Revision Committee met on Saturday morning and reviewed the results of the students expected to graduate in the Faculty of Arts and Sciences. They found that the following had satisfied all the requirements:

BACHELOR OF ARTS

Barclay, Elsie Catherine
Boyle, Helen Murray
Brown, Gladys Violetta
Cobb, Ethel
Dalgleish, Lorna Emeline Agnes
Gimby, Marian Marguerette
Jagoe, Eva
Kiteley, Sada Florence
Little, Gwendoline Ramsey
McAlpine, Dorothy Desilets
McMillan, Catherine Jane
McQueen, Helen Agnes
Manson, Mary
Sherlock, Marjorie
Sorenson, Gladys
Toby, Charlotte Gwendoline
Torgersen, Lorine Amense
Williamson, Jean Huston
Wilson, Anna Elizabeth
Baker, Harold Mills
Brearley, Guy Gage
Bryden, Donald Charles
Claxton, Herbert George
Cross, Edmund Edwin
Deeprose, William Albert
Edwards, Cecil Allan
Edwards, William Henry
Ellis, Frederick Edwin John Parkes
French, Gordon Cooper
Hargrave, Thomas Campbell McKee
Harrison, Robert Walker
Johnston, Fergus Duncan
Johnston, Gordon Charles
Laverty, Charles Murray
McDonald, Douglas Peter
MacGregor, James Grierson
Macgregor, John Watt
Martland, Ronald
Matheson, John Abner
Oke, David Jason Wesley
Richards, William Clarence
Selnes, Walter Engval
Skitch, Clifford Humphrey
Smith, George Edwin
Stade, Frederick John
Thompson, Edmund Jabez
Trout, Harry Bernard
Walker, Arthur Earl
Watson, William Ritchie
Watts, Ernest Hay
Watts, Morrison William LaBrash

BACHELOR OF COMMERCE

Clermont, Marilda Marie
Cooper, Marguerite Mary
Giffen, Aubert Wesley
Henderson, James Ross

Manning, Alice Helen Jessop
Paterson, Louise Cooke,
Swinarton, Wilma Kathleen
Barker, Alfred Stanley
Iversen, Ross Christian
Jeffery, Charles Vernon
McLaren, William Laurence
Sprung, Donald Allan

BACHELOR OF SCIENCE IN ARTS

Anderson, Marjorie Mae (posthumous)
Atkinson, Grace Annette
Joyce, Alice Forsythe
McNichol, Dorothy Isabel
Scott, Bessie Hill
Antrobus, Fred
Cooper, Ross Henry
Froman, Darol Kenneth
Goodall, Donald Percy
Kutz, Russell Laurence
Large, John McKay
McCallum, Malcolm Graham
Mueller, William Henry
Revell, Andrew Murray
Sturrock, Murray Grey
Sutherland, John Walter

BACHELOR OF SCIENCE IN HOUSEHOLD ECONOMICS

Bard, Grace
Gratz, Alice Sprott
Moyle, Winnifred Jean

BACHELOR OF SCIENCE IN PHARMACY

Auger, Jean Audrey
Hooper, James Crawford

and

They also noted that M.H.M. Baker, Mr. Ronald Martland had achieved First Class General Standing in the course for the B.A. degree and Marilda Marie Clermont, First Class General Standing in the course for the Bachelor of Commerce degree.

The Committee considered thirteen cases where candidates had not completely fulfilled the conditions for a degree and they report as follows:

R.J. Brewer had obtained 46 marks in Mathematics 55, but had passed in all other subjects with the required Second Class Standings. The Committee interviewed the Department of Mathematics which consents to Mr. Brewer's mark being raised from 46 to 50 and recommends to the Faculty that Mr. Brewer be recommended for the Bachelor of Science degree.

Bertha McCallum obtained 47 in Architecture 62 but has satisfied all other requirements. With Professor Burgess's concurrence the Committee recommend that Miss McCallum be raised in Architecture to 50.

Louis M. Shulman passed all his subjects but lacked one Second, two being required. In view of the fact that Mr. Shulman had carried and passed in more subjects than was required for his degree, the Committee recommend that Mr. Shulman be recommended for his degree.

Anne R. Bain suffering from an attack of influenza during examinations, was unable to write the paper on Political Economy 64. She applied for a special examination for April 29th which apparently was not granted to her and her certificate of illness was sent forward to the Revision Committee. Miss Bain has passed in all her other subjects, has fulfilled the requirements of obtaining two Seconds. The Committee recommend that she be granted aegrotat standing in Political Economy 64.

In the following instances the Committee recommend that the reports as received from the Departments be confirmed:

Helen de Silva for B.Sc. in Arts obtained 44 marks in Architecture 62 and obtained only one Second in her final year, namely Geology with a mark of 66. The Committee felt that while it might recommend one grace for a student, that in no instances where two graces were required to pass a student would they make a recommendation.

Clarence Philp for B.A. failed in Zoology 1 and like Miss de Silva had only one Second Class standing. He submits an application for aegrotat with the proper medical certificate having missed practical examination in Zoology. Mr. Rowan recommends a pass in this subject. The Committee recommend that Mr. Philp receive aegrotat standing in Zoology 1 but do not recommend that the requirement of two Seconds be waived.

Henrietta Wood obtained 46 in English 52 and lacks one Second Class standing.

Rockwell R. Hinchey lacked the Second Class Standings.

Luke C. Kelly 35% in German 1-3.

Lester Glass 38% in German 1-3. The Committee could not see their way clear to recommend any concessions to students carrying a first year subject into their final year.

Pat Malcolmson 44% in Architecture 62.

C. E. Noble 43% in Psychology 51. Both these students had

obviously quite clearly failed in their respective subjects and both are in combined courses. It is felt there will be no hardships imposed upon them in deferring for another year the receipt of the B.A. degree.

Hugh H. Horne failed in deficiencies in French 1-3 and Latin 1-3. In his four senior courses he obtained only one Second.

On motion of Professor MacGibbon the report as submitted was adopted.

II. On behalf of the Committee on Honours the Chairman, Professor Alexander submitted the following report:

Department of Modern Languages

Jean Williamson, First Class Honours in Moderns
Gwendoline Toby, First Class Honours in Moderns
Gwendoline Little, First Class Honours in French and Latin.

Department of Chemistry

Russell L. Kutz, First Class Honours in Chemistry
Murray G. Sturrock, First Class Honours in Chemistry
John W. Sutherland, First Class Honours in Chemistry
Henry W. Mueller, Second Class Honours in Chemistry

Department of History

Ethel Cobb, First Class Honours in History
Marian Gimby, First Class Honours in History
Harry Bernard Trout, First Class Honours in History

Department of Philosophy

Morrison William LaBrash Watts, Second Class Honours in Philosophy.

Department of English

Marjorie Sherlock, First Class Honours in English.
Catherine Barclay, Second Class Honours in English.
Thomas Campbell M. Hargrave, Second Class Honours in Eng.
Dorothy McAlpine, Second Class Honours in English.

Department of Mathematics.

Eva Jagoe, First Class Honours in Mathematics.

Department of Classics.

Mary Manson, First Class Honours in Classics.

On motion of Messrs. Alexander and Boyle the report as submitted was adopted.

III. The following awards of prizes, medals and scholarships were made in harmony with the conditions respecting these distinctions as laid down in the Calendar:

The Scholarships of the Alberta Pharmaceutical Association.

In the Degree Course: William David Goldberg

The Aikins Scholarship in English Language and Literature.

Joseph Edwin Harris

The Women's University Club Scholarship

Not awarded.

PRIZES

The Jane Alexander Memorial Prize in Geology

Loris Shano Russell

TheGordon Stanley Fife Memorial Prize in History

Ethel Cobb

The Harold Waldo Huestis Memorial Prize in English

Emily Horricks

Prizes in Mathematics: Mathematics 1: Not awarded.

Mathematics 3: Not awarded.

The Samuel Richard Hosford Memorial Prize in English.

Horatio Henry Lovat Dickson.

The Vallée French Prize

Ewart Beresford

The French Prize of the Societé Du Parler Français.

Effie Mabel Florence Slonaker and Edward Frederick Hunter (equal)

The Jane Alexander Memorial Prize in Latin

Effie Mabel Florence Slonaker.

The History Club Prize.

Mary ArleneGrant and Matthew Henry Halton (equal)

The Wells Prizes in French

French 52: Gwendoline Ramsey Little. Awarded by reversion to Jean H. Williamson
French 54: Gwendoline Ramsey Little.

The Halley Hamilton Gaetz Memorial Prize in Philosophy

Thomas Harold Fountain

Medals

The Charles Allan Stuart Gold Medal in Classics

Maty Manson

The Alexander Cameron Rutherford Gold Medal in English

Marjorie Sherlock

The Women's University Club Gold Medal

Harold Mills Baker

The James Ramsey Gold Medal in Mathematics

Eva Jagoe

Le Club La Verendrye Gold Medal in French

Gwendoline Ramsey Little

FELLOWSHIP

The Lloyd Hartnoll Bishop Memorial Fellowship in English Lit.

Thomas Campbell McKee Hargrave

IV. The Department of Classics concurring, the Department of Modern Languages recommended that, in the case of the "A" languages in which the pass mark at present is 65%, the mark for supplemental

examinations should be fixed at 70% hereafter. This was agreed.

V. Special Cases:

1. Robert Wallace Boyd - This student, after the completion of the second tests, was obliged to go into the University hospital for an operation and was subsequently sent by Professor Mewburn to his home in Medicine Hat to convalesce. He wished to attempt to return to take his final examinations but in accordance with Dr. Mewburn's verdict was not permitted to do so. As he is a student in the Third Year with an excellent record in the combined course in Arts and Medicine it was agreed that he should be granted complete aegrotat standing.

2. Alexander Havelock Maclennan. This student on account of illness in the spring was granted supplementals in Chemistry 52 and Classics in English 51.

3. Guy Lyle - This student on account of illness was granted permission to write a supplemental in Ancient History 51.

4. J. A. Davies. The hand of this student, who is an ex-service man, opened during the examination in History 3 and discharged a pieee of shrapnel. In consideration of this fact the Department of History recommended that Mr. Davies be given a pass in this subject in which his sessional mark stood at only 47%. Agreed.

5. Lottie Newhouse - In consideration of this student's satisfactory record in other courses the Department of English recommended that her mark in English 52 be raised from 47 to 50. Agreed.

6. Geneva Fanning, absent from the final examination on account of illness, and on account of her otherwise good record Professor Burgess recommended that Miss Fanning be granted aegrotat standing in Architecture 62. Agreed.

7. Dorothy Young - On account of illness in the final examination and in consideration of the fact that she had already written the examination four times, Professor Lehmann recommended that Miss Young be granted aegrotat standing in Chemistry 1. Agreed.

8. Charles Waldo - The final mark of this student in Mathematics 62 was 21. As he had been ill at the first test Professor Sheldon recommended that he be granted aegrotat standing in that test which, if granted, would raise his final mark to 30% and enable him to secure a supplemental. Agreed.

VI. Ratification of the final results as submitted by the various departments for the Session of 1925-26 was agreed.

The meeting adjourned at 3:55 p.m.

W. S. M. Kerr

The first Meeting of the Summer School staff was held in the Senate Chamber on Thursday, July 8, at 4.30 p. m.

There were present Professor MacGibbon in the Chair; Professors Campbell, McDonald; Associate Professors Long and Walker; Assistant Professor Sandin; Mr. Pelluet and the Assistant Registrar.

Professor MacGibbon brought to the attention of the meeting the fact that the registration of the present summer school was smaller than last year. To date 63 had registered in University courses. Total registration last year was 103..

The registrations in the various courses offered were smaller and it was decided after consultation with President Tory to continue all courses with three or more students. This resulted in the cancelling of History 56 and of Latin 2-4.

The Chairman brought up the question of Physics. The Arts Faculty minute relation to Physics 1 reads as follows:-
"Admission Grade XII protanto; Physics must be included and in addition the University will require the laboratory of Physics 1 (4 hrs. per week) to be done at the Summer Session."

This announcement had been omitted from the Summer Session calendar, also the time-table for Physics 1 laboratory shows 12 hours per week instead of 4 hours per week. It was decided to post a notice containing the above minute and the statement that this course would be given if a minimum of five students applied for it before Saturday noon.

The case of regular session students taking summer courses was discussed and it was decided that the bearing of these registrations upon the students course should be left for consideration to the proper authorities in the autumn.

In connection with the assigning of marks for the Chemistry courses, Associate Professor Walker moved that the allotment of the marks in the Summer School courses in Chemistry be 30% to laboratory work and 20% to term work, the other 50% to be left for the final examination in the spring. Professor Walker explained that in the Summer courses in Chemistry the full laboratory work of the regular courses is given. Seconded by Assistant Professor Sandin. Carried.

The meeting adjourned at 4.50 p. m.

W. S. M. Kerr

The second meeting of the Summer School staff was held in the Senate Chamber on Monday, July 26th at 11:55 a.m.

There were present: Dean Kerr in the chair; Professors MacGibbon, Gordon, Campbell; Associate Professors Hardy and Walker; Assistant Professors Pelluet and Sandin; Mr. de Savoye and ~~the Assistant Registrar.~~ Mr. Stevens.

The minutes of the previous meeting were read, approved and signed.

1. Business arising out of the minutes:

(a) It was reported that the registration has risen from 63, the number at the time of the first meeting, to 71.

(b) Physics 1 Laboratory. Only three people applied for this course, therefore, it was not offered.

11. New Business:

Norma Holmes. The Chairman read a letter from the Department of Classics in which Miss Holmes requested permission to register in Latin 3 at this Summer School and to write the final examination at the end of the Summer Session without being in attendance at classes. A clash in the time-table made it impossible for her to attend Latin 3. Miss Holmes is attending classes in English 2 and Political Economy 1 in order to clear up her junior work.

Moved by Associate Professor Hardy, seconded by Associate Professor Walker that in view of Miss Holmes' satisfactory attendance in Latin3during the Session 1924-25 and in view of the injury and illness which prevented her writing at that time, her request be granted. Carried.

The Chairman mentioned that the Department of Education would like the University to offer first year work at the 1927 Summer Session. This would be discussed at a regular meeting of the Faculty during the regular session. Dr. Walker suggested that a list be prepared showing the number of old and new students in attendance.

W. A. M. Kerr
